English Wordsworthlans gathered the other day at the little Lefcestershire village, Cohorton, in the wildest and most romantic part of Charnwood forest, to celebrate the one hundredth anniversary of the poet's first visit to scenes where he wrote some of his most beautiful poems. Prof. Knight, one of the foremost of living authorities on Wordsworth, read a paper to the assembled pilgrims.

The first almanac printed in Europe was probably the Kalendarium Novum, by Regiomontanus, calculated for the three years 1475, 1494 and 1513. It was published at Buda, in Hungary, Though it simply contained the eclipses and the places of the planets for the respective years, it was sold, it is said, for ten crowns of gold, and the whole impression was soon disposed of in Hungary, Germany, Italy, France and England.

"H. G. Wells," said a Chicago publisher, "is a splendid novelist, but he attaches too much importance to the question of style, of finish, and not ily; "we accord you freedom to run all enough importance to the question of popularity. When Mr. Wells was over here I went about with him a good deal, and one day I showed him the magnificent mansion that one of our leading novelists owns. 'Literature,' I said, encouragingly, 'is different from what it was in Dr. Johnson's and Goldsmith's time. You could live in just such a house as that if you'd write as we publishers want you to, Mr. Wells. You could be a famous novelist, too. In fact, it is easy to be a famous novelist nowadays.' Mr. Wells laughed sourly. 'Yes,' he said. 'In the past the authors dled, but their works live. Now the

works dle and the authors live."" David Christie Murray, journalist, traveler, novelist and playwright, died in London recently in his sixty-first year, having been born in English Staffordshire April 13, 1847. Murray was a reporter in Birmingham and London in his youth, was special correspondent of the London Times in the Russo-Turkish war, and his travels in Australia, Canada and the United States were all paid for by his letters written for English papers. His list of forty-five books comprises mainly novels. He wrote too many books and too rapidly-sometimes three in a year -as, for example, in 1886, "Aunt Rachel," "Cynic Fortune" and "First Person Singular"; in 1889, "Old Blazer's Hero," "Novelist's Note Book," "One Traveler Returns"-this last with Henry Herman, of whom we know nothing ; IGATED LAND IN WASHINGTON in 1889, "A Dangerous Catspaw," "Queen's Scarf," "Schwartz," "Young Barter's Repentânce." Murray was a clever man, industrious in his calling, apt in conversation, ready in speech, making addresses on special occasions with a genial fortuity. He had shown of late a fondness for mystical speculation. His last writing was an article on "Theories of the Soul," not yet published.

Yes. 100,000 times each day. Does it send out good blood or bad blood ? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood - Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

Last summer a well-known professor with his family went to a small seaside resort on the New Jersey coast and boarded with a farmer. This year he wrote to the farmer, and in his letter he said : "There are several matters I should like changed if I board at your house again. We do not like your servant Jane and we think a pigsty so near the house is not sanitary." The farmer replied, "Jane is went and we min't had no hogs since you went last August."

How to Make a Furniture Polish. To make a furniture polish use one ounce of brown beeswax, one-half

ounce of white wax, one-half ounce of castile soap, one-half pint of turpentine and one-half pint of water. Shred the brown and white wax into a jar (a two pound jam jar will do), add the turpentine and let it stand on the stove until dissolved. Shred the soap and let it boil in the water until guite dissolved. Allow to cool, then pour into the jar and stirr all the ingredients together. When cold, it will be a thick cream and must be kept air tight. For old furniture this produces a deep, glowing polish quite different from any other, and it does not finger mark.

8 PASSENGER L

From time to time for several years reports have come from New York State, and especially from the Catskill region, that flocks of genuine passengerpigeons had been seen there. John Burroughs, the naturalist, has followed up and, so far as may be, confirmed these reports, until it seems probable that in the mountainous district northwest of Kingston there actually exists an increasing colony of birds of a species supposed to have become extinet.

In the natural history of America there is no more remarkable story than that of these beautiful birds which formerly frequented the entire central part of the continent in unbelieveable numbers. Novellsts and story-writers have frequently referred to the oldtlme "pigeon shoots," and pigeon pie was a favorite dish of our grandfathers and even of our fathers. The birds were lessened in number by indiscriminate slaughter for fifty years, a single dealer, says W. B. Mershon in his book on the pigeons, having shipped one hundred and seventy-five thousand live birds to market from a single nesting one spring, besides thousands of barrels of dead birds. This formed but a small part of the catch at that nestng.

Probably no more remarkable acsount is given by any naturalist than that of Alexander Wilson, the earliest of American ornithologists, who visited in Kentucky a nesting-place forty miles long and several miles wide, in which every tree held from one to one hundred nests, and many trees were broken down and every growing thing was killed by the roosting birds.

"About one o'clock," says Wilson,

'the pigeons, which I had observed the greater part of the morning flying northerly, began to return in such immense numbers as I never before had witnessed. Coming to an opening by the side of a creek where I had a more uninterrupted view, I was astonished at their appearance. They were flying with great steadiness and rapidity at a height beyond gun-shot, several strata deep, and so close together that, could shot have reached them, one discharge could not have failed of bringing down several individuals.

"From right to left as far as the eye could reach, the breadth of this vast procession extended, seeming everywhere equally crowded.

"Curlous to determine how long this appearance would continue, I took out my watch to note the time and sat down to observe them. It was then half past one. I sat for more than an hour, but instead of a diminution of this prodigious procession, it seemed rather to increase in both numbers and rapidity; and being anxious to reach

OLD SORES FED AND KEPT OPEN BY IMPURITIES IN THE BLOOD

Whenever a sore refuses to heal it is because the blood is not pure and healthy, as it should be, but is infected with poisonous germs or some old blood taint which has corrupted and polluted the circulation. Those most usually afflicted with old sores are persons who have reached or passed middle life. The vitality of the blood and strength of the system have naturally begun to decline, and the poisonous germs which have accumulated because of a sluggish and inactive condition of the system, or some hereditary taint which has hitherto been held in check, now force an outlet on the face, arms, legs or other part of the body. The place grows red and angry, festers and eats into the surrounding tissue until it becomes a chronic and stubborn uleer, fed and kept open by the impurities with which the blood is saturated. Nothing is more trying and disagreeable than a stubborn, non-healing sore. The very fact that it resists ordinary remedies and treatments is good reason for st spicion; the same germ-producing cancerous pleers is back of every old sore, and especially is this true if the trouble is an inherited one. Washes, salves, nor indeed anything else, applied directly to the sore, can do any permanent good ; neither will remov-

I was afflicted with a sore on my face of four years' standing. It was a small pimple at first but it gradually grew larger and wores in every way until I became alarmed about it and consulted several physicians. They all treated me but the sore continued to grow worse. I saw S. S. S. Advertised and commenced its use and after taking it a while I was completely cured. My blood is now pure and healthy from the effect of S. S. S., and there has not been any sign of the sore since S. S. cured it. THOS.OWEN.
West Union, Ohio. taints. It gets down to the very bottom of the trouble and forces out every trace of impurity and makes a complete and lasting cure. S. S. S. changes the quality of the blood so that instead of feeding the diseased parts with impurities, it nourishes the irritated, inflamed flesh with healthy blood,

Then the sore begins to heal, new flesh is formed, all pain and inflammation leaves, the place scabs over, and when S. S. S. has purified the blood the sore is permanently cured. S. S. S. is for sale at all first class drug stores. Write for our special book on sores and ulcers and any other medical advice you desire. We make no charge for the book or advice.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

Oranges. This is the West Indian way of preparing oranges for the table : Peel the oranges, taking off as much white skin as possible; then slice them off all round as you would an apple, regardless of the sections. This leaves the seed, tough, stringy central part and most of the inner skin together and is a much less tedious process than removing the skin by sections. Use a very sharp knife, so as to make clean cuts and not crush the fruit.

Breaking It to Him.

"Doctor, 1 suppose I'm an old fool, but I have made a discovery that gives me some uneasiness."

"What is it, Kadger?"

"I was passing my hand over my head the other day, and I found one place that's a good deal hotter than any other spot. I thought it was all imagination at first, but it isn't. Put your hand on the top of my head, pretty well back. There, that's the place. Doesn't it feel hotter than the rest of my head?"

"It certainly does."

"Well, now, I am anxious to know what that means. If it indicates that there's too much brain pressure at that particular spot, I want to know it. Is it serious?"

"Kadger, it is."

"I feared so. Tell me the truth, doctor, no matter what it is."

"I hesitate to tell you, because-"Doctor, I insist on knowing."

"Well, if you must know, Kadger, that particular place on your head feels hot to your hand because you're getting a bald spot there."

A Lost Dollar.

A missionary bishop told at a dinner in New York, according to the Sun, this story about F. Marion Crawford, the famous novelist:

"Mr. Crawford went to school," he said, "in Concord, and one day he was taken to call at a Concord clergyman's. The clergyman had a missionary box on his drawing room table, and, time hanging heavily on the boy's hands, he amused himself with trying whether a sliver dollar-it was all the money he had in the world, and he had converted it into that gigantic coln for safetywould go into the slit in the box's top. It was a close fit, but unfortunately it did go, and the coin slipped out of the embryo author's fingers. There was a terrible crash of silver falling among the coppers, and then the boy, as the novelists say, 'knew no more.' When he came to himself he found the clergyman and his friends in raptures over his generosity."

Different. "Everything she tells you is an ex-

aggeration." "Did you ever ask her her age or the size of her shoes?"-Bon Vivant.
