### **ADDITION** MADRAS, T0

We have sold 31 of our Second Fifty Lots. Soon as 19 more are sold we will raise the price.

It looks as if something would be doing in Madras before long. I look for big advances in real estate soon. We are still selling more lots than the Townsite and all other Additions combined. The public knows which is the best property.

The map shows the present business center at 5th and D streets. The new business center will be 3rd and G streets. The Depot, lay of the land and general conditions will make it.

We are more certain than ever that Madras will be the largest town in Central Oregon. Larger acreage of fine land than any other place, good prospects of COAL within 10 miles, finest prospects of OIL and GAS in the town and to the south. TIMBER within 15 to 20 miles, all of which will be marketed through Madras. AN EMPIRE TO DRAW FROM.

### Depot Addition the Best of Madras

Every lot perfect. Look at the map! Let me show you over the ground. YOU WILL DOUBLE YOUR MONEY before second payment is made.

### New Prices from \$55 to \$275 per Lot

We are yet selling at about 35 per cent of what the Townsite company is selling at, and better ground, better conditions. Look and think for yourselves.

Terms: One-fifth cash, balance 3-6-9-12 months. Five per cent off for cash.

Office, Old Postoffice Building.

es are often ledges, or more than \$500. ches, of rock that tower perdicularly for many feet. At point where the Davenport istenson pump is installed it ecessary to raise the water feet over four perpendicular es, the highest of which is Mr. Davenport, who was it required some nerve for undertakink but that the ilts obtained were worth y times the cost. This hod of getting water on the insula and Opal Prairie, that it has been demonted to be practicable, will ve of great value to the ners all along both rivers. he undertaking, when comiced last fall, looked like a

mmoth job. The hardest

was to get the necessary

erials where the wheel was

to be installed. All the material was lowered from the plain edge. A wheel was built seven feet in diameter and two feet, eight inches across the face. The other machinery and flume were then arranged and securely fastened to the rocks to prevent them from being damaged OFFICIAL DIRECTORY or washed away by high water. Eleven hundred and sixty feet of pipe are used in making the raise of exactly 625 feet.

As the work proceeded farmers throughout the entire section became interested and as the final adjustments were being made they watched the work with much concern. On Saturday, last, everything was in readiness and the water was turned over the wheel. As the M. Davenport and Neil pump commencen to work the stenson have just complet- pipe filled and then water pumping plant which raises poured onto the plains above. er from Crooked River by As if to christen the successful as of an overshot water enterprise, Mr. Christenson, who and supplies their home- was at the mouth of the pipe, is on the Peninsula for do- caught the first water that came ic purposes.
