**PRACTICAL RESULTS**

Scientific soil culture is feasible,

practical, inexpensive and profitable.

A volume of testimony might be...

given. A few small bits of evidence...

are here given.

On the Burlington farm in Nebrask...

ka, 228 acres under cultivation were...

cared for in 1904, 1905 and 1906 by two...

men and 9 horses except in harvest...

time, when extra help was employed.

Net profit on this farm in 1905 was...

over \$4000, or \$11.76 per acre on the...

entire acreage of 340 in crops, meadow...

and pasture.

On the Pomeroy farm in Kansas 200...

acres were handled for 3 years with...

only 2 men and 7 horses except in...

harvest time.

Mr. Parker, in Colorado, made a pro...

fit of \$1,345 from an orchard of 1,700...

cherry, plum and apple trees and 1,400...

currants, by following soil culture...

methods.

Mr. Forbes, of Longmont, Colorado,

made a net profit of \$10 per acre on...

640 acres.

Two hundred bushels of onions were...

raised per acre from new ground near...

Ramah, Colo., and sold for \$2.05 per...

bushel.

At Grainfield, Kan., the land exam...

iner of the Union Pacific reported a net...

profit of \$18 an acre on wheat grown...

under the Campbell system in 1904 on...

\$5 land.

Herman S. Youtsey, of Colorado, re...

ports that by following the Campbell...

acre to yield an income of \$18 an acre...

in one year.

Loveland, raised 2600 bushels of tur...

key red winter wheat from 40 acres,

and Mr. Callaway, of Wray, harvested...
