perintendent, H. P. Crooke - Salem Schools-Hints to Teachers.

This school opened at the beginning of the school year with a fair number of pupils, and school year with a fair number of pupils. has gradually increased until it now numbers upwards of seventy in regular attendance. Mr. A. W. Lockart, who taught the two previous years, still holds his position as principal, assisted by Miss Mary Jory, a graduate of Willamette University. They both possess excellent qualities as teachers, and under their management the school is progressing finely. Among other classes examined was one in practical arithmetic, composed of pupils whose ages ranged from ten to diffeen years and who had been instructed as far as decimal fractions, inclusive. Examples were readily solved and the most difficult decimals written with the great- It is a 10-horse separator with a 6-horse cylinmost difficult decimals written with the greatest case and rapidity, proving that the pupils der, but an 8 or 10-horse cylinder can be instructed. Splendid order is they had been instructed. Splendid order is and has sixty short teeth in it 14 inches long.

These beaters in new feature to American many than the strength of the stren is of great benefit to the school.

NORTH SALEM. Out of about one hundred pupils whose names have been enrolled in this school, there are about pinety in regular attendance. Mr. Howard G. Morris is still doing extraordinary good work, considering the number of young minds he has to deal with. Mr. M. has that peculiar talent for teaching very young pupils seldem found among male teachers. Miss Netlie Taylor, the assistant, is a teacher of long experience, and is giving general satisfaction. It is not necessary for us to say, that with teachers so well-qualified the school is in excellent

Mr. J. T. Gregg, the principal in this depart, ment, has proven himself to be a teacher of no imparting instruction to others and of maintain ing good order in the school room. Mr. G. was chosen by the Board of directors at the beginning of the present year, City School Superintendent and we know of no one who has more faithfully performed his duty. His endeavors are, to raise the standard of public schools o Salem and place them on a footing equal to the schools of other places with the same facilities. The school numbers fifty-eight in actual attend-

Has charge of the lower department in this building. An hour was spent very profitably and pleasantly in hearing Miss W. taking her classes over a review of what they had previously studied. The pupils usually answered promptly and correctly which suggested thoroughness to be the principal object of the teacher. ten answers to an examination in arithmeti were very neatly and correctly executed. Eighty pupils are in regular attendance in this departent, making the government exceedingly laborious for one teacher. There are twenty-one borious for one teacher. There are twenty-one classes to be heard daily, nine of which is heard by Miss Raymond, the assistant for both the ble feature of the fan-mill is that grain imperto be unfortunate in the way of fires, as several upper and lower rooms. leaving twelve to be card by Miss Watt, this only gives about minutes to each class. could be accomplished in a reading class of 30 could be accomplished in a reading class of 30 s another of Mr. Pelton's happy inventions pupils in that time? The classes in both the and has the peculiarity of never choking up upper and lower rooms require a longer time for recitation than is required in the primary schools, in order that the pupil may have the who will move his family to Salem immediately, prompted a visit to the studio of our young. full benefit of instruction. One assistant is where he will commence the construction of va-self and home built artist, Mr. Wm. Parrott, and fit; but still there is too much left for the teachers to accomplish especially in the lower room. We believe that money could be no otter expended than to employ an assistant for each room, and introduce the elements of algebra and book-keeping in the upper room, and still more than this if necessary,

CENTRAL SALEM. The higher department of this place is being taught by Mrs. Adair, late of Ohio, where she had previously taught for a number of years. Mrs. A. has introduced many new methods of instructing and governing. It is just as necesseary for the good teacher to be inventing new plans of hearing recitations as it is for the carsenter to replace his old tools with new ones A successful toucher most have a full share of idividuality. His plans and his methods mus be his own, and his success must be in the path of of his own peculiarines. Let him pass our langer of becoming a failure. The methodand analyses of yesterday will not answer for to-day, for new discoveries have developed new systems of combination, and the constant dovel opment of the mind brings to light new meth of presentation, and the teacher who cannot or will not keep pace with the spirit of the time must stay in the rule and lessilize. Mrs. Adair is certainly doing good work in this respect an is succeeding admirably with her school.

MRS. NELLEE CURL, Touches in the lower room and has under be control upwards of fifty pupils. Mrs. C. is earn estly engaged in fact work and weres to be zeal ously devoted to the selvancement of her pupils We notice a way great improvement since ou last visit, and think it will now compare favor ably with those of other grades. We believ tardiness is less frequent in all the schools, an a more regular attendance is noticeable this ear than there was last, and we believe the schools are in botter condition in many respects The one great need is a large building where almay assemble in their different departments, in stend of having to separate at home to go to different parts of the city, there to remain all day cooped up in a small room filled to its utmos

PRIMARY DEPARTMENT. This school of "hade folia" is by no meens the least importance, but on the contrary it deserves, by far, the most consideration. Here it is that the young mind receives its first impressions. Here it is that the foundation is menced for the future men and women. than that of higher grows. Have we a teacher that is capable of taking this responsibility? Patrons, we ask you to visit this school, especi ally this one, and also the other schools, and we think you will readily seem respect.
up to the standard in every respect.
H. P. Chooke. think you will readily decide with us that it is School Supt. Marion County. Salem, Nov. 13th. 1875.

HOME INDUSTRY. Manufactory of Valuable Threshers and Separators to be Started in Salem

At the Sash and Door Factory of Boothby & chine, which, at first sight, would be taken for anything else save what it is intended forthreshing and separating grain. The owner of who, recently, lived in San Jose, California, but Works at Trenton, New Jersey, at which place

PELTON'S PATENT SEPARATOR For such is the name of this machine) was The Oregon Steamship Company's steamer first patented and made for public use. After- Ajax left Portland yesterday afternoon at 2 wards Mr. Pelton moved to Maryland where a o'clock, with the following large number of these machines were made and THE THRESHER.

observed in passing to and from regitations. An These beaters (a new feature to American maorgan has been procured by the teachers, which chines) are constructed by putting a bar of MS Mahoney, of a common iron bar, and a beater plate, three inches wide, is then put on the face of the beater. The beater is the common English method of waking the common in the common method of making thresing cylinders. In this machine Mr. Pelton has combined the English J B Powell, machine Mr. Pelton has combined the English beater system and the short American spike Mrs Geo Cook, style, using, however, only one-third of the F C Hauber, spike surface used in American machines, but Ches A Hauber, the same beater surface is used as in English Miss Alice Hauber, machines. One beater is used to each horse. Wm Kuss, Louis Sohns, The concave of this machine is so adjusted as to feed under the cylinder or against the breast of the teeth. The teeth vary from a fluted conordinary ability. He has a superior faculty of equal facility either dry or wet grain, using the world but what it was incendiarism. About 2

perfectly cleaned passes into a drag elevator and years ago he had a large barn destroyed and sus-

arator, or to be sold separately. CAPACITY AND COST OF THESE SEPARATORS. In rating his machines, Mr. P. never aims to

raved by from ten to fifteen horses. The say, that, its equal is not readily, if ever pro-probable cost of the machine will be about \$600 duced, in that short space of time, that the or \$700. Its capacity is rated at two-thirds of young artist devoted to this-permit me to say the California machine, which we notice below. A size smaller will cost about \$400 cr \$500. Its capacity will be about one hundred and wenty-five bushels per hour.

The smallest size will cost \$300 or more, and one a capacity of from sixty to seventy bushels per hour, taking from two to four horses to operate it. According to this statement, the smallest sized Pelton Separator is equal to a 10-lagree power Pitts.

The foliage in the foreground, the ever green fir and moss-covered oak so splendidly blended, that the looker-on is forcibly reminded, of the chief of the art, Micheal Angelo, while on the horse power Pitts.

WE CAN OKLY ADD The following letter from one of California's -parator in connection with a Case thresher. fter the thresher had been remodelled in Mr. 's hands. It speaks for itself: JACINTO, Colusa County,

August 10th, 1874. our work, which gave us a late start. We oved and set the machine twice during the try a work. Our main driving bel broke once. as work. Our main driving bel broke once, which caused some delay, and we stopped one our for dinner. At 7 p. M, we had threshed 504 sacks of wheat, that averaged 138 78s making 6.758 bushels. The grain was threshed from the field. The work was done in he most perfect manner. he most perfect manner, no broken or racked wheat, and the entire waste would out amount to 1000s. during the day's work. The machine was not worked to its full capacity ept occasionally, for a few minutes at a time The average speed during the day was about 10 unshels per minute. The full capacity of your separator is fully one-third more than that amount. Our common days work is about 1. 700 sacks, but we are increasing our average as the hands get more accustomed to the work. I cogard your separator as the greatest achievement of the age in agricultural machines, and he invention long called for; something that ill thresh our large crops with dispatch and

ave it. I shall ever be happy to aid you in making known the superior merits of your in-valuable invention. Yours, truly, GEO. W. HOAG. When and Where Did He Land?

Price For Praise Meetings

BY

DR DOHERTY'S Large and Steadily Increase ing Practice, which has constantly kept pace with the unexampled increase and steady growth of the Pacific Const, induced his removal from his long established and well-known quarters, on the corner of Sacramento and Leidesdorff streets, in this city, to more commodious and eligibly located a partiments, at No.649 Clay Street, where he has a spacious suite of hundromely-fitted up and conveniently avranged Examination and Consultation Rooms, (occupying the whole of the two upper stories) which patients may at all times visit and only see the Doctor and his assistants.

With the most grateful sentiments of regard for the liberal patronage bestowed on him for the past thirteen years, at his old office, DR. DOHERTY

Desires to inform the General Public, and especially all those laboring under all torms of Chronic Complaints, that he can be consulted at 649 Clay street, on every variety of Disease of the Lungs, Liver, Kidneys, Digestive and Genito-Urinary Orga s, and all SPECIAL DISEASES,

SPECIAL DISEASES.

Of which the list is numerous, and which are more closely connected with the general health than the majority of people are aware. Unhappy invalids for years persist in concealing their condition from a motive originating in mistaken delicacy, and suffer in silence until their miseries become too acute to be repressed, or have assumed a form that renders heating both difficult and expensive. This latter type of affliction manifests itself in the complaint professionally known as Syphilis, in all its forms and singes; Seminal Weakness, and all the distressing forms of Self-Abuse, or Guanism; Gonorrheza, Gleet, Stricture; Nocturnal and Diurnal Emissions, Sexual bebillity, Diseases of the Back and Loins, Inflammation of the Bladder and Kidneys, etc., etc. The number of persons suffering from these horrible Diseases, in whom the Dector has effected a radical cure, can be counted by the thousand, and the voluntary certificates in his possession, received from persons he has relieded, are enough to satisfy all that the Dector's skill in the treatment of these affections, enables him to cure all curable cases, and in every instance give relied. Diseases which formerly laffled the medical skill of the most learned and experienced Practificners of the healing art, and were regarded by the majority of I hyst.cinns as utterly incurable, now yield to modera remedies, when prescribed by the intelligent Practificner, who makes the human system, and these special ail ments, his constant study and satisfect of observation.

In no case is publicity permitted except at the

sal ments, his constant study and subject of observation.

In no case is publicity permitted except at the express wish of the patient; and the Doctor confidently trusts that his long experience and successful practice will continue to insure him a liberal share of public patronage. By the practice of many years in Europe and the United States, he is enabled to apply the most efficient and successful rumedles against diseases of all kinds.

He curse without mercury, charges moderate test, treats his patients in a correct and honorable way, and has references of unquestionable verneity, from men of know respectability and high standing in society. All rersons who may consult him by letter or otherwise, will receive the best and gentlest treatment.

itt, from men of know respectability and high standing in society. All reversors who may consult him by letter or otherwise, will receive the best and gentlest treatment.

To Females.

When a female as afflicted with disease, as weakness of the back and limbs, path in the head, dimness of sight, loss of muscular power, palpitation of the heart, Irritability, nervousness, derangement of diseases of the worth, where a sterility, and all diseases of the worth, hysteria, sterility, and all other diseases peculiar to females, she should goor write at once to DR. W. K. IOHERTY, at its Medical Institute, and she will receive every possible relief and help.

Let no false delicacy severent you, but apply immediately, and save yourselffrom painful suffering and premature death.

To Correspondents.

Pattents (male or female) restiting in any part of the sum of the complaint by of ther of the San Francisco quacks.

Cured at Home.

P. S. -The Doctor will send his pamphlet on Special Diseases, to any address on receipt of six cents in postage stamps, for return postage, may 23 14.

Sheriff's Sale. BY VIRTUE OF AN EXECUTION, ISSUED

T VIRTUE OF AN EXECUTION, ISSUED out of the Honorable Circuit Court of the State of Oregon, for the county of Marion, on the 22d day of October, 1875, in favor of A. F. Chase, plaintiff, and against Henry Sloper and Rebecca Sloper, his wife, defendants, for the sum of twenty-two hundred and fourty-four and 48,160 dollars U. S. gold coin, and costs and disbursements, taxed at \$39.85, together with interest from the date of said decree at the rate of ten per, cent and accruing cases, I have levied upon and will sell at public auction, on Saturday, the 4th day of December, 1875, at two o'clock P. DR. A. B. SPINNEY,

POND'S EXTRACT—The great Vegetable Pals Destroyer. Has been in use over thirty years, and for cleanliness and prompt carative virtues cannot be excelled.

CHIDRIN.—No family can afford to be without Pond's Extract. Accidents, Bruises, Contusions, Cuts, Sprains, are relieved almost instantly by external application. Promptly relieves pains or Burns, Scalds, Excertations. Chaffings. Old Sores, Boils, Felons, Corns, etc. Arrests inflamation, reduces swellings, stops bleeding, removes discolorations and heals rapidly.

FEMALE WEARNESSES.—It always relieves pain in the back and ions, fullness and pressing pain in the head, nansea, vertige.

in the back and loins, fullness and pressing pain in the head, nanese, vertige.

| ILUGORRHEA it has no equal. All kinds of ulcerations to which ladies are subject are promptly cured. Fuller details in book accompanying each bottle.

| PRES-blind or bleeding—meet prompt relief and ready cure. No case, however chronic or obstinate, can long resist its regniar use.

| VARIGUSE VEINS. It is the only sure cure for this distressing and dangerous condition. this distressing and dangerous condition.

KIDNEY DISEASES.—It has no equal for perma-

AIDNEY DISEASES.—It has no equal for permanent cure.

BIEFDINE from any cause. For this is a specific. It has saved hundreds of lives when all other remedies failed to arrest bleeding from mose, stomach, lungs, and elsewhere.

REUMATISM. REURALGIA. Toothache and Earache are all alike relieved, and often permanently cured.

PHYSICIANS of all schools who are acquainted with Pond's Extract of Which Hazel recommend it in their practice. We have letters of commendation from hundreds of Physicians, many of whom order it for use in their own practice. In addition to the foregoing, they order its use for Swellings of all kinds, Quinsy, Sore Thront, Inflamed Tonsils, simple and chrome Dinarhom. Catarrh, for which it as specific, Chilbinins, Frosted Feet, Stings of insects, Mosquitoes, etc., Chapped Hands, Face, and indeed all manner of skin diseases.

nii manner of skin diseases.

ILET USE. — Removes Sovenesse, Roughnesse, and Satarting; heals Cuts, Eruptions, and Pimples. It review, intigerates, and refreshes, while wonderfully improving the Compileration. Complexion.
To ARMERS. -Pond's Extract. No Stock To FARMERS.—Pond's Extract. No Stock Breeder, no Livery Man can afford to be without it. It is used by all the Leading Livery Stables, Street Railroads and first Horsemen in New York City. It has no equal for Sprains, Harness or Saddle Chaffings, Stiffness, Scratches, Swellings, Cuts. Lacerations, Bleeding, Pneumonin, Colic, Dinrrhea, Chills, Colds, etc. Its range of action is wide, and the relief it affords is so prompt that it is invaluable in every Farm-yard as well as in every Farm-house. Let it be tried once, and you will never be without it.

Saultion.—Pond's Extract has been imitated. The genuine article has the words Pond's Extract blown in each bottle. It is prepared by the only persons living who ever knew how to prepare it properly. Refuse all other preparations of Witch Hazel. This is the only article used by Physicians, and in the hospitals of this country and Europe.
