### They Appeal to Our Sympathies

The bilious and dyspeptic are constant sufferers and appeal to our sympathies. There is not one of them, however, who may not be brought back to health and happiness by the use of Chamberlain's Stomach and Liver Tablets. These tablets invigorate the stomach and liver and strengthen the digestion. They also regulate the bowels. For sale by A. C. Marsters & Co.

## VARIATION IN THE TESTING OF CREAM

Some recent experiments with hand separators at the Michigan Agricultural College, show very conclusively the readiness with which the test of cream may be made to vary under different conditions. The speed of separator bowl, the rate of inflow, richness of milk and temperature of milk, all tend to vary the test of the cream, and the following tables show very nicely that the creameryman is not always to blame if the test does not run uniform from time to time. In these experiments at the college, the actual results of which are shown below, the same milk was divided into different lots and each lot of milk was sent through the machine under the conditions shown:

### EXPERIMENT I.

Variations of fat in cream due to variation in speed of separator:  
Machine No. 1, revolutions of crank per min. 48, cream test 47 per cent.  
Machine No. 1, revolutions of crank per min. 38, cream test 42 per cent.  
Machine No. 2, revolutions of crank per min. 55, cream test 32 per cent.  
Machine No. 2, revolutions of crank per min. 45, cream test 28 per cent.

### EXPERIMENT II.

Variation due to variation in rate of inflow:  
Machine No. 1, 480 lbs. per hour, cream test 46 per cent.  
Machine No. 1, 390 lbs. per hour, cream test 60 per cent.  
Machine No. 2, 525 lbs. per hour, cream test 31 per cent.  
Machine No. 2, 390 lbs. per hour, cream test 36 per cent.

### EXPERIMENT III.

Variation due to varying richness of milk:  
Machine No. 1, milk test 4 per cent, cream test 47 per cent.  
Machine No. 1, milk test 3 per cent, cream test 42 per cent.  
Machine No. 2, milk test 3.6 per cent, cream test 32 per cent.  
Machine No. 2, milk test 3 per cent, cream test 26 per cent.

### EXPERIMENT IV.

Variation due to varying temperature of milk:  
Machine No. 1, milk at 80 deg. cream test 48 per cent.  
Machine No. 1, milk at 140 deg. cream test 42 per cent.  
Machine No. 2, milk at 80 deg. cream test 32 per cent.  
Machine No. 2, milk at 130 deg. cream test 30 per cent.  
In experiment I the same lot of milk

was divided into four lots and each lot was run through the machine at different speeds. In experiment II milk which was the same as that used in experiment I was run through with different rates of inflow into the bowl. In experiment III, however, different lots of milk were used, while in IV the milk was the same as in I and II, so that the results show the difference of running the same milk under various conditions.

A careful study of these tables by dairymen who ship cream, will show to them how easily the percentage of fat in the cream may vary and within wide limits, too. As will be seen, a variation in the speed of but seven revolutions per minute caused a difference of five per cent fat. By running 120 pounds less milk per hour through the machine, the test was raised 14 per cent. Between separating 3.6 per cent and 3 per cent milk there was a difference of 6 per cent in the test of the resulting cream and a difference of 60 degrees in the temperature of the same lot of milk being separated caused a variation of 6 per cent in the test of the cream.

As it is very difficult to get these conditions alike every day the cream shipping patron should look for a difference in the butter fat content of the cream, and should not blame the creamery for the variations that occur.

In this connection it is well to say a few words regarding the advisability of skimming a thick cream. If a thin cream is skimmed, say for example a 25 per cent cream, it will take just twice as many cans to ship it in as if tested 45 or 50 per cent, and the express charges will be double in the former case. Now this is quite an item to the dairyman who ships any amount of cream. The butter fat is the only part of the cream that he gets paid for, so it is to his advantage to ship this in as concentrated a form as possible.

Aside from this thick cream possesses better keeping quality, not souring as quickly as the thinner cream. When the cream is thin it soon sours and the coagulated curd greatly interferes with the accurate testing of the cream thus creating a possibility of loss through an incorrect test to the patron who ships a thin cream. In order to save express charges and to insure the keeping quality of the cream, skim so that it will test from 35 to 45 per cent, for it will mean a large sum of money in your pocket in the course of the year.

W. R. Vinson was in to spend Saturday and Sunday with his sick son, Ralph Vinson, who came to this city from Cleveland to attend the Roseburg public school, but who has been ill with typhoid fever for some days, but who is now much better.

## RULES GOVERNING SOLDIERS' HOME

Governor Chamberlain visited the soldiers' home at Roseburg a few days ago and investigated the cottage system for the keeping of soldiers' wives with their husbands, says the Statesman of Salem. After consulting with the officers and with prominent Grand Army and Relief Corps officers, he formulated the following rules, which will be promulgated at once:

"Whereas, the act of 1905 appropriating money for the erection of cottages on the grounds of the state of Oregon at the soldiers' home at Roseburg provides said cottages are to be occupied by the inmates of the home and their wives, and

"Whereas, eight cottages are now ready for occupancy by soldiers who are otherwise eligible for admission and their wives, and it is necessary to provide rules governing the admission of wives of inmates of the home or of those who may hereafter be admitted, therefore,

"I, Geo. E. Chamberlain, as governor of the state and as special commissioner under the said act of 1905, to carry out the provisions thereof, with the advice and upon the suggestion of T. E. Hills, department commander of the Grand Army of the Republic, and Mrs. Jennie B. Harding, department president of the Woman's Relief Corps, do this 10th day of November, 1905, promulgate the following rules:

"One—The application for the admission of the wife of such inmate or of the soldier who may hereafter become such inmate, must be accompanied by satisfactory proof of marriage. No wife of a soldier having married subsequent to June 27, 1890, can be admitted unless she was, previous to the last named date the wife of a soldier.

"Two—The commandant of the home subject to the approval of the governor, shall be sole judge as to the qualifications of applicants for admission and may act favorably upon such application or reject the same as in his judgment may seem best calculated to preserve the good order and discipline of the home.

### Coos Bay Option

I hold an option for 30 days more on valuable Coos Bay peninsula property, at \$100 per acre. Adjoining acreage has sold for \$125 per acre. Can't handle all under the option time and wish some one to take 1/2 of 40 acres tract. Particulars address R. E. M., 110 Wash., St. Spokane, Wash.

"Three—Occupants of said cottages shall be subject to all the rules and regulations that are provided for the government of the home, and the power is vested in the commandant to honorably or otherwise discharge such inmates and require them to vacate said cottages, when in his judgment the best interests of the home and its inmates may seem to require.

"Four—Rules and regulations for the admission of soldiers to the home are in no wise to be changed or modified by the promulgation of these rules."

## STRANGE ADVICE BY POLITICAL MAN

The following is floating around Eastern Oregon:

"The populace of Rabbitville has just held a mass meeting and every voter in the precinct was present, republicans, democrats, populists and methodists; says the Irrigon Irrigator's correspondent. A lot of business was did, but the most prominent was the ratifying of yewnamious votes of these here specifications. To Mr. Senator Mitchell and Mr. Congressman Williamson, to whit; Werraras and Wearfore jewries of your feller peers has denounced you both as guilty as the other and mebbe moreso, Mitchell bein' the kyte and Williamson bein' the tale, and both of you flyin' too high, and not havin' dew respect for Uncle Sam's farms and lettin' of 'em be grafted; and Mr. Congressman Binger Hermann bein' dead anyhow and jest walkin' around to beat a graveyard, and standin' non compus mentus with the government; Now, we-all, the citizens of Rabbitville, in the County of Morrow and State of Oregon, ss. don't nukkie down and beg you to resine for you ain't got nothin to resine, but you jare in our way, and we ask you all to immejtit, or as much speedier as you kin git a move on, to go, single and sevrul, about a hundred and 50 miles out in the Specific Ocean and drown yourself dead, dead, and may God have mercy on your miserable soles, world without end, Amen.

Remember that our leading tailor, J. A. McDougal, is still on deck, with a fine line of the best samples the market produces. He is ready to put up suits to please the most fastidious. He is second to none on the Pacific Coast as a fitter and maker, and his staff of workmen cannot be excelled. You would do well to call early and leave your order. Remember, what fits well, wears well. Cravenette overcoatings in many different shades. 88-1f.  
"Enameled Ware beyond compare", Stransky Ware. 88-7f.

Wm. M. PONTAK, Camas Vallen, Ore, 225 11ec s. w. from Roseburg via Myrtle Point

Sick headache is caused by a disordered condition of the stomach and is quickly cured by Chamberlain's Stomach and Liver Tablets. For sale by A. C. Marsters & Co.

### The Daily News of Denver,

on December 29, 1896, says: "It is rarely, indeed, that Denver is favored with such vocal execution and instrumental as well. When it is said that the work of the Quartette is beyond criticism and the other performances the work of professionals, the truth is told. It was a rare privilege, thoroughly appreciated by the audience, to listen to the wonderful voices of the Quartette in their harmonious blending and surprising range, and there was not a number on the program but secured an encore." You can enjoy the same treat that Denver did at the Opera House on November 2nd.

### Cured Consumption.

Mrs. W. B. Evans, Clearwater, Kas., writes: "My husband lay sick for three months. The doctors said that he had quick consumption. We procured a bottle of Ballard's Horehound Syrup and it cured him. That was six years ago. Since then we have always kept a bottle in the house. We cannot do without it. For coughs and colds it has no equal." 25c, 50c and \$1. Sold by A. C. Marsters & Co.

# THE STORE WITHOUT A RIVAL

McCall's Bazaar Patterns, 10c and 15c.

# FISHER & BELLOWES COMPANY

New Lace Stocks & Fancy Neckwear for Ladies
