The Gento Mucket.

The leading Liverpool grain circular, of the 31 just, says that with the continued finweather favorable to the labors of husbandry the British grain markets are still scantily sunwlish with wheat, the value of which remains unchanged. Foreign trade is at the same time more steady, after the slight depression and setivity has been partially resumed. It is now understood that an armistice has been agreed upon by Turkey and Servia, the influence of war will not have the effect, as of late, of eveiting speculation; but as stock taken at the close of the month shows that short supplies coming since September 1-t, have resulted in a mate rial reduction in quantities in granary, there appears a fair element for steadiness at current ates. At Liverpool we have 204.000 quarters sees in store now than on August dist, and our local consumption with that to the interior and elsewhere make an average in the interval of 20,000 quarters per week; with moderate atfendance of country millers at to-day's market. trade less but hours me ive, but sellers of wheat show much firmmes.
