Hon. Geo. C. Brownell, state senator from Clackamas county continously during the last twelve years and president of the senate in the last legislature, was in Eugene Thursday and Friday this week. He is brilliant, eloquent, of charming personality, and a prince of good fellows as true to his obligations and the interests of the people, as he understands them, as the needle is to the pole, and yet has been misrepresented and misunderstood and more unjustly criticised and assailed, without cause or provocation, by the press, than any other man in Oregon, with perhaps one or two exceptions, including present company, the writer of this. He has had more influence in shaping found their way through the routine the legislation of Oregon during the last few years than any other man, which is not saying very much for him, as the laws are remarkable for quantity rather than quality. Without his support and managementand he is the best political manager in the state-neither Mitchell nor Fulton would now be members of the United States Senate. He can be U. S. district attorney for Oregon or anything else that they can deliver, but he has a greater liking for the votes of people and for controlling public affairs than for a big salary in an office without influence, and he will probably continue to be re-elected state senator by big majorities, while other candidates on the same ticket are snowed under, and worry jealous rivals in the state senate and malicious or uninformed critics on the outside, until he is appointed to some higher position by the suffrage of the people.-Oregon State Journal.

"The Truth Shall liske You Free."

checquered experience of men and wise and convenient. That he may measures wrote the above words; counsel with the pastors, stimulate and the longer we live the more and arouse the people, calling Zion's actual beauty and strength do we see hosts to battle."

in them, and in their application to social, business, religious or political sense makes the receiver of truth to be free to accept or reject, to approve or condemn just as a man sees fit, and this brings us to the subject we have in view. The Editor received a letter on Wednesday morning in which these words occur: "If you are a republican, why have you assailed republican principles in writing up the land office affairs?" In answer to the statement, we enter a denial to the implied charge up land office affairs as a republican, we are upholding republican principles.

state: the republican party was built up because the principle of truth In the early part of the present in the utterance of the party platthat foundation because the truth This is not an infrequent condition spoken by orators or published by the listen to the truth and follow it.

And here we take occasion to

Presbyterian Revival of Religion.

At the meeting of the Presbyterian Synod of Oregon at Corvallis the following news dispatch shows that the warmness of the church at large.

"The Presbyterian church of Oregon is to make vigorous effort in the evangelistic line this year. Aggressive work in evangelizing is to be begun at once, and is to be carried forward diligently in all the churches of the denomination in the state. The keynote of the plan was sounded in the sermon of Dr. Hill at the opening of the session and the theme was renewed yesterday afternoon in addresses of similar character by Dr. McIntosh and Dr. Hill.

"This forenoon the theme again injected itself into the proceedings, being suggested incidently from the contents of various reports that business. The renewed agitation has infused itself into all the commissioners at the synod, and the partial expression was given by the body at 11 this morning by the adoption of the following resolution, which went through without debate, and by an

"Resolved, That it is a profound conviction of this synod that the spiritual necessities of our state are such as to compel us, knowing the conditions and necessities thoroughly, to ask the services of Rev. J. Wilbur

Chapman for six weeks that he may visit as many churches as possible chiefly to arouse, direct and intstruct both pastors and people to immediate and intense action, to fervent and importunate prayer.

"That in view of the imperative spiritual need of the people in our great state, synod respectfully request the session of the First Presbyterian Church of Portland that they permit their pastor, whose influence in our synod is so highly appreciated,

in them, and in their application to the affairs of life for the telling of truth and proclaiming it in either a

ONE THOUSAND ACRES OF LAND HAS BEEN LEASED.

BRITISH CAPITAL IS COING TO DEVELOPE THE COAL FIELDS LYING NORTH-WEST OF THE CITY.

Yesterday a twenty-five year lease and option to purchase was granted by G. W. Jones to two Englishmen from Fernie, B. C. We are under obligations not to give their names, but one of them is a director and the other the secretary of the Canadian Pacific Coal Company, and there are millions of dollars behind this Company, as it is considered one of the strongest Coal Company's in British, North America.

It has been known for the past thirty years that the land which is a mountain lying north of the South Umpqua river, has several stratas of a very superior article of lignite coal and after securing the lease on the land the parties interested gave out the news that it was the intention to commence operations and form a Coal Company, selling the stock in England and the total output of the mines would be either sold to the Southern Pacific Railroad or shipped out. That there is abundance of coal in the territory indicated there can be no doubt, for when Colonel Buick was the editor of the PLAINDEALER, he used coal from the out croppings of the stratas or coal measures in this office instead of wood but the difficulty in crossing the river and other causes led to the mine being forgotten until these two gentlemen prospecting for coal re-discovered the ledges which are said to be from three to seven feet thick. That there has been an abundance of coal in the country around Roseburg is proven by the fact that underneath the stratas of iron ore and shale is generally found a thin layer of ashes and that the iron bearing rock foundations show no evidence of volcanic action except in the upheaval of a recent period of time. That where the iron bearing rocks appear on the surface or even in the bed of the South Umpqua river it is clearly evident that the coal measurers have burned with such intense heat that all the vegetable matter was burned out of the earth leaving an almost pure iron formation that bubbled by reason of the fervent heat underneath

Much of the land around Roseburg is identical in formation to the Russian territory between the Caspian and Black Seas; and in that territory is found iron, coal and petroleum. Iron in paying quantities or quality is only found where the coal measures have burned out and where there is no iron ore there is an abundance of coal. Around Roseburg we find identically the same physical conditions and if coal is developed in paying quantity and quality Roseburg will in a few years be a second Pittsburg, for we have right in the city a mountain of iron ore assaying from 25 to 80 per cent. The government geological survey locates vast coal fields within 40 miles to the west of Roseburg and there is an abundance of coal found in the Cleveland and Looking Glass country about S miles west of Roseburg and all that is required to develop and make Roseburg the second city in Oregon is capital, to develop the coal fields surrounding the town. Let us give these men the glad hand and boom their project and shout 'Rah for Roseburg and the coal fields.
