

# Oakland Owl Hoots.

Jeff Medley and family and Harrison Manning and Miss Mary Bainbridge, started to the Coast Wednesday morning.

Mrs. V. L. Bogard and children, accompanied by Mrs. Bogard's father, Hon. J. T. Cooper of Kellogg, returned to Glendale Saturday evening.

A. H. Brown formerly of this place but now a resident of Ashland, passed through the city Tuesday evening on his way home after spending some time in Japan.

Mrs. P. C. Parker, of this city, left Monday morning for Marshfield, to visit her father, T. A. King, of that place. Before returning Mrs. Parker will visit San Francisco.

Those attending the teacher's examination this week from Oakland and vicinity are: Misses Grace Grubbe, Alice Larkins, Hattie Fisher, Jessie Walters, Erle Adams, Bessie Powell, Lola Gray and Ellen Prior.

Dr. Page and family visited Mr. and Mrs. Joe Winniford on the Lower Calapooia last Saturday and part of Sunday, and were accompanied home by Mrs. A. N. Orcutt who had been spending a few days at that place.

L. S. Dimmick, of Cottage Grove, visited Oakland and Wilbur, during the week.

Mrs. Daugherty and Mrs. C. Ross King and little daughter, went to Yoncalla Wednesday morning.

F. W. McKechnie and wife of Astoria, passed through this city Wednesday evening enroute to Umpqua Ferry.

Mrs. Coffey and daughter, Miss Ada, who have been visiting with Frank Hogan and family, have returned to their home at Drain.

J. P. Pichette and Miss Edith Spooner were married at the home of the bride's mother at Kellogg, Tuesday.

Mrs. A. F. Brown has gone to Tyee to spend a couple of weeks with relatives at that place.

E. G. Young & Co. expect to ship five car loads of cattle to Portland tomorrow evening.

Mrs. Robert Smith, of Yoncalla, and Mr. and Mrs. Elmer Smith of Pendleton, came to Oakland Wednesday to visit friends and relatives.

Mrs. R. P. Dear and son left on last night's overland for their home at Ione, Oregon, after spending some time with relatives here.

C. B. Marsters, and engineer from Denison, Texas, Mrs. Alva Marsters and Mrs. Patterson of Roseburg, and Miss Susie McWhirter of Green Castle, Indiana, spent Thursday in this city, the guests of Mr. and Mrs. S. M. Kelley.

L. H. Kruse and Mrs. Louisa Johnson were married at the residence of the bride in this city on Wednesday evening, Rev. M. M. Marshall officiating. The wedding was a very quiet affair, only a few friends being invited. This office as well as their many friends extend hearty congratulations.

We started in the field of Frank Hogan while threshing on his place this week. Had it not been for the help at hand his barn would have burned.

W. C. Underwood and H. F. Deardoff left Wednesday afternoon for a few days outing at Elk Meadows.

# Glendale News Notes.

Dick Vandervert and family arrived here this week from Prineville for a visit with their relatives, Mr. and Mrs. John Hobbs and Bud Moore and family.

Mrs. H. H. Nichols of Riddle and her four little girls, and Miss Laura Lady of Canyonville, were Glendale visitors Sunday, guests of Miss Genevieve Roberts.

Mr. Strode and his daughter, of Myrtle Creek, are stopping in town, for the purpose of receiving treatment for Miss Strode, who is affected with consumption.

A. S. Markee of Forest Grove is now assistant at the depot during day time. Agent Montgomery found more work than one man could do, and asked the company for an assistant, which was readily granted.

Mr. J. T. Cooper of Kellogg, this county, is visiting his daughter, Mrs. V. L. Bogard and family, and will remain here several weeks. The old gentleman is 82 years of age, and is bright and active yet as the average man of 65.

Archie Daugherty, aged 15 years, met with a painful accident at his home on Windy Creek one day this week. He was handling a 22-calibre rifle, when in some manner the gun accidentally went off, the bullet going through one of his feet.

A camping, hunting and fishing party composed of A. Marshall and family, Walter Smith and family, Frank Carlo and Wm. Neff, left Thursday for a week's outing at the Meadows, about 30 miles east of Glendale, on Upper Cow Creek.

Supt. W. S. Hasken of the Gold Bug mine was doing business in town Wednesday. It is welcome news to our people

to learn that this big gold producer—one of the best in the West—is about to resume operations again, after a shut-down of several months.

While at work at the saw mill on Windy Creek Tuesday, Pleas Jackson had the misfortune to get a splinter thrown with great force from the saw into his right eye, almost blinding him. Dr. Bowersox believes he will not lose the eye, however. The doctor made a trip to Merlin Sunday on professional business.

G. Frank Martin, of The Dalles, will visit his sisters here in September, Mrs. F. R. Miller and Mrs. A. Tlocum. Mr. Martin was raised from boyhood to manhood on the old Martin farm near Galesville. He left Glendale 17 years ago and is now coming back to visit the scenes of his childhood. He will find many changes here that will surprise him.

R. K. Montgomery and family have moved into their fine new residence, which is one of the largest and most convenient in town.

# THE SILO.

It is of Great Value to Dairyman if Correctly Built and Operated.

My seven years of experience have proved to me the great value of the silo, says W. B. Barney of Iowa. Round silos are best. Build them on a hill beside the barn, if possible, to decrease labor in handling ensilage. Use nothing but the best of material. They may be lathed and plastered at any time, if desired. The important point in filling is to tread the ensilage well while filling. Use twenty-five pails of water each noon, the same amount at night, and, when finished, pour on six or eight barrels in addition. About twelve tons of silage per acre can be raised under ordinary circumstances. I usually raise 125 acres of corn, and for my silo cut that which is not apt to mature in time to avoid injury from frost. I have tried the various varieties of corn designed especially for ensilage, but have not had as good success as with the ordinary field varieties. Were I planting my entire acreage for ensilage purposes I would make no change in seed or method of planting or cultivation, except to drop more kernels in each hill.

There is a difference in the digestive capacity and requirements of cattle, but for the ordinary cow forty pounds of ensilage, ten pounds of clover and timothy hay and four pounds of oats and bran would constitute a good ration, well balanced, for one day's feed. Ordinarily I cut corn for ensilage about a week before it is ready to shock. Some of my corn was frost-killed this year, but it made good ensilage. I used more water than usual on it, and this takes the place of the juices which are wanting. I would do the same thing when putting up drier corn.

There has been a shrinkage of late in the creameries in Iowa. Had the dairymen used silos these 200 creameries could have been kept open. The time is coming when sufficient ensilage will be raised to feed milking cows during the dry period of the summer. I have experimented with alfalfa a little of late. If we can succeed in raising it successfully here, we will have secured a feed of great value in milk production.

# A Fine Holstein-Friesian.

Queen Tet Maggie Clay has a record of 84.5 pounds of milk in one day. She is a sister to Triumph of America. Her owner is H. F. W. Brener, Charleston, S. C.

# An Effective Threat.

A youth was engaged as junior clerk by a firm of lawyers, and by way of filling in his time and testing his worth on his first day he was told to write a letter demanding payment of a debt from a client who was long in arrears. To the great surprise of his employers a check for the amount arrived the next day. They sent for the young clerk and asked him to produce a copy of the letter which had had such an astonishing result. The letter ran as follows:

Dear Sir—If you do not at once remit payment of the amount which you owe us, we will take steps that will amaze you.

Rhubarb is made more agreeable to the eye by preserving the crimson color of the raw stalks. Choose the reddest stalks and cook without peeling. Do not sweeten until it is taken from the fire. A tablespoonful of orange juice improves the flavor of rhubarb.

# LADIES TAKE A LOOK

Skirts-- We carry the Finest Line of Made-up Skirts in town, and our line of Underskirts cannot be equaled for quality and price

Our Spring and Summer Line of Clothing Embodies many special features that will interest you. The clothing that we sell from the Highest to the Lowest grade is in every case finely tailored and thoroughly dependable. We recommend it with confidence even though our prices are lower than any other store sell for the same quality. Also a new and up-to-date line of Ladies' and Gent's Neckwear.

# WISCONSIN DAIRY LAW.

Measure Adopted by Legislature to Prevent Sale of Insanitary Milk.

In order "to prevent the sale of unclean and insanitary milk and the use thereof in the manufacture of food products and to prohibit unclean and insanitary conditions of creameries, cheese factories and milk dealers' establishments or outfits" the Wisconsin legislature has passed and the Wisconsin governor has approved a law which reads as follows and is its own best commentary:

Section 1. Milk which shall be drawn from cows that are kept in barns or stalls which are not well lighted and ventilated or that are filthy from accumulation of animal refuse or from any other cause, or from cows that are themselves in a filthy condition, and milk in or from cans or other utensils that are not kept in a clean and sanitary condition, or milk to which has been added any unclean or insanitary foreign substance is hereby declared to be unclean and insanitary milk, provided that nothing in this act shall be construed to prohibit the sale of pasteurized milk or cream to which vitamin or sucrose of lime has been added solely for the purpose of restoring the viscosity if the same be distinctly labeled in such manner as to advise the purchaser of its true character.

Sec. 2. No person, firm or corporation shall knowingly offer or expose for sale or sell or deliver for sale or consumption or to any creamery or cheese factory or milk condensing factory or have in his possession with intent to sell any unclean or insanitary milk.

Sec. 3. No person, firm or corporation shall knowingly manufacture for sale any article of food from unclean or insanitary milk or from cream from the same.

Sec. 4. All premises and utensils employed for the manufacture or sale or offering for sale of food products from milk or cream from the same which shall not be kept in clean and good sanitary condition are hereby declared to be unclean and insanitary. Any city milk dealer or any person, firm or corporation furnishing milk or cream to such dealer or the employee of such milk dealer and any person, firm or corporation or the employee of such person, firm or corporation who operates a creamery, cheese factory or milk condensing factory or manufactures, reworks or packs butter for sale as a food product shall maintain his premises and utensils in a clean and sanitary condition.

Sec. 5. Any person, firm or corporation who receives any milk or cream in cans, bottles or vessels which have been transported over any railroad or boat line where such cans, bottles or vessels are to be returned shall cause the said cans, bottles or vessels to be emptied before the said milk or cream contained therein shall become sour and shall cause said cans, bottles and vessels to be immediately washed and thoroughly cleaned and aired.

Sec. 6. Whoever violates any provision of this act shall, upon conviction thereof, be punished by a fine of not less than \$25 nor more than \$100 for each and every offense and in default of payment thereof shall be imprisoned not less than thirty days nor more than sixty days.

# Water Shrews.

A pretty little animal, writes a correspondent, occasionally to be noticed at the edge of a stream or pond is the water shrew. The ways of these creatures are most fascinating. I have seen them quietly emerge from the grass, run down the side of the bank into and along the bottom of the stream. While under the water their movements are very rapid. They scrape away on the bottom with their feet, thrusting their long snouts into the mud and under stones and leaves in search of insects on which they feed. They then retire a little way up the bank for a moment or two to take breath and hurry back to their work once more. I have never seen water shrews dive. They simply run in and out of the stream, as if air and water were both alike to them, and they were equally at home in either element. When under the water, they look as if they were covered with minute silver pearls owing to the particles of air adhering to their furry bodies. Land and water shrews are not of the mouse tribe. They have the sharpest and most delicately beautiful teeth imaginable and live entirely on insect food.—London Opinion.
