Sagebrush Spring Notes.

John Trotter spent last Saturday in Madras.

Mrs. Elizabeth Percival spent Easter Sunday with the Vibberts on the Big Plain.

Grain in this vicinity is looking well, though a good, soaking rain would be welcome.

W. W. and R. A. Brown grubbed and sowed about 10 acres of sagebrush last week. They plowed it out with a 4-horse riding plow.

Some of the boys from this vicinity took in the dance at Joseph Stewart's near Helsler last Friday evening. A good crowd and a jolly time are reported.

Considerable fencing is being done between here and Young's, so travelers cannot strike across the country on horseback or in wagons without running into barbed wire.

Recently after he had baled out his well to dig it deeper, W. W. Brown dug about five feet before he struck water again. He was apprehensive that the water had disappeared for good.

Work commenced a week ago last Monday on the grade of the Big Plain around Percival Point, and about 400 yards have been completed. Considerable blasting is being done. Fifteen and 20 men are working every day.

With the June number will begin The Pacific Monthly's series of special editions for the year 1905. They will comprise a number for Portland, for Seattle, for Southern California, for San Francisco and the souvenir number of the Lewis and Clark Expedition, also a special automobile number. The articles of Dr. Wolf Von Schierbrand, six in number, on "The Coming Supremacy of the Pacific" are also promised, and the plans contemplated by the publishers will, without question, place The Pacific Monthly far in advance, not only of present competitors, but also into the unreachably class of periodical literature on the Pacific Coast. The Pacific Monthly is sold to regular subscribers at the extremely low price of \$1 a year. We have made an arrangement with the publishers by which we are able to offer it in connection with The Madras Pioneer (both publication) for \$1.75 a year.

East Second St. THE DALLES, ORE.

FLOUR MILL IS BUILDING

Construction of the Building Commenced this Morning.

OUTPUT TO BE 50 BARRELS

Mill to Be Three Stories—Work will be Pushed Fast as Workmen Can Do It.

Work on the new flour mill of the Madras Milling & Mercantile Company was expected to commence this morning. The company had expected to start work on the mill last Monday, but owing to the bad roads leading to the sawmill in the mountains it has been very difficult to obtain any kind of lumber, and up to the present week it has been about impossible to haul out timber for sills and other large pieces with which a building of this kind will have to be constructed.

Teams are bringing out the material as rapidly as possible, and the construction of the mill will be pushed rapidly as possible to completion.

Mr. Putts, president of the milling company, says the flour mill will have an output of about 50 barrels per day. The building will be 30x40 feet and have three stories and a basement. The engine and boiler room will be erected just back of the main building.

The Madras Milling & Mercantile Company will in the future erect a store building about 40x70 feet, but work on this will not commence until the grist mill is about completed and ready to take care of the incoming grain.

NAVAL BATTLE IMMINENT

PARIS, April 21.—If the French authorities are to be believed, news of momentous import may be expected from the Far East very soon, as, according to Foreign Minister Delcasse, the Russian fleet under the command of Vice Admiral Rojestvensky sailed early on Thursday from Kamranh Bay. Its destination is unknown, but it is believed here that it will now sail to endeavor to locate the Japanese fleet and give battle.

Naval experts here believe that the third Pacific squadron of the Russian navy, which is commanded by Admiral Neboga off, has joined Rojestvensky, and that the latter now has ready to face the Japanese eight first class battleships, three second-class battleships, three armored cruisers and a number of other vessels of not quite so good a type. He is also believed to have received large quantities of ammunition which had been shipped to him some time ago to have filled the coal bunkers of his ships, and generally to have placed his command in condition to give a good account of itself.

IGORROTAS AT THE FAIR

SEATTLE, Washington, April 19.—Dr. T. K. Hunt reached Seattle tonight with a party of 51 Igorrotas for the Lewis and Clark Exposition. One small Negrito boy and three white assistants complete the party. The Igorrotas will be held here for a short time, and may give local exhibitions. Their village on the Trail will be built when the details are settled with the Exposition officials.

A canao, or native dance, lasting for three days, followed the return of Dr. Hunt's party from St. Louis, and when he sought to gather his party for the trip to Portland, over 300 asked to accompany him. Only five persons, including Juho, a native interpreter, are with the Portland as well as the St. Louis parties.

Dr. Hunt, when he left Portland, talked of bringing representatives of five villages. The fact that the Igorrotas took in \$202,000 at St. Louis, while other villages barely paid expenses, decided the company in favor of bringing Bontoc Igorrotas alone.

The Pioneer gives the news.

THE SECRET OF SUCCESS

"What a fine fellow Percy X. is!" remarked a business man one day to a lawyer friend.

"Yes," rejoined the lawyer, "he is. But he has been with the K's," naming a great corporation, "for ten years now, and he is getting only \$150 per month. He has a wife and three children, and, with their tastes, I fancy they have all they can do to live comfortably. He ought to be earning more with his education and capacity."

"Why doesn't he rise faster?" "I'll tell you. He doesn't rise and he can't rise until he learns how to get along with people. He can't manage men at all. If he tries he gets himself disliked, and he keeps them in a constant state of irritation."

A similar conversation was recently overheard between two business men. Said one: "I hear that young Paul G., only four years out of college, has been placed at the head of the T. branch of the Y. company. I didn't know he was so smart. What is his strong point?"

"He is a great fellow to get along with people," answered the other man. "No man would of course be put in a place of such responsibility without integrity, fair quickness and ability and a good education. But there are scores of men who have all of those qualities, and yet they do not go forward because they cannot exercise authority. If they receive any they either make the men under them cross and restive by petty tyrannies of else they are too good natured and lose the respect of the men, and imposed on by them and don't get good work out of them. It seems to be the rarest thing in the world to find young men who have dignity and keenness enough to maintain discipline and yet can make their subordinates bear the yoke cheerfully and render good service."

A third young man was characterized by the president of a great railroad thus: "I haven't had a chance to talk with him and find out how much he knows, but I have watched him several times as he manipulated a gang of men, and he has for weeks managed them wonderfully. We have rarely had a man in our employ who could get so much work out of a lot of men and at the same time could keep them so decently good tempered."—Independent.

County Assessor J. D. LaFollett returned this week from the northern part of the country where he has finished his work of assessing property. At present he is at Sisters working in the Black Butte precinct. Mr. LaFollett stated Monday that owing to the census this year he would be compelled to make a second trip over the ground already covered in order to enumerate the population, industries and various products of the county. The additional work will consume many weeks as no provision has been made for the employment of deputies. In Linn county, 16 deputies have been detailed to do nothing but take the census.—Crook County Journal.

It is rumored here that the Oregon King mine will be pumped out next month, and that the company owning it will resume operations at the mine. Another rumor says that the mine will be pumped dry in order that it may be examined by a prospective purchaser. Anything looking to a resumption of activities in the Ashwood district will be welcomed by the people of this section who are interested in the camp, and we hope that the report of the early opening up of the King mine has some foundation.—Aitelohe Herald.

C. K. Cochrane's little 4 year old boy was attacked by a venomous frog last Monday, while playing in the door yard about home in this city, and was bitten on the leg with such a poisonous effect that Dr. Logan was called. The leg was badly swollen, and the little fellow suffered quite severely. This is the first case of the kind we ever heard of.—Moro Observer.

The telephone line between Laidlaw and Bend was completed Saturday and communication established to all points along the line. It is expected that the Madras line will be finished in a short time.—Crook County Journal.

Alfalfa As A Hog Pasture.

Few farmers realize the value of alfalfa as a hog pasture. When you consider that with alfalfa pasture and hay pork can be produced for 1 to 1 1/2 cents per pound the proposition is well worth consideration.

The writer knows of a three-acre alfalfa hog pasture which is now ten years old. Every year during this time this pasture has supported from 100 to 125 hogs per season, which is from the 1st of April to the middle of November. The pasture today is nearly as good as it was at first, and indications are that it is good for another ten years of service.

The secret of preserving this field has

been that the hogs were properly ring before turning them on the field. The alfalfa was cut often during the season, setting the mower high.

Brood sows in alfalfa country, being fed continually on this green, high protein feed, keep fleshy, but not fat, and large litters are the natural results.

The litters are often born in the pasture lot and get nothing but alfalfa pasture until they are ready for the feed lot. At this time they are large, healthy, growthy sows with strong bone and constitution. This is the kind that puts on fat quick and cheap.

Establish an alfalfa hog pasture on your own farm. Sow several acres this spring. Select clean, well drained soil, and sow twenty pounds of choice seed per acre. Study alfalfa conditions, and if you don't

succeed the first time try it again. It will pay you well for your trouble.

An alfalfa hog pasture is the best and cheapest investment a farmer can make.—A. L. Cottrell, in Wallaces.

Should not Use Exclusively.

Pacific Homestead.

A swine breeder says: Alfalfa is a splendid feed for hogs, but should not be used exclusively, for the reason that it produces what is known as alfalfa belly, which is very undesirable later on when the hogs begin to fatten, because of the fact, that it requires feed and time to work it off. Alfalfa alone, he says, is too rich, and it is often the case that little pigs will often be found dead from gases produced by too much alfalfa, and that deaths from this cause are often mistaken for cholera.

BIG - OPENING - SALE

Our DRY GOODS have arrived and our Opening Sale will continue for the next 10 days.
