 Vetch is getting to be one of the most profitable of all crops raised in the Willamette valley. The profit lies not only in the fact of the immense yield and wonderful feed value as forage, but for its mechanical action on the soil and fertilizing properties. The large number of roots put the soil in very fine condition for cultivation, and its well known ability to secure nitrogen from the air, makes it a plant that should be on every farm in the valley.—Pacific Farmer.
