WEEKLY OREGON STATESMAN

THE WEEKLY ARECON STATESHAN icial Paper of the United States. FRIDAY, : : : : MARCH 17, 1876.

THE Albany Democrat copies Demoeratic articles from the Oregonian without comment.

WE are patiently waiting for the Governor's organ to show wherein Col. Cann's last school report is incorrect. We desire to use that, and would like to avoid the errors. Col. Cann says it is reliable.

Some Democrats hope to see Mr. Scott, of Portland, come over to that party because of his removal from office. Mr. S. is an old Republican and will not and could not descend to such a position.

could get the particulars:

be given the place of District Prose-

cuting Attorney, giving place for the promotion of Mr. Jackson to the place

of Private Secretary to the Governor.

Governor Watkinds (with a d) is to

take editorial charge of the Oregonian

and Mr. Bristow becomes Superin-

tendeut of the Penitentiary, with the

"phat" boy cn the list of guards.

Colonel Cann is to be promoted to the

more lucrative position of editor of

the Governor's organ-the school

funds being well nigh exhausted. At

this point our reporter's line of com-

munication was suddenly cut off, but

UNPARALLELED PRESUMPTION.

offending.

al for the insaue.

Gov. WATKINDS (with a d) reports the labor of convicts on the tannery building at \$2.50 per day. This makes a good showing for his hotel, but the tax-payers of the State will not see it as the Governor does.

THE little Democratic papers all over the country find a choice morsel in the arrest of Gen. Belkusp. Our Oregon Demo rats will do well to inquire into the manner in which their party has handled our school funds.

ALL liberal minded voters, regardless of former political action, are expected to attend Republican primaries and aid in selecting the persons to make up a ficket. Let us have a ticket of our best men aud then elect it.

SEVERAL Democrats calling lately for extra copies of the STATESMAN, have expressed a preference for Judge McArthur for United States Senator, in case the Democrats are permitted to elect. We trast the State will never be so unfortunate.

Mr. WATKINS (without a d) loss been kindly turnished with a year's bourding, lodging and nice striped costume, by Judge Bonham. He will meet Prof. Whiteman face to face, from day to dayunless the Professor imppens to spend his time in the city with citizen's dress.

THAT LECTURE.

Col. Giltry, of the editorial staff of the Governor's organ, delivered a lecture in Eugene recently, of which that sheet speaks in highest terms. The statement that he was embarrassed, may seem thin to those who are not sequalated with the Colonel, and his native modesty. He has no check-it is some other follow.

CAPT. DALY is organizing a military company in Dallar. Notice should be sent to all Indians who are talking of taking a walk on the "war path." and thus prevent such bloody scenes as lately horrified the lew surviving settlers of the Wallowa valley. This move on the part of the Cantain decreases his chances for the Senate, as his party is specially opposed demanding as a condition that its owner to military men for office.

FOUND.

WAYS INEXPLICABLE

DENOCRATIC LEADERS IN COUNCIL Since the Governor's organ refuses to give us light on the subject of Col. Cann's Following up our "obtaining" a copy of the ritual of a Lodge of Knights of last report we have been looking it over to the Golden Circle, a special reporter find out to what particular points they reof the STATESNAN captured the pro- ferred as frauds. Some things about it are gramme agreed upon by that crowd exceedingly dark to us. For instance, for the coming election. The mem- under the head of "Capitol Ballding bers of the "Vengeance" degree and Land" we find the following:

"This report cannot be made in datall the occupants of the "Inner Temple," for the reason that the lands are not apdisagreed in some cases but harmony proved to the State, and the amounts pai was finally secured by absolute auare subject to return to the persons who thority of the presiding officer. The paid them should the lands be disapfollowing is the manner in which the proved."

We trust the Colonel will give some matter was adjusted, as nearly as we light to the Governor's organ on this subect, and we will give his explanation the Mr. Grover to be elected Chief benefit of our circulation, all over the na-Justice, which would give promotion tion. Weekly STATESMAN only \$3,00 per to Secretary Chadwick; Col. Gilfry to aannm. Advance payment preferred.

THE Albauy Democrat calls the Independent Convection in Polk county "farce" and in Marion county the Democrats have called an Independ-ent Convention and signed it "com-mittee," which no one will accept as States and Canada. These lakes once had Democrats have called an Independmittee," which no one will accept as his act. Will Col. Cann, Governor Watkinds and other leading Democrats rise and explain who authorized that call to be issued in the Governor's organ? We pause for a reply. The same paper says editorially the few Democrats who have heretofore voted Independent tickets have returned to we hope to give additional figures in their first love and will vote the and executed by the Grand Architect of straight ticket in future. This is throwing ice-water on the effort of Democrats in this county to organize an Independent party.

Brick Pomerov in his paimiest days. GEOLOGICAL DELUCES. I closed my last paper upon this topic with the brief announcement that land and water had frequently changed places, but find that very well informed persons are not satisfied with the bare statement of the fact, and therefore I will elaborate the idea as briefly as possible.

The first three verses of the second so much attention. And yet I doubt chapter of Genisis declare that God com- whether women themselves are giving the pleted his labor and rested. Opposed to the subject the attention its importance dethis we have God's own record on the mands. I was much interested in an artirocks, declaring his labor is not yet com- cle in the STATESMAN recently upon the pleted and that he has never rested. subject of, "Woman Question." Plants grow on the seventh day just the writer seems to think it important that same as on any other. Formations, (not creations) still go on, every second of and comfort independently of Madam time, just as actively as ever. One por- Grundy, or the fashion plates. This is tion of the earth's crust (the Pacific coast for example) is steadily raising above the level of the sea, while on the Atlantic, from Massachusetts to Florida, it is as steadily sinking. During the last hundred vears the Connecticut shore has diagonal. years the Connecticut shore has disappeared beneath the water for a distance of nearly two rods. The same is true of New their outlet through the valley of the Mis-sissippl, into the Gulf of Mexico, but as the whole region slowly went down, while Southern Indiana and Kentucky steadily rose, there came a time when the surplus of these lakes could no longer flow to the south. Then the waters turned channel known as the Niagara river. In this stupendous enterprise there was no sub-contractor, but the whole was planned the Universe. He has never rested since the work began, and it is still pushed for ward as vigorously as at first. True, this is a very recent enterprise, and could not have been commenced more than dorty or fitty thousand years ago, while at the Glen, at the head of Seneca Lake, State of New York, 1 saw in 1863 a job upon which lutinite Force must have labored uncessing more than two hundred thousand vents

The same phenomena of some portions rising and others striking is also visible in Europe. The coast and bottom of the Bal-tic sea has been raising for centuries, and now the ancient shore is nearly half a mile from the water edge. On the other hand, France, Holiand, and Great Britain are slowly but surely going down, and a few hundred thousand years hence Enghundred thousand years hence Eng-land will be at the bottom of the ocean. Asia and Atrica offer no exceptions to this general rule. The Great Desert of Sahara, a thousand miles wide and more than two thousand miles long, only a short time ago lay at the bottom of the ocean, and has not had time since its resurection, to be rendered a fit habitation for man. But when England, France, and Holland shall have disappeared, when the Continent of Aflantis shall have once more risen to the surface, a barren waste, more desolate than Sahara of to-day, then will come a time for the Great African desert

to blossom like a rose. I have taken but a hasty gance at the I have not a single doubt, nor never had, Moreover, I how before this Inflite Mind in humble adoration, but would despise myself were I ever to be so weak as to ask of the Universe knows better how to per-torm his Infinite labors than I could possibly hint or suggest. But not so with the Christian's God, for his worshipers act as though they had not the least confidence

THE WOMAN QUESTION AGAIN, OR QUENTION ABOUT

ED. STATERNAN :-- Obe can aca pick up a paper now-a-days without therein the "Woman Question" dis in one or more of its various aspects. This subject is certainly one of great importance, and it is no wonder that it receives The women should dress with regard to health

If the time, money ingenuity which are employed in fitting out the "rufied, frilled, crimped and laced creatures" were used to devise and put in operation plans for the amelioration of the condition of the anfine ing, for enlightening the ignorant and for elevating the standard of morals and intelligence, among all classes, but es-pecially among those whose opportu-nities for improvement and self culture are liminted; among those whose surroundings are calculated to repress all purity of thought and motive, what a mighty impetus would be given to the "car of progress," and how soon would be usbered in the glories of "the grand millennial day." There are so many institutions organized for worthy objects, which are in a weak and sickly condition for want of more extended aid and influence, and more earnest and energetic effort on the part of the women, that I wonder any can be hound so weak or thoughtless as to give their precious time and attention to the follies of fashion. know we all want to look our best and it is right we should, but a false standard of taste and beauty has been established, and it behooves us as we value our com here and happiness bereatter, to look well to the matter. How many of us are do-ing what we might do for the Young Men's Christian Association, and the various Temperance and other benevolent associations, and all because we have neither time nor money to bestow upon those ob-jects. If we could so far resist the demand

of fashion as to adopt a plain but neat, substantial and healthful style of dress, we should be more confortable, have more time and money to do good with, should please the gentlemen far better than now, and as a natural consequence, be far hapned as a natural consequence, be far imp-pier. What do you say, Ladies? Shall we inaugarate a reform among ourselves in this matter? LENGRA.

RETSER VS. WEBSTER

Engron STATESMAND-Please give me : small space to examine Mr. Keyser's artide on "everlasting" and "eternal forever." etc., and my word for it I will not rouble you further on his account.

All persons versed in the Bible should know that the terms everlasting, eternal and torever, like many other words, have various meanings, hence it is unfair to give them, as Mr. Keyser does, but one, me say t that it is a "prevalent idea that these words in the English Bible signify endless duration," and he says further "I shall aim to prove the popular impression erroneous." These terms somethings denote a long but limited time, as the con-

KILLED IN HIS CASTLE. [From the Denver News.]

A serious and perhaps fatal shoot-ing affray occured at the house of Pat-rick Duffey, on the Arkansas, nine miles below Pueblo, recently, the par-ticulars of which, as gathered from various sources, are given in the Chieftain. Duffey and a South Pue-blo saloon keeper went on a protracted spree together. They remained drunk apree together. They remained drunk several days when Duffey returned home accompanied by Mohahan. In the evening the saloon keeper, who was still under the influence of liquor, used coarse and insulting language toward Duffey's little daughter, which toward Duffey's little daughter, which the father promptly resented. Mona-han, flying into a furious cutbreak of temper, seized an unloaded gun and struck Duffey over the head with the barrel, felling him to the floor. He then ran from Duffey's house and re-turned to his saloon in South Pueblo. The next morning Monahan and his partner, a man named Roberts, re-turned to Duffey's house, the former turned to Duffey's house, the former boasting that he would make Duffey retract something he had said the night before. Arriving at the house Roberts remained outside while his partner went in. Shortly after Mona-han entered, loud talk was followed by a pistol shot. Roberts entered and ound Duffey lying upon the floor, the blood streaming from a wound in the left side between the fifth and sixth ribs. The ball fired by Monahan had passed through both lungs, made its exit under the right arm and lodged in one of the logs of the building. Duffey's recovery is hardly possible. Monahan, as soon as the effect of his act became apparent to him, mounted a horse belonging to his partner and rode rapidly away. Sheriff Ellis has dispatched a couple of deputies after the murderer and his capture seems only a question of time.

IMPORTANT FACTS IN CHEMISTRY.

Phosphoric acid, says the American Agriculturist, combined with lime, as hosphate of lime, makes up most of the mineral water of all bones. phurie acid, (oil of vitrol), with lime, orms sulphate of lime, otherwise known as "plaster" or gypsum. Sill-ca is the chief ingredient of ordinary sand. It occurs nearly pure in flint and quartz and, combined with other substances, in many minerals. Nitro-gen constitutes four-fifths of the air, the other fifth being oxygen; and nitropen also makes up about seven-eights of ammonia, the rest being hydrogen. Charcoal and lampblack are nearly pure carbon. By potash is to be understood the compound of potassium and oxygen, and by soda, sodium and oxygen. Bearing these facts in mind, let me quote the following tersely expressed statement by Prof. S. W. Johnson, of some of the sub-stantisl results referred to:

In respect to the food of plants, it In respect to the food of plants, it has been settled that potash, lime, magnesia, iron, phosphoric acid and sulphurie acid must be furnished to all agricultural plants through their roots and by the soil, in order to their growth. It has also been shown that soda, sicila, and chlorine are not need-ful for the early growth of grain crops, but that chlorine is essential for the but that chlorine is essential for the perfection of the seed and that silica is essential for the perfection of the seed and that silica is probably neces sary to uniform blossoming and ripen-ing. It is further proved that water must enter crops through their rosts; that carbon, which constitutes more than half their weight, is superabundantly furnished by the air; that air and water together yield the materials out of which fully 90 to 58 per cent. of crops is built up; and that the soil has to give for their hourishment only the 2 to 8 per cent. of mineral matters which romain as ashes when they are burned and the one and a half to two per cent. of nitrogen which they also contain. THE death of the Honess "Old Girl," so well known to Dublin folks, was attended by a touching incident. When dying, old lions are much tormented by rats gnawing their tails. During health they rather welcome the vermin and lie blinking at them as they frisk about their cage, nibbling the bones left from the lion's dinner. To prevent this annoyance a terrier was put into "Old Girl's" cage. At first she growled, but when she saw the dog "fetch" the first rat, toss it up and catch it in a professional manner across the back, with one quick, fatal snap, she drew up the brave animal to her, licked it and fondled it; and in her shaggy breast it slept every night, her great protecting paw over it. During the six weeks of the lioness' filness the rats had rather a hard time of it. "Old Girl" had borne fifty-four cubs and had reared fifty, bringing in by the sale of her progeny £1,300 to the Gardens. She was the handsomest lioness ever reared in the country.

campaign by organizing lodges of "Knights of the Golden Circle," we have very grave doubts of his el ction as Senator.

tinuance of Ceremonial Law Lev. 16, 14 "And this shall be an exclusting statute unto you, to make an atonement for the children of I-racl for all their aims once a year When applied to God it always means

damition without beginning or end-Gen. 21, 52. "And Abraham planted a grove in Beer-shebs and called there in the name of the Lord, the everissing God." When applied to the biss of Heaven in the tor-ments of Hell, they are never ending-Mat 25, 46. "And these shall go away Mat. 25, 46. "And these shall go away into everiasting punishment, but the right-cous into life etermin" Webster gives these varied definitions and I think your many readers will prefer them to Keyser. It may be a consoling thought to those who have no thought of Heaven to mppose that there will be an end to the tor-ments of perdition; but then it would be a chilling thought to these who, through the merits of Christ, hope to be admitted into Heaven, if it be uncertain as to how

long they may remain there. The same words eternal, everlasting, torever, etc., are alike used to express the bliss of heaven and also the torments of perdition, so that if the lost in perdition is limited, in like manner the duration in heaven is also limited.

OH FIEL

A majority of the butter now used in Salem is old roll butter from California ! In Portland this butter is bought in bulk by provision dealers and others in Salem. at 25 cents per pound. Add on freights and profits, and the article is sold in this city now at about 42 cents per pound, While we write and tell about our endless grassy plains; great facilities for raising root crops for the milk cows; the mild temperature of the climate; the good health of the cows and the large flow of pure, rich milk, we must admit the above fact, that we are the importers of butter from California ! The fault lies some

where. There is not a better country in North America for good batter than Oregon is. Good, tresh butter is worth on an average the year round here, 30 cents per pound if the present inhabitants here causof or will not produce enough butter for home consumption, then may help arise from dater men in the "States" or Europe, who will, we hope, come here and pursue the lairy business equal to home denrated and

a large export trade. If the California butter now here was pure and good, it would be bearable. But it has a singular tiste-some lard, some Our pure, yellow gold goes to pay for this bogue colored California butter. D. N. March 10.

A new and beautiful fish, which has been named the golden trout, has been discov-ored in the head waters of Korn River, California, 10,500 above the sea. Its color is like that of the gold fish, but richer, and dotted with black spots.
