

Eruptions

The only way to get rid of pimples and other eruptions is to cleanse the blood, improve the digestion, stimulate the kidneys, liver and bowels. The medicine to take is **Wood's Sarsaparilla** which has cured thousands.

Police Freshman.
A young Meagles took the train to Harvard his father said: "As you find out let me know if you have passed your entrance examination."

Two days later, in the midst of a heavy deal, he received the following telegram: "Yes. J. Meagles."

He was preoccupied and puzzled, he replied back: "Yes, what?"
The well trained son wired back: "Sir."

Tolstol Was Unable to Answer.

Once, in Moscow, near the Borovitchskala gate, he (Count Tolstol), saw a persistent beggar, asking alms, who exclaimed: "A little penny, brother, in the name of Christ."

A police officer approached; he was young, martial, and wrapped in the regulation sheepskin. At sight of him the beggar fled, hobbling away in fright and haste.

"Is it possible," said Tolstol to himself, "that people are forbidden to ask charity, in Christ's name—in a Christian land?"

"Brother," he said to the policeman, "can you read?"

"Yes," said the officer, politely, for Tolstol has a grand air.

"Have you read the Bible?"

"Yes."

"And do you remember Christ's orders to feed the hungry?"—and he cited the words. The policeman was evidently troubled; he turned to his questioner and asked:

"And you, sir—you can read?"

"Yes, brother."

"And have you read the police regulations?"

"Yes, brother."

"And do you remember that begging in the main streets is forbidden?"

The prophet found no answer ready.—Success Magazine.

Popular Science.

Dr. P. I. T. Herout, the French metallurgical expert, who has been examining the mining and other resources of Canada, predicts that in ten years the Dominion will have become a great metallurgical country, having an iron industry larger than that of any other country in the world. So, too, he thinks that within a decade Canada will outstrip all other countries in wheat growing. In Ontario and Quebec there are immense deposits of magnetite, which have remained undeveloped for lack of cheap fuel. The invention of the electric smelting process removes this obstacle, because in the neighborhood of the ore deposits water power is abundant.

The importation of injurious birds and mammals into the United States has been carefully guarded against since the passage of the Lacey act on May 25, 1906. In the five years ending June 30, 1905, the authorities issued 1501 permits for the entry of 1,006,904 birds (chiefly canaries), 2,846 mammals and thirty-eight reptiles, and thirteen permits for the entry of 6,500 eggs of game birds. Of the consignments 402 were inspected. No injurious animal is known to have been admitted, but seven mongooses, fifty-four flying foxes or fruit-eating bats, one kohlmeise, fifteen blaumelsen and two starlings have been refused entry. At Honolulu six keas were refused entry.

Statistics showing the enormous waste of energy involved in the production of artificial light are always interesting, if for no other reason than that they must continually stimulate inventors in the search for better methods. Sir James Dewar recently presented these figures before the Royal Institute of Great Britain: In an ordinary candle the total amount of energy transformed into light is only 2 per cent. Oil and gas lamps are not more economical. The incandescent electric lamp utilizes 3 per cent of the energy expended; the arc light 10 per cent, and the magnesium light 15 per cent. Then comes the glowworm and mocks us with its 99 per cent of expended energy turned into light.

The possible value of radium to the physician still remains chiefly a matter of conjecture. Two Italians, Tizzoni and Bongiovanni, have satisfied themselves that it has an important influence upon rabies, and that it may act either upon the virus or directly upon the bitten animal. When the virus is exposed for four to thirty-six hours to radium rays it is converted into a powerful vaccine. Injections into a rabbit's eye overcoming the otherwise fatal effects of inoculations with dog's virus. With a powerful specimen of radium, the direct exposures of several hours during six days, animals inoculated forty-eight to one hundred hours before treatment were saved, while similarly inoculated animals not treated all died.

It is well known that pure quartz glass possesses the property of transmitting, very abundantly, the so-called chemical rays of light, by means of which photographic effects are produced, and it has often been attempted to make photographic lenses of quartz alone. Unfortunately, quartz also possesses the property of double refraction, so that, unless the opening of the lenses is very narrow, good images are not produced. Recently a French optician, F. Morin, has succeeded in making small photographic lenses of quartz glass in which some of the difficulties have been avoided, and the lenses show great rapidity of action. Still, the problem, confessedly, has not been entirely solved, and the new lenses are recommended by their inventor only for special purposes. Astronomers are particularly desirous to obtain photographic lenses possessing the peculiar permeability to the actinic rays that characterizes quartz.

A Lack of Orphans.
The Irish duellist who lamented having "as pretty a challenge as ever was penned, but no one to whom to give it," was in the same trouble as the municipality of Paris. The city has a fine orphanage, liberally appointed and with an ample staff, but with no orphans. A Mme. Tamices left nearly a million and her villa at Orsay to be maintained as an orphanage for girls of the eighth arrondissement. The girls were to be provided with a dowry on leaving. Paris has searched the highways and byways of the district, and but two orphans have been found.

Divided on Religion.
A curious diversity of religious belief is observable in the family of Lord Stanley of Alderley. The last previous holder of the title, a brother of the present peer, died in the Mussulman faith and was buried according to the rites of Islam. Another brother became a convert to the Roman Catholic faith and is now a domestic prelate to the Pope. One of Lord Stanley's nephews is a Buddhist, and a brother-in-law, now dead, was an atheist.

If the human race were built on plans that meet daily requirements, men would have two more legs that they might constantly be kicking themselves, and women would have six more pair of hands that they might keep up with the work the children make around the house.

As a town grows older, it becomes more and more expensive for a man to be a satisfactory father.

How Many Birthdays?

You must have had sixty at least! What? Only forty? Then it must be your gray hair. Ayer's Hair Vigor stops these frequent birthdays. It gives all the early, deep, rich color to gray hair, and checks falling hair. And it keeps the scalp clean and healthy.

"I was greatly troubled with dandruff which produced a most disagreeable itching of the scalp. I tried Ayer's Hair Vigor and the dandruff soon disappeared. My hair also stopped falling out until now I have a splendid head of hair."—DAVID C. KISS, Plainfield, Conn.

Feeling in His Art.
The singing teacher was visiting the school, and as this was an important event in the district, the pupils had been instructed to memorize a verse or two to recite for the entertainment of the visitor.
During the delivery of his lines, one small boy was especially noticeable for the action with which he accompanied his words; so much so that the teacher, surprised at his efforts, commended him highly on the ease with which he spoke and the apparent practice which he must have put on the piece.
"It was fine," she exclaimed, in closing, "and shows a large amount of rehearsal! But, Johnny, where did you get the gestures?"
"Tain't the gestures," replied the young genius, with a twist, "tain't the gestures; it's the hives."

SORES THAT DO NOT HEAL

Whenever a sore or ulcer does not heal, no matter on what part of the body it may be, it is because of a poisoned condition of the blood. This may be the remains of some constitutional trouble; the effect of a spell of sickness, which has left this vital stream polluted and weak, because the natural refuse matter of the body, which should pass off through the channels of nature, has been left in the system and absorbed into the circulation. It does not matter how the poison became entrenched in the blood, the fact that the sore is there and does not heal is evidence of an underlying cause. There is nothing that causes more discomfort, anxiety and a festering, discharging old sore that resists treatment, than the sight of it is abhorrent and suggests pollution and disease; the time and attention required to keep it clean and free from other causes. As it lingers, slowly eating deeper into the surrounding flesh, the patient grows morbidly anxious, fearing it may be cancerous. Some are afflicted with an old sore or know how useless it is to expect a cure from salves, powders, lotions and other external treatment. The use of these they have seen the place begin to heal and scab, and were congratulating themselves that they would soon be rid of the detestable thing, when a fresh supply of poison from the blood caused the inflammation and old discharge to return and the sore would heal or worse than before. Sores that do not heal are not due to out-comes; if they were, external treatment would cure them. They are deep because the blood is steeped in poison, which finds an outlet through these places. While young people, and even children, sometimes with non-healing sores, those most usually afflicted are persons past middle life. Often, with them, a wart or mole on the face inflames and becomes ulcerate from a little rough handling; or a deep, offensive ulcer develops from a slight cut or bruise. Their vital energies and powers of resistance have grown less, and circulation weaker, and perhaps some taint in the blood, which was held in check by their stronger constitutions of early life, shows itself. It is well to be suspicious of any sore that does not heal readily, because the same germ that produces Cancer is back of every old sore and only needs to be left in the circulation to produce this fatal disease. There is only one way to cure these old sores and ulcers, and that is to get every particle of the poison out of the blood. For this purpose nothing equals S. S. S. It goes down to the very bottom of the trouble, cleanses the blood, makes a permanent cure. S. S. S. enriches and freshens the circulation, it carries new, strong blood to the diseased parts and allows the place to heal naturally. When this is done the discharge ceases, the sore scabs and falls in with healthy flesh, and the skin regains its natural color. Old sores and ulcers and any medical advice desired will be furnished without charge.

WHAT JOY THEY BRING TO EVERY HOME

as with joyous hearts and smiling faces they romp and play—when in health—and how conducive to health the games in which they indulge, the outdoor life they enjoy, the cleanly, regular habits they should be taught to form and the wholesome diet of which they should partake. How tenderly their health should be preserved, not by constant medication, but by careful avoidance of every medicine of an injurious or objectionable nature and if at any time a remedial agent is required, to assist nature, only those of known excellence should be used; remedies which are pure and wholesome and truly beneficial in effect, like the pleasant laxative remedy, Syrup of Figs, manufactured by the California Fig Syrup Co. Syrup of Figs has come into general favor in many millions of well informed families, whose estimate of its quality and excellence is based upon personal knowledge and use.

Syrup of Figs has also met with the approval of physicians generally, because they know it is wholesome, simple and gentle in its action. We inform all reputable physicians as to the medicinal principles of Syrup of Figs, obtained, by an original method, from certain plants known to them to act most beneficially and presented in an agreeable syrup in which the wholesome Californian blue figs are used to promote the pleasant taste; therefore it is not a secret remedy and hence we are free to refer to all well informed physicians, who do not approve of patent medicines and never favor indiscriminate self-medication.

Please to remember and teach your children also that the genuine Syrup of Figs always has the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package and that it is for sale in bottles of one size only. If any dealer offers any other than the regular Fifty cent size, or having printed thereon the name of any other company, do not accept it. If you fail to get the genuine you will not get its beneficial effects. Every family should always have a bottle on hand, as it is equally beneficial for the parents and the children, whenever a laxative remedy is required.
