ers of the Pioneer are respect- fully referred to the letter from Rev. Hickey, of Wasco, who has a number of friends here. Braunster and sons have two cisterns and a pond, in which water's snow water is to be stored for use. They have also built a reservoir, which is 17 feet wide at the bottom, 10 at the top and 15 feet deep. The building of reservoirs on this plain is the nucleus for the saving of water and rain. Some farmers have had gutters to the roofs of their barns, which are drained into cisterns, thus saving much water. The time lost in water hauling during the course of a year would be saved by the building of several districts.
