The object in view by the enactment of any criminal law or ordinance is for the punishment and suppression of ne-not to license crime; and any community enforcing or pretending to enforce a law or ordinonce merely for the sake of revenue becomes a partner in crime with the criminal. While at the first glance we believed the ordinance to be a good one, yet if that ordinance was gotten up, passed and promulgated for no other object than to license crime the quicker that idea is exploded the better it will be for all con- Near Depot. cerned. If the ordinance is to be used for] the protection of violators of law, order and good government in standing in the way of the enforcement of law by the circuit court, through law violators pleading previous jeopardy or trial by inferior courts, then the hope the best class of citizens have for making the town renowned for obediense to law will be shattered. We have brought out these points in order to show just what can or cannot be accomplished by the ordinance. We honestly believe that whatever idea the daddy of the ordinance had in his mind or whatever was his object that the city marshal and the city recorder will carry out the provisions of the ordinance; and the only change we would make in it would of any showing to the contrary, I am of be to put the lowest amount of fine at titled to the presumption that their con-\$50 for the first offense and then have duct has not been of a character which
