DISINTERESTED BENEVOLENCE.

A how only ten years of age is now serving a term of three years in the State Prison. He was sent up recently, having been convicted at the last term of the Circuit Court in Multnomah county. Several Portland gentlemen deemed it unwise to send so young a boy to such a school and moved in the matter of obtaining a pardom Hon. Hiram Smith happened to meet the boy and was immediately enlisted in his cause; and agreed if a pardon

could be obtained to take him home and take care of him. In pursuance of this promise the p cuts gave Mr. Smith a le- cred the "first gun of the campaign in gal right to possession of the boy, and the matter now awaits the action of the Goy- for that paper, and is like throwing ice

ernor. In such cases it cannot work@mny hardships to public safety or public morals to pardon the youthful offender, but may save a youth just starting in crime and make of him a good citizen. Mr. Smith deserves praise for his disinterested action in the matter.

UNBELIEF VS. WINDOM.

When Robert Fulton asserted that he papers in Jaimson's time were meagre could apply steam to a beat and drive it mough compared with those of to-day. up the Hadson river at the rate of four Now a yearly newspaper volume is a per miles per hour, he was declared insane ; lect encyclopeilla. when Mr. Morse discovered that he could FRUITLESS CONTEST. talk with a friend hundreds of miles away

by means of electricity acting upon or through an iron wire he came near being locked up in an insane asylum; and, so it has been in all the important discoveries a matter of little importance to the public, in the sciences, since the creation. It is as that house will stand alone except as it not strange that when some one discovers something new in this age that he is de- omy and comes somewhere near the broad nonneed as a fraud, and every effort made views of a Republican Executive and Reto crush him. inblient Senate.

The medium Jacobs may be a traud, but it is true that his performances have attracted considerable attention and good talent all over the world is engaged in in

vestigating similar phenomena. If he has discovered some power hither to unknown it would be well to utilize it Should it be cheaper let it be substitute for steam. If it be a humbing let it be

exploded and exposed. In order to ac complish either result, our best scientifie talent should not only be permitted but should be employed to investigate it and report to the public. It would be a stapid and ignorant people who would suspect that the "Devil is in it," and flee as from evil spirits. It it be legerdemain, let be exposed lest it be the means of injur-ing somebody, and if it be some newly discovered motive power, let the world

money. Span by an unsatisfactory termination of the negotiations which Secretary Fish and Cushing have been conducting with the Spanish government. During the past two months all information that can be obtained leads to the beliet that these negotiations are proceeding favorably, and the result is more likely than not to be gratifying to our government. At the same time our relations with every other foreign power are of the most friendly character, our only serious troubles being upon the Rio Grande at a point inaccessible to the navy. Naval officers are, there-tore convinced that Robeson's extensive oreparations must be in view of something ikely to happen in regard to our attitude owards Spain. They very naturally look owards Cuba for an explanation, but here has been no recent occurrence in Cube to call for a naval demonstration on

hat island. Americans may have been ill reated there, but no very aggravated case of this kind has recently occurred ; so that the present state of affairs in that island considered in connection with the favoraseem to be making, causes the theory of war with Spain as likely to arise out of the existing state of affairs to be promptly dismissed. One theory alone remains and that is that the President intend either to recognize the belligerent right

st Cuban insurgents, or to recommend Congress to take special action in the mat-ter. This is the theory held by many naval officers. It this were the purpose of the President, they say the present extradinary naval preparations might easily be explained, supposing the treaty with Spain to remain unmodified. Such a rec ognition would give a right to cruisers un-der the 12th article of the treaty, to visit and examine all vessels bearing the Amercan flag. It is not believed in mayal cir es, that Spain would consider the recog tion of Cuba by the United States casu selli; but it is believed that the officers of her naval vessels would seek to exercise the right above noticed, and they might e tempted to do so in an offensive man ner, or in cases not contemplated by the terms of the treaty. In order to prevent this, and assure himself that American commerce shall not suffer from the action f the Spanish government, our naval officors thick the present preparations are being made. This may or may not be cor rect, but it is a fact others, beside them, are beginning to think something of this kind is in his mind.
