Working For Irrigation For This Section

ACTUAL CONSTRUCTION MAY NOT BE FAR DISTANT

Promoter Assured Of Being Granted
The Use Of Crescent Lake For Storage Purposes

The irrigation project, of which the Northwestern portion of Crook County is a part and the principal objective point, is assuming proportions which indicate that preliminary work will probably commence in the not distant future, possibly not farther off than 90 days. Ruel Rounds, of Boise, Idaho, one of the promoters of the project, was in Madras several days this week and prepared a petition to Senator Chamberlain now at Washington, which he will be asked to present to the Interior Department, stating that this community in general desires to have irrigation. Crescent Lake seems to be the most desirable place for securing a sufficient flow of water and best suited for using as a reservoir in which to store the water, this supply and reservoir being necessitated from the fact that all of the Summer flow of the Deschutes has been filed up on above Cline Falls, the season in which the water would be needed for irrigation.

The petition has to do with a conflict in water rights in which application had been filed with State Engineer Lewis by Harry J. Hunter, representing the Oregon Central Military Land Company, who asked to use this water supply exclusively on their own lands. This application seems to have been very incomplete as no maps were filed of the survey, and, in accordance with the state law, the time limit for making such filing having expired, it is probable that this conflict will be easily eliminated. The application of Messrs. Rounds and Rogers was complete in every detail, and there is practically no question but that it will be granted as soon as the Interior Department can pass upon the matter. Crescent Lake being in the forest reserve and also having been withdrawn in connection with the Klamath project, has necessitated the filing of maps with the Lakeview land office, which has been done, and a receipt has been issued therefor.

Assurance is given by Messrs. Rounds and Rogers that as soon as the application is granted the preliminary engineering work will be commenced, and this will be followed by actual construction as soon as is practical.

THE POPULAR CANTATA "Little Red Riding Hood"

The most famous of children's stories dramatically presented by 20 children under direction of the Ladies Aid Society of the M. E. church on

Wednesday, March 9

WORKING FOR OPENING OF THE RESERVATION

Portland Telegram
Portland commercial organizations will be asked to urge members of the Oregon delegation in Congress to initiate and support legislation by which lands included in the Warm Springs Indian reservation shall be thrown open to settlement. Agitation on this subject was started yesterday and immediate steps will be taken to enlist the co-operation of the commercial bodies towards having the lands surveyed and withdrawn from the National reserve.

The withdrawal of these lands from the reservation and throwing them open to actual settlement are regarded essential to the further development of the state. It is contended by those who would have the lands made available to homeseekers that their further retention in the reserve is operating only to retard the development of that section of interior Oregon contiguous to the reservation.

According to the records in the office of the Surveyor-General, the Warm Springs reservation embraces 600,000 acres. Of that area 315,860 acres have been surveyed, leaving 284,140 acres of unsurveyed lands within the boundaries of the reservation. Of the surveyed lands 100,000 acres are tillable, while the remaining 215,860 acres are valuable for grazing.

Before the unsurveyed portion of the reservation can be made available for settlement, this area will necessarily have to be surveyed. It is in completing the survey of the lands within the reservation and the enactment of legislation by which the entire reservation can be thrown open to settlement that considerable time will be required. This suggests that immediate steps be taken to start the proceedings.

The Indians do not seem to have so much objection to the opening of the reservation as they do to the thought that they may not receive their full compensation for their fishing, timber and other rights, as well as to the fear that they may not receive proper allotment when the Warm Springs reservation is cut up.

Much preliminary work must be done before the reservation can be opened, inasmuch as not over half of the total area has been surveyed. This, because of the red tape involved in getting such work undertaken, will likely consume a year or two and by that time the Indians will probably have their personal desires adjusted so that a satisfactory delegation may be sent to the National capital. Assistant Superintendent Campbell, of the Chemawa school, is in Montana at present, and will not return for a week or so and there is little chance of definite action until his return and the complaining Indians have had a consultation with him.

BELLIGERENT STAGE DRIVER BOUND OVER

Lloyd Johnson, the stage driver that made the gun-play at Heister last Saturday had a preliminary hearing the first of the week and was bound over to the May grand jury in the sum of \$2500. He is charged with assault with a deadly weapon with intent to kill.

Johnson had been drinking freely on his trip from Shaniko to Prineville, and G. H. Russell, a Tacoma horsebuyer, remonstrated with him. Words led to blows and blows led to the shooting.

J. T. Scott, the Madras stage driver, who loaned Johnson the revolver with which the shooting was done, was held as an accessory to the shooting and was bound over to the May grand jury in the sum of \$2000. Bonds have not yet been furnished for either of the prisoners.—Prineville Journal.

CENTRAL OREGON HAS MUCH STANDING TIMBER

In the January Timberman an estimate is made of the pine timber that is opened by the Central Oregon railroad work that is now in progress. On the reserves and private holdings, it is stated that Klamath County alone has 40,000,000,000 feet of timber, much more than has been credited to the Klamath district. The pine belt is given a length of 200 miles, with average width of 50 miles along the eastern slope of the Cascades. Taking the timber that is in Lake and Crook counties, and that portion of the Blue and Strawberry Mountain ranges that will be marketed toward Central Oregon, the total is believed to easily reach 100,000,000,000 feet, board measure, of yellow pine.

LAW AND ORDER PEOPLE HAVE CONVENTION

The Law and Order Leagues of Crook County held their first convention last Thursday and Friday at Madras, holding four sessions, which were well attended by residents of this vicinity and from other portions of the county. Papers were presented on several different phases of the work at the sessions, during which many valuable suggestions were made for furthering the work. These addresses were followed by open discussion, when different experiences relating to the law and order work were given, these discussions containing many useful thoughts adaptable to helping the movement toward better citizenship.

A business session was held Friday afternoon at which the W. C. T. U. and the Farmers Union were represented. Another convention of the league will be held in a short time either at Prineville or Redmond.

Among the visiting delegates present were Rev. J. D. Lewellen, J. M. Street, Gardner Perry, R. Ketchum of Prineville, and Mr. Baker of Redmond.

CHIEF ENGINEER ON OREGON TRUNK PROMOTED

Portland Telegram
George A. Kyle, chief engineer of the Oregon Trunk, has been elected vice-president and general manager of the new Hill line to succeed the late Jackson Smith. Kyle has had been associated with Mr. Smith in the construction work ever since the Oregon Trunk began throwing its line up the Deschutes River canyon and even before that time, in location work. Mr. Kyle has had wide experience in railroad work in the Northwest, having been in the thick of the battle when the North Bank flung its bands of steel along the Columbia River gorge in the face of bitter Harriman opposition, opposition no less strenuous than that which had to be contended with when the race into Central Oregon began between the Hill and the Harriman forces.

Another brilliant and noted, railway construction engineer comes to Portland to take the place left vacant by Mr. Kyle. He is Ralph Budd, who has had years of training with some of the great trunk lines in the Middle West and was for some time chief engineer of the Panama Railroad under the civil administration of John F. Stevens, who is now at the head of the Oregon Trunk. Mr. Budd comes here upon invitation of President Stevens, who regards him as a man admirably suited to take up the duties laid down by Chief Engineer Kyle.

FLOURING MILL AND FEED PLANT FOR BEND

Bend Bulletin
The first manufacturing industry to locate in Bend, aside from the sawmills, will be a large flouring mill. Charles I. Bozell of Portland was in Bend the first of the week, and completed arrangements for building a flouring mill at this place. Mr. Bozell will return to Bend about the middle of next month and take up the active construction of the plant.

"The mill that I will build," said Mr. Bozell, "will at first have a capacity of 100 barrels a day, but the building will be constructed of a sufficient size so that the daily capacity can be increased to 250 barrels by putting in additional machinery. In addition to the manufacture of flour, we will have a complete feed grinding plant, and will also manufacture several of the popular cereal breakfast foods. I now have all the machinery at Portland, and will have it in Bend as soon as I can get the building ready."

The mill will be built a short distance down stream from the present power dam. Mr. Bozell has made arrangements with the P. B. D. Co. and will conduct the water from the dam to the mill and will put in his own power wheel. The building will comprise a basement, three stories and an attic. The Bend Board of Trade has agreed to furnish right of way for a switch from the Oregon Trunk Line to the mill.

This industry will be of untold value to this entire section. Mr. Bozell stated that when transportation is provided and the mill running to full capacity, it will consume 150,000 bushels of wheat annually, besides what will be required in the manufacture of breakfast foods and stockfeed.

BILL PASSES FOR CELILO BRIDGE

WASHINGTON, Feb. 21.—The House of Representatives today passed the bill introduced by Representative Ellis authorizing the Oregon Trunk Line to build a bridge across the Celilo Canal and the Columbia River, in order to connect with the North Bank Road, opposite the mouth of the Deschutes
