

POPULAR NORTH BEACH.

Roseburg People Will Find This an Ideal Recreation Resort.

Many Roseburg people have decided to spend their vacation at Popular North Beach, at the mouth of the Columbia. Leaving Portland (daily except Sunday and Monday) on the O. R. & N. Co.'s palatial Steamer T. J. Potter—queen of river boats—five hours are consumed in making the trip to Astoria, the scenery including all that is beautiful, and through the great salmon fishing waters of the Lower Columbia. After a short stop at Astoria, the steamer is off for Ilwaco, on Baker's Bay, where the passengers board the train waiting and are soon off for North Beach, the popular summer resort of the North Pacific coast. During the trip from Ilwaco the first good view of the Pacific is secured, the train running along the ridge of the beach within two hundred yards of the breakers. The beach is twenty-seven miles long, two hundred yards wide at low tide, and so hard that carriage wheels scarcely leave a mark. It is an ideal place for driving, riding, wheeling, or walking, and the surf bathing is unsurpassed. The excellent hotels and boarding places provide good accommodations at prices ranging from one dollar to three dollars per day. The round trip rate from Portland to Astoria is \$2.50; to Ocean Beach points \$4.00, good until October 15th. On Saturdays, during July and August, round trip tickets are sold to beach points at \$2.50, good for return leaving the beach the following Sunday evening.

Meeting of Prune Association.

At the annual stockholders meeting of the Willamette Valley Prune Association at Salem held on the 11th inst, a suggestion was made by visiting prune growers from Clarke county, Wash., that a meeting of representatives of the various association and all growers interested to be held at Salem at an early date to consider prices for this seasons product. The Association believing the suggestion to be in the interest of the growers and for the good of the industry at large has called such a meeting for Saturday, July 25th, to be held at the office of the Association in Salem at 1:30 p. m.

A large and representative attendance is greatly desired as the occasion is extremely important.

WILLAMETTE VALLEY PRUNE ASSOCIATION.

Dated Roseburg, Douglas County Oregon, June 18th, 1903.

GEO. DIMMICK, County Treasurer.

Work of the United States Geological Survey in the Petroleum Fields of California.

The United States Geological Survey, within the last eighteen months, has been making a preliminary examination of the productive oil fields of California, with a view, first, to acquiring a knowledge of the general conditions of occurrence of petroleum in the State; and, second, to applying the laws that may be deduced from such resources to other portions of the Coast Range. The Director of the Survey has long recognized the paucity of knowledge relating to Coast Range geology, and in view of the fact that several of the formations of this region are oil-bearing he is now directing especial efforts to unraveling the intricate problems with which mining engineers, oil men, and others have to do in the prosecution of their professional and industrial work. A considerable number of topographic maps, covering the agricultural regions of southern California, have already been published—these with special reference to the water supply. Latterly other sheets of a similar nature, but covering more particularly the oil fields, both productive and prospective, have been prepared and are now in the hands of the engraver. Eventually it is proposed to cover the entire area of the Coast Range, the field work to be carried on as rapidly as the resources of the Survey will permit.

Recently a member of the Survey has made an extended preliminary examination of the more productive oil fields and the territory adjacent, and it is the intention to make public this information in a report to be issued in the latter part of this year. It is the Director's desire, in the preparation of this report, that it shall contain such facts as will be of especial service to those interested in the development of oil fields. The subject matter of the report will therefore embrace such maps of the Survey as are available, others more on the order of land surveys, which will serve a temporary purpose, sections of the formation and structural features encountered, and the text descriptive thereof.

It may be mentioned in passing that the Coast Range of California from a geological standpoint is as little known as many of the more inaccessible portions of the United States. Since the surveys of Whitney little attention has been given to this important mountain system, the Sierras, richly productive in gold and silver, having absorbed the principal efforts of the geologists, State as well as Governmental. In the prosecution of the surveys in the coast ranges the work has to be undertaken from the beginning, and many general problems of geology must be worked out before satisfactory conclusions may be drawn with regard to economical problems. As nearly as possible, however, these investigations will go hand in hand, for no one more fully recognizes the necessity for study of the mineral wealth of our country than the Director.

How's This.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

West & Tread, Wholesale Druggists, Toledo, O. WARDING, KINNAN & MARTIN, Wholesale Druggists, Toledo, O.
