industry and furnish employment for labor. The purpose is to make a home market for the product of American labor. The Dingley tariff, for instance, levies 10 per cent on cut diamonds, and admits uncut diamonds free. Of course the duty of 10 per cent on cut diamonds increases their price. What is the result? We have 2,000 men in the United States today cutting diamonds, making from \$20 to \$30 per day. The diamondcutters spend their \$10,000,000 or \$15,-000,000 annual wages in one way or annother. I assume that they, like every one else, spend, in one way or another, most of their income. They may spend it in the purchase of homes, of furniture, or a horse and buggy, and they certainly spend some of it for food and clothes. In so doing they furnish em ployment for other toilers."

FAVORS HOME MARKET.

"The Republican party believes in home market. It believes in wages sufficiently high to enable our people to eat three meals per day, sleep between heets and place a roof, rented or owned, over the babies. In this it has ever been successful. In proof of this I cite the fact, well established by the records. that the American people consume onefourth of the cotton fiber of the world. One-twentieth of the people of the world

The 60 principal commercial countries of the world export \$10,000,000,000 other per annum. Our domestic frade of the world. I submit that this is worth looking after.
