Russian Premier Orders Governors to Preserve Order.

St. Petersburg, July 20.- White to Electric Light Wire Starts Figmier Stolypin in a telegram addressed to the governors general, governors and prefects throughout Russia and to the viceroy of the Caucasus, who are ordered to strike and spare nothing in efforts to preserve order and crush "the enemies of society." Included in this category, as shown by the events of the day, are not only revolutionists and Socialists, but also the ed

ucated Liberal and landed classes represented in the Constitutional Democratic party, whose clubs everywhere have been closed, and all the progressive newspapers, which are not permitted to lift their voices anywhere throughout the entire land.

The manifesto bears a remarkable similarity to the earlier compositions of Ministers of the Interior von Plehve before the noon hour. The fre has had slight difficulty in cutting it down, as they already had done with yesterday's imperial manifesto, into an appeal to the "League of Russian Men" and other old school Russians to rise and smite all the progressive classes. Even before the declarations of the

dissolution of the lower house of parliament, the War office had perfected its plan for handling expected disorders, both military and civilian. General Muller Fakomelsgy, who suppressed the Sevastopol revolt and co-operated with General Rennnkampf in the reduction of the Siberian rebellion last winter, was recalled from a command of a corps and placed at the disposition of the War office, to be used wherever trouble may arise. Both the government and the revolutionists expect this outbreak in the south, and that it will roll northward to the two capitals.

### ADULTERATION IN GERMANY.

Few Articles of Food That Have Not Been Tampered With.

Washington, July 26 .- German food adulteration is the subject of a report received by the bureau of manufactures from Consul General Brittain, of Kehl. Dr. Jackensck, of Berlin, states that there were in Germany in 1888 1,400 prosecutions for adulterating food producte; in 1898 the number had increased to 8.000; in"1901 to 3,585, and in 1903 to 6,000. Thirty Berlin butter manufacturers were summoned before the courts for almost incredible adulteration of their wares.

Wines, chocolate, cocoa, brandies and medicines have been discovered to contain absolutely injurious and dangerous substances used for adulteration. In fact, according to a Strassburg paper, there seems to have been very lew articles of manufactured food and drink products which have not been the subject of adulteration on the part of the German manufacturer.
