## "PE-RU-NA WORKED SIMPLY MARVELOUS

**Suffered Severely** With Headaches-Unable to Work

Miss Lucy V. McGivney, 452 3rd Ave. Brooklyn, N. Y., writes:

"For many months I suffered severely from headaches and pains in the side and back, sometimes being unable to attend to

my daily work. "I am better now, thanks to Peruna, and am as active as ever and have no more headaches.

"The way Peruna worked in my case was simply marvelous."

We have in our files many grateful letters from women who have suffered thirty-inches in diameter, conduct the with the symptoms named above. Lack of space prevents our giving more than one testimonial here.

It is impossible even to approximate the great amount of suffering which Peruna has relieved, or the number of women who have been restored to health and strength by its faithful use.

GASOLENE ENGINES 8 to 4 hornepower fully warranted, \$125. All sizes and styles at lowest prices. Write for catalog. **REIERSON MACHINERY COMPANY** 

Portland, Oregon.

### WHAT WATER IS CAPABLE OF.

Six-Inch Stream Generates 12,000-Horse Power at Butte Creek, Cal. Imagine a perpendicular column of water more than one-third of a mile high, twenty-six inches in diameter at the top and twenty-four inches in diameter at the bottom. Those remarkable conditions are complied with, as far as power goes, in the Mill Creek plant, which operates under a head of 1,969 little column of water, which, if liberated, would be just about enough to make a small trout stream, gives r capacity of 5,200 horse power, or enough power to run a good-sized oceangoing vessel.

As the water strikes the buckets of the waterwheel it has a pressure of 850 pounds to the square inch. What this pressure implies is evidenced by the fact that the average locomotive carries steam at a pressure of 190 or 200 pounds to the square inch. Were this stream, as it issues from the nozzle, turned upon a hillside, the earth would fade away before it like snow before a jet of steam. Huge bowlders, big as city offices, would tumble into ravines with as little effort as a clover burr is carried before the hydrant stream on a front lawn. Brick walls would crackle like paper and the hugest skyscrapers crumble before a stream like that of the Mill Creek plant. It takes a powerful waterwheel to withstand

the tremendous pressure. At Butte Creek, Cal., a single jet of

water six inches in diameter issues from the nozzle at the tremendous velocity of 20,000 feet a minute. It impinges on the buckets of what is said to be the most powerful single waterwheel ever built, causing the latter to travel at the rate of ninety-four miles an hour, making 400 revolutions a minute. This six-inch stream has a capacity of 12,000 horse power. The water for operating the plant is conveyed from Butte Creek through a ditch and discharged into a regulating reservoir which is 4,500 feet above the power house. Two steel pressure pipe lines, water to the power house.

### HOW TO JUDGE YOUR DOG.

Some Pointers that Will Enable On to Find Prize Winners.

. The average man is greatly puzzled to find one dog awarded a first prize, and another, which to him appears to be quite as fine a specimen, awarded no prize at all, says Answers. A man who knows the relative values of the

different points in all breeds of dogs is a veritable walking encyclopedia. Generally speaking, the best dog is

the one which comes nearest the standard of requirements for its own particular breed, about 25 per cent of the points being usually awarded for fine head proportions, an equal number for legs and feet, a similar number again for body and color, and the rest for symmetry.

while head, eyes and ears have only fif teen; the bulldog, on the other hand, has forty-five for head and ears, while coat and color amount to but five points; the collie has twenty-five for coat, color being immaterial, and twenty-five for head and ears. The St. Bernard has forty for head and ears, and five each for coat and color: the Pomeranian has but fifteen for head and ears, forty-five points going for coat, color and tail, with fifteen 14 for appearance. It may be set down as governing in all breeds of dogs that whatever is the typical feature of that ing he

SKIN DISEASES There is nothing more distressing than an itching, burn-**PSORIASIS**, ing skin disease, and upon the return of warm weather those who are afflicted with skin troubles find the symptoms appear-

SALT RHEUM feet, says the Philadelphia Ledger. This ing and know that they will be tormented through the hot summer months. The blood is heated with humors and acrid matter, and as they are forced to the surface the skin seems to be on fire. The treatment of skin diseases with external applications is all wrong, because they do not reach the trouble which is in the blood.

The most such treatment can be expected to do is, allay the itching and burning and cover up the trouble for awhile, but as soon as it is left off the disease returns.

All food taken into the body contains, in some form, the elements necessary to sustain

the different parts. One portion is used for the making of blood, another for muscle, one for bone, still another for fat, and so on. After these different properties are ex-tracted from the food there still remains a portion that is useless, or waste matter, which is intended to be disposed of through the natural channels of bodily waste, the Liver, Kidneys and Bowels. At this season of the year, however, these organs become

THE ITCHING WAS ALMOST UNBEARABLE.

ACNE, TETTER, ECZEMA,

Dear Sirs-My body broke out with a rash or eruption which in spite of all efforts to cure continued to get worse. The itching, especially at night, was simply terrible, it would almost disappear at times, only to return worse than ever. I had tried many highly recommended preparations without benefit, and hearing of S. S. S. determined to give it a fair trial, and was inexpressibly delighted when a few bottles cured me entirely, removing every blemish and pimple from my body. I shall not fail to rec-ommend S. S. S. whenever an opportunity occurs to do so. L. MARNO. Escondido, Cal

torpid, dull and sluggish, and fail to perform this duty, and these accumulations remain in the system and are absorbed by the blood to ferment and sour, producing burning acids and acrid humors. The blood cannot properly nourish the system while in this impure condition, and begins to throw off these acids through the pores and glands of the skin, producing Acne, Eczema, Tetter, Psoriasis, Salt Rheum and skin diseases of every description.

EOZEMA appears usually with a slight redness of the skin, followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, arms, legs and face, though other parts of the body may be afflicted. In TETTER the skin dries, cracks and bleeds, and is often very painful. The acid in the blood dries up the natural oils of the skin, causing a dry, feverish, hardened condition and giving it a leathery appearance. AONE makes its appearance on the face in the form of pimples and black-heads, and is particularly disagreeable because of its unsightly appearance, while **PSORIASIS**, a scaly disease, comes in patches on different parts of the body. One of the worst forms of skin disease is SALT RHEUM. It discharges a watery fluid, forming sores and producing intense itching. The head and face are the parts usually affected," and sometimes the hair falls out and a mass of sores forms on the scalp.

These and all skin diseases are due to the same cause-burning acids and humors in the blood, and until this vital fluid is cleansed and made pure they will continue. The best treatment for all skin diseases is S. S. S., a remedy that is purely vegetable, being made entirely from roots, herbs and barks, and acts directly on the blood with a cleansing, healing effect. It neutralizes the acids and purifies the blood so that the skin, instead of being blistered and burned by the fiery fluids, is nourished by a supply of cooling, healthy blood. It goes down into the circulation and forces out every particle of waste or foreign matter,

builds up the blood and cures all skin diseases promptly and permanently. S. S. S. does not leave the least particle of the poison for future outbreaks, but entirely rids the blood of the cause for all skin diseases.

S. S. S. tones up the system and regulates the Liver, Kidneys and Bowels so that they will carry off the natural waste and refuse matter through the proper channels, instead of leaving it to be absorbed by the

blood. Nothing equals S. S. S. in the treatment of these troubles and for building up the general health. Write for our treatise on skin diseases and any medical advice you wish. We make no charge for either. THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.

#### Fishing for the Octopus.

Perhaps the most unusual method of fishing is the one employed by natives of Hawaii in capturing the octopus with a cowrie shell, says the Southern Workman. One of these shells is attached to a string and placed face downward against another shell or a pebble the same size. To the upper shell is fastened a book for bait. The octopus is particular in regard to the color and decorations of the shell, refusing to rise unless this has small red spots breaking through a reddishbrown ground.

Arrived at his fishing ground, the fisher for octopus either looks for his victim with a water glass or he makes the surface clear by chewing up and spitting upon the water a mouthful of candlenut meat. Having located the octopus, he drops the shell into the water and swings it back and forth. The animal puts out one arm and seizes it. If the bait is attractive another arm is put about it and finally the shell is hugged close to his body. Then the fisherman draws up the octopus and stuns it by a blow between the eyes. He has to move quickly, for the octopus with his eight strong arms is said to be no mean antagonist.

#### The Young Idea.

A young woman who teaches a class in a Jersey City Sunday school was recently talking to her pupils relative to the desirability of increasing its membership. When she invited the co-operation to that end of the several members the youngster nearest her shook his head dubiously.

"I might git one boy in our neighborhood to come," he explained, "but all the others kin lick me."-Harper's Weekly.

When a woman goes insane, she shows great anger when talking about her husband. And, it might be added, occasionally a husband gets it from his wife before she goes crazy.

Did you ever know a man who didn't to a whole lot of unnecessary talk?
