baccassasad CATECHISM FOR CORN GROWERS

Pertinent Questions That Every Farmer Ought to Study.

Goin' to plant any corn this spring? Test every ear; that's no great job. What does the seed for one acre cost! About 28% cents at \$2 per bushel. Now is the time to sprout kernels

from the seed corn you intend to use. "Is it worth while?" It's worth \$100 to \$1000 when you figure the balance

sheet for the year. How much difference does it make That's a long story ; some hints of the

answer are given below. How do you know? There is only one sure way, and that is to test th germinating power of the corn.

The value of every day's work don time intelligently spent in selecting the need

How much of your seed corn will grow? Only as much as will germinate and perhaps little more than will germinate vigorously.

What's the use? It's the use of several hundred dollars; you don't have to grow more than 100 acres of corn for it to be the use of \$400 or \$500.

What disadvantage is there in securing fine seed corn and making sure it is of high germinating strength? It makes the husking a bigger job.

How many bushels of the crop will one bushel of seed influence? Any except to find their feed. They will be It would seem a strange thing if the where from 200 to 700 bushels; at fifty bushels per acre it influences 350 bushel. The best seed corn at \$2 or \$5 a bushel is several times cheaper than poor or uncertain corn as a gift. There are more elements than one in economy.

Will your seed corn grow if given a chance? Yes, if the germ is alive and healthy; no, if the germ is dead ; maybe so and maybe not, if the germ is weak.

There is plenty of time now to attend furnish the germinal, and is not given to this, and to get good seed if yours to making improvements. When Supt. should not be confused with offers of proves too low in vitality. Will it be Stimson the pomology department of attended to? After awhile it will be too the World's Fair says: "There is no late

ford to be uncertain about it.

corn of the previous year, your own "Apples elevate the morals of persons than worthless; it is absolutely dangercorn or that bought from a seed dealer, who eat them and if the United States ons. be sure that it will grow-by planting were a greater apple-eating country we some of it now and seeing whether it should have less crime and fewer woes. Buffalo, N. Y., Dr. Pierce, assisted by does grow.

some good louse powder. Don't let them get lousy. The Farmers' Advocate says: "The goose no longer has the distinction of

being the only fowl that can lay a golden egg. It is the hen that is engaged in that pustime these days." A light, sandy or gravelly soil is best

for a poultry farm. Land that has good natural drainage towards the south. People who desire to obtain decent in-

comes from poultry farms must be sure

keep laying stock much over the second up in arms at the faintest hint of examyear. This item will be disputed by ination, and she finds excuse to put the people who believe they know some thing about the business, whereas they

only think they know. A writer in the Canadian Poultry News says that few farmers realize that the cost of a setting of pure blood eggs is very often no more than the selling

price of three or four scrub chickens, poultry buyer, will usually bring sev-

eral times the original cost of eggs. Still better returns can be gained by letting your neighbors have extra males at a small advance on market prices. The Western Foultry World says that

it will not cost more than one-half as much to properly house a pair pigeons of as a pair of hens. A barn loft, gable, or, in fact, any out-of-the-way place where you cannot keep anything else,

will make a home for Mr. Pigeon and his wife, with which they fall in love and from which they will never wander another period of suffering.

Apples as a Moral Influence.

.Scarcely too much can the apple be

The Timber and Homestead Bill.

A special dispatch from Washington If you want furnished rooms last Thursday said : The House committee on public lands

ing the timber and stone act and au- If you want to move a house

ommittee is overwhelmingly opposed to repealing the timber and stone act, and an adverse report is looked for which will mean no remedial land legis-

lation this session. A month ago there was a possibility that the House committee might report

this bill, although a deal had been made between the Senate committee and the eading members of the House committee to quash the measure and prevent it getting before the House. At that time, it is said a majority of the members of the House committee favored the bill and stood ready to report it, if

There has been great reversal of senti ment, however, due to the admissions made by George H. Maxwell, president it to our children. We have used other of the National Irrigation Association. During the hearing on the bill he told never found anything to equal Chamthe committee that transcontinental railroads and large holders of scrip had been contributing \$50,000 annually to naintain his association, and that these

ontributors looked to the organization to exert itself to secure the repeal of the timber and stone, desert land and home stead commutation laws.

stead commutation laws. This admission has been generally taken by members of the House to near that these scripholders have been mean that these scripholders have been making systematic attempts to secure eg slation which would compel persons seeking timberlands and large holdings purchase blocks of scrip. In other words, members generally believe that the agitation for land reform is instigated entirely by the railroads and scripholders with a view to increasing the value of their lands and providing a ready market for them. So strong has become th's belief that all chance of passing the Senate bill through the House, even if it could be reported, has

been destroyed. Chairman Lacey, Representative Mondell and other promisent and influential members of the House committee are determined that the Senate bill shall not be reported, and their influence is such as to prevent action at this session even though adverse sentiment had not 124 Third Street grown up as a result of Maxwell's ad-

or how much it costs.

The time and money and labor and sweat and weather and soil are going to be the same in raising a crop of corn, whether the seed is good or poor, but the single item of seed selection may change the results or the returns from all these elements in making the crop.

How many days of toil in preparing the ground, cultivating and harvesting the crop are influenced by the few days or hours spent in selecting the seed? It isn't hard to figure; just add up the island," but of a good part of the rest number of days' work you and your hands spent during the year on the corn crop and compare it with the time you spent in selecting the seed.

What is the relation between the investment and the returns in the produce from a bushel of seed corn? The value of the crop is from 40 to 140 times the value of the seed, and may easily be seventy times. In quantity the crop is 200 to 700 times that of the seed with the chances easy for its being 350 times.

The above is from the Bloomington Pantagraph, which is published where they know something about corn growing.

Poultry Notes of Interest.

Have you whitewashed that hen house this month? If not, you should do so. Remember the early bird gets the worm.
