RAPE AS A FORAGE CROP. It Has High Feeding Value For Pas-

turing Sheep and Hogs. Rape is much like the Swedish turlike cabbage. The leaves are large and

cultivated. Dwarf Victoria has recently given excellent results in New England and the northwest. In this country rape is grown almost exclusively for soiling and summer and winter

THE BAPE PLANT. tions of Canada and the northern United States. It can, however, be successfully grown as a forage crop in many

of the warmer and drier sections. In the northern states the blenmini rape will not survive the winter, hence does not produce seed. In the south it may be grown as a fall or winter forage. The annual varieties used for the production of oil form seed the first year, but these kinds are not suitable for forage.
