Still in Process.

A New England man, lately returned after his arrival, and from whom he derived great amusement during his stay In the South.

The man was lying in his hammock on the hotel plazza one day, and opened his eyes after a drowsy period to find a small, coal-black boy regarding him solemnly, a tall glass of some cooling drink on a tray held tightly by both hands

"Who are you?" asked the invalid. idly; but there was no reply save a broad smile.

"Where were you raised?" inquired the invalid next, with a vague idea that he had heard that was the usual opening question.

There was another broad smile, but out of the midst of it gurgled the reply : "I ain't done raised yet, sah."

Uncle Ben Liked Her. A Kansas City girl recently married a rian who lives in one of the smaller near-by towns and went there with him

products of actual excellence and to live. The bridegroom was naturally enger that his relatives should like his bride and as one, an old farmer, voiced no complimentary opinion in his hear ing he at last asked:

"Uncle Ben, what do you think of my wife?"

"Wa., for a fact, George," responded needs to be five feet four inches long, the old fellow, "you shore outmarried and from the right end to the first pulyourself."-Kansas City Times.

Four Horse Evener.

One of the simplest forms for fourhorse evener is shown in the illustration which is self-explanatory except from a year in South Carolina, tells of trees of ordinary plough length, and the stick of tough oak from which to make the evener, two pulleys large enough so a small link log chain will work through them, two bolts fo bolt the pulleys on and two pieces of twoinch wide strap iron bent and used as braces for the pulleys, are required. These pieces of strap iron had better be holted, also. Their use is to furnish a brace for the pulleys. Any small link log chain can be used, and if too long it can be wrapped around the plough where hitched. Now for the measurements. In the first place, the stick

SIMPLE FOUR HORSE EVENER.

ley it is just seven inches. This measgrement is to th center of the pulley, From the center of the right pulley, In some of the cantons of Switzer measure fifteen and one-quarter inches opposition, the referendum was incor place where the second pulley is to be the left team is hitched, it is best to bore about three holes, and you can "Say, I hear somebody in this crowd fasten the doubletrees in whichever said I was a llar," blustered the vil. hole which seems best suited to the there is not too much slack when turning to the left, and hitch it to the bully, as he hurriedly backed away, plough back about where the coulter Keep your clothes on; I didn't say I runs, or where experimenting tells you is the best place,-Montreal Star.

Poultry-House Lice.

Turn out the fowls some days and close all the cracks in the house except the door. Take a kettle of live coals, and place on the ground in the center of the house, but if there is a wood floor, lay a flat stone under the kettle. Throw a half pound or a pound of sulphur on the coals, and shut the door. If the house is left closed for a few hours it is safe to conclude that no lice or mites will be found therein after the operation. The sulphur cure is the best method of ridding poultry houses of pests, but if the house is not tight it will not prove satisfactory. Clean the house as well as it can be done, mix whitewash with fresh lime. mix in a liberal supply of sulphur, after which throw sulphur into all the cracks. Apply kerosene oil to all the roosts, and burn off the outer surface. Air the house thoroughly,-Weekly Witness.

Salt as Mangel Fertilizer.

The value of salt as a manure for mangels has often been demonstrated. and the demonstration was repeated at Woburn last season. About fifteen tons of farmyard manure were applied to four plots, and this appeared to be sufficlent to produce nearly as much as could be grown on the soil of the field. One plot had also a top-dressing of one hundredweight of nitrate of soda, which very slightly increased the yield. Where one hundredweight of salt was added there was a further increase; but where the quantity of the ultrate was doubled, without salt, the yield was reduced .-Agricultural Gazette.

Worms in Colts.

For intestinal worms in colts the following mixture is used by some veterinarians: Mix together as a base one pound each of salt and granulated sugar; in this mix one-half pound of tobacco dust or fine cut tobacco, four ounces of sulphate of iron powder, six ounces of powered worm seed. Give a heaping teaspoonful in the feed at first keep it up for three weeks.

Fresh Eggs.

Secretary Wilson says that hereafter egs sold as "fresh" or "strictly fresh" must be exactly what they are represented to be. Storage eggs must be sold as such, or under the pure food law the dealer is liable to a fine of \$500 or six months' imprisonment, or both. Thousands of people do not know how a "strictly fresh" egg tastes. This will give them a chance to find out

will take them dry, which is usually at about three weeks of age. As the calf grows older encourage big eating in order to secure good storage capacity. and with sound and nutritious foods stimulate both digestion and ability to

By rich cream we have commonly come to understand to mean milk rich in butter fat. It is admitted that milk richest in butter fat is also richer in casein; and, while an excess of butter fat is not likely to disarrange the stomach of the calf, an excess of caseln will. Therefore, allowing the milk to cream, and removing this to reduce the richness of the milk to the needs of the calf, is an aggravation rather than a modification, for by the skimming process the proportion of casein has been increased. while the effort that should have been made should have modified the casein. This can be accomplished by simply adding water to the whole milk, mainfaining blood temperature.

The Age of Sheep.

The age of sheep is very easily shown by an examination of the teeth. A lamb has the first pair of permanent front teeth when about 10 months old; the second pair appears at about 18 months; the third pair at 28 months and the fourth at about 33 to 40 months. When the whole of the permanent front teeth have appeared the sheep is in its fourth The Merino matures its teeth weter than the other breeds; the Cotyrold and Southdowns and other highly-improved mut-

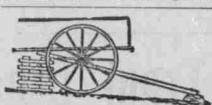

ton sheep are some months ahead of a Merino, but at 4 years every sheep has its full mouth of teeth. Later the age is known by the appearance of the teeth, which gradually lose their sharp edges and become worn down smooth. A healthy sheep will keep its teeth good until 10 or 12 years old. if the pasture is not unusually bare and the soil sandy, so as to wear the teeth excessively.

Sheep as a Civiliser.

A speaker at a farmers' meeting eulogized the little animal with the golden hoof in the following interesting strain .

"Sheep are always the advance guard to attack new and undeveloped territory. The first sheep and the first negro slaves that placed foot on what is now the United States of America, lage buily, approaching a group of team. Bore the first hole about two were landed from the same fleet at St. men he thought he knew. "Where's and one-half inches from the end, then Augustine, Sept. 5, 1565, 330 years ago. go two inches and bore another, and From that day to this the sheep has "I guess maybe it was me," quietly two inches from that, if a third hole is been the most universal live agent of **joined a husky stranger, who meast wanted. This evener will work one the settlers in subduing the country ared fully six feet and looked to be horse in the furrow and three on the and maintaining its productiveness; stronger than an ox, as he pulled off plough, and there will be no side draft. and whenever they have neglected them Hitch the chain up pretty short so sterility exists as a monument to their folly."-Weekly Witness.

To Lift a Londed Wagon. Build a grip of timber under a wagon and place upon it a heavy beam, as shown in the sketch. Let this come just under the axle of the wagon. Then

HANDY FOR OILING AXLES.

place a stone in front of the wheel, so that when the team draws the wawon forward the wheel will be lifted upward on the inclined beam. If the incline is not to much the wagon will not slip backward and the wheel will be loose for oiling .- Farm and Home.

Australia's Rubbit Pest.

In 1852 two rabbits were imported into Australia. Their descendants in that continent now number billions and are a great pest. Five rabbits eat as much grass as one sheep. From 1878 to 1888 the Australian government paid \$5,888,014 as bounty for the noxlous animals, at the rate of 25 cents each, and from 1883 to 1886 \$2,200,000 for the same purpose. For some years the rabbits died by millions, owing to the drought, but since 1904, with the rainy seasons increasing, they have again come into notice and bid fair to become as great pests as in the past.

Looking Forward.

Luther Burbank, the famous horticultural wizard, says there is not a weed alive which will not sooner or later respond liberally to good cultivation. A day will come when the earth will be transformed, when man shall offer his brother man not bullets nor bayonets, but richer grains, better fruit and fairer flowers.

Poultry Pickings.

The heating of the brooder plays a very important part in the growth of the young chicks,

The fowls and eggs from a pure bred once a day, then twice per day, and flock of hens will bring more money on account of their uniformity. A good brooder is of more import-

ance than an incubator, if one can be of more importance than the other. There is nothing that fits into the regular farm crops and live stock bet-

ter than a well managed flock of poul-Do not expect to find smooth salling with the incubators and brooders at first. It requires patience and vigilance

in learning to manage them

S.S.S. NO MERCURY

Medicines containing Mercury are often given to persons suffering with Contagious Blood Poison, and so powerful is the action of this drug that it frequently removes the symptoms in a short while, and shuts the disease up in the system to do greater damage to the delicate internal members. When, however, the treatment is left off, the disease always returns, and the patient finds that his health has been injured by this powerful mineral, and he is often left with weak stomach, disturbed digestion, mercurial rheumatism, etc. The action of S. S. S. is entirely different. It contains no Mercury, nor any other harmful drug, but is made entirely of healing, cleansing roots and herbs. It cures Contagious Blood Poison by removing the virus from the blood. It searches out every particle of the poison and does not leave the least trace for future outbreaks. S. S. S., in addition to curing the disease, builds up and strengthens every part of the body. Its fine tonic effects tone up the stomach and digestion, improve the appetite and regulate the entire system. Home treatment book containing valuable information about the different stages of the disease and any medical advice desired sent free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA. GA.

KASPAHILLA

This sterling household remedy is most

successfully prescribed for a "world of troubles." For derangements of the di-

gestive organs it is a natural corrective,

operating directly upon the liver and alimentary canal, gently but persistently stimulating a healthful activity. Its

beneficial influence extends, however, to

every portion of the system, aiding in the

processes of digestion and assimilation of

food, promoting a wholesome, natural

appetite, correcting sour stomach, bad breath, irregularities of the bowels, con-stipation and the long list of troubles directly traceable to those unwholesome

conditions. Kasparilla dispels drowsi-

ness, headache, backache and despond-

kidneys and digestive tract. It is a

strengthening tonic of the highest value.

If it fails to satisfy we authorize all

ency due to inactivity of the liver,

Delay in Divorces.

"The underlying reason why so much time usually elapses between the filing of petition and the hearing or trial in divorce proceedings is not generally understood," remarked a lawyer who makes a specialty of this character of practice. "Perhaps it is within the circle of truth to say that in a majority of cases, if either husband or wife, whichever side be plaintiff, should 'stop, look, and listen,' as it were, the trouble would be adjusted out of court entirely.

"As a rule, judges are inclined to afford ample time for domestic partners to ponder well before pursuing further toward legal redress for matrimonial difficulties. 'Divorce in haste and repent at leisure' is a logical paraphrase. Of course, if after mature reflection a different opinion does not ensue, the average jurist would favor progressing the suit."

In Due Form.

Orlando Spoonamore had proposed. "I shall have to refer you to papa," said the young and lovely Clarinda Hewli-Orlando reflected.

"Yes," he said, "I suppose that is the

correct procedure. I take the initiative and you order the referendum."-Chicago Some Satisfaction in That.

Mrs. Hewligus-You say that if a

burglar wants to get into the house he'll get in in spite of everything you can do to keep him out. Then what is the use of your taking so much pains to fasten all the doors and windows?

Mr. Hewligus-I want to give him all the trouble I possibly can, blame him !-Chicago Tribune.
