Our Correspondence.

Coeus Bay, May 23, 1854.

Editor:—A few days since, a gentleman informed me that our correspondent, "Olive Branch", had come east to return to his place in the State of Washington; and that prospecting for ore was now the order of the day. This information having been interesting, I took the opportunity to visit his dwelling, to learn more about his experience, and to inquire into the different localities where he had been, and what he now proposed to do at the time of his return. I am not surprised to learn that the subject of his present employment is the precious metals of the region. Our correspondent, "Olive Branch", has been engaged in the search for gold for some time past, and has made considerable success. He has spent a large portion of his time in the vicinity of Coeus Bay, and has been rewarded with many rich discoveries. I am happy to say that he has been successful in his efforts, and that he now proposes to continue his search for gold in that region. I shall be glad to hear from him again, and to learn more about his adventures in the mining district. I have been to see the region of the Coeus Bay, and I can say that it is a very promising one. The soil is rich, and the climate is favorable. I shall be glad to hear from you again, and to learn more about your discoveries.
