The Red Front Feed Barn gives your team and stock the best feed and most careful attention.

Advertising for Postal Route.

The postal department is advertising for bids for carrying the mail over the new postal route to be established between Heister and Madras on September 15, 1905. The service will be daily, except Sunday, leaving Heister at 6:00 a. m., arriving at Madras 11:30 a. m., and departing from Madras in the afternoon in time to connect with the evening stage from Heister to Shaniko.

The English Walnut.

Over \$10,000,000 is expended annually for nuts in the United States, and California supplies but \$200,000 worth provided the season is not too dry and the trees do not suffer in that state from a drought.

An 8 year-old English walnut tree will produce 100 pounds of nuts, which sell for 12 1/2 cent a pound. About 100 trees are set to the acre, which makes the nut a profitable crop. In planting English walnuts, it is understood that the second generation must be secured, as the third, fourth, or fifth generation will not produce. This is an important point which experimenters must not overlook.

Fertility Removed from Farm.

Prof. C. L. Beach in Cheese and Dairy Journal. When the products of the farm are sold in the form of hay, potatoes, corn or barley, the large amounts of fertilizing ingredients are removed also, but when the sales are in the form of animal products then relatively smaller amounts of fertility are removed from the farm.

Eighty acres in hay, yielding one ton per acre, would remove in one year fertility value to the amount of \$408. If it were possible to sustain this yield for a period of 20 years the fertility of value in

Horses For Sale.

Four work horses—one mare 5 years, three horses 4 years old. Seven miles southwest of Madras. For particulars call at the Pioneer Office.

BARGAINS

REAL ESTATE

We have the following choice tracts of land for sale in this vicinity:

160 acres of farming land, 15 miles south of Madras. Good house and barn, all fenced; 80 acres now in grain and balance can be cultivated. The crop will be included in the purchase price.

240 acres about 10 miles southwest of Madras, on Little Agency Plains. All plough land; unimproved. Level plateau land, and as good as the best land in this vicinity.

640 acres of land five miles northeast of Madras. All under fence and 550 acres of it good plough land; balance good pasture land.

40 acres of land lying under Columbia Southern ditch; all irrigable.

160 acres of farming land lying 12 miles north of Madras. Has fine spring upon it, and is all fenced.

800 acres of farming and pasture land, 15 miles north of Madras. Thirty acres can be irrigated and used for fruit ranch or garden spot.

Title to all of above tracts perfected. Abstract furnished if desired. Prices and terms reasonable.

For particulars apply to

MADRAS REALTY CO.

D. P. Rea, or Max Lueddemann, MADRAS, OREGON

the crop would amount to \$8160, or a sum equal to the worth of the land at a valuation of \$100 per acre. In a similar manner potatoes, yielding at the rate of 125 bushels, would remove in one year \$561 of fertility and in 20 years \$11,220. Wheat yielding 20 bushels of grain and 800 pounds of straw would remove \$455 of fertility in one year and in 20 years \$9094. Corn yielding 30 bushels per acre, would remove in one year \$454 of fertility and 20 years \$9072.

If the farm had been devoted to best production, and the assumption be made that the 80 acres would support 35 animals from six months of age until sold as feeders one year later and making a gain of one pound each day, then the amount of fertility passing off in each year would amount to \$95.30 and in 20 years \$1907.

If butter was produced at the rate of 200 pounds per cow, and 25 cows were kept on the 80 acres, the fertility passing off would amount to \$1.16 in one year and \$23 in 20 years.
