Dr. Schaeffer is himself a keen student and observer. He has profited by his years of experience since his connection with the public schools of meats, eggs come in handy these days, the state and he knows whereof he speaks, says the Philadelphia Inquirer. But his opinion in this respect is not the result of deductions on the part of one man alone. There are many others who think with him, some of whom have so expressed themselves and others who, while convinced themselves, are too timld to take a de-

Education is, in the last analysis, only a means to an end, a process of gradual mental development, a plan by which each day the mind is broadened. To expect a child to pass successfully on details which it has used only as mental food and forgotten for five, six, seven or nine months seems not only unjust, but ridiculous. The consequence is that as examination time approaches there is a cramming of matter into the mind, mental indigestion ensues and, not infrequently, even the brightest students are injured physically.

> In the big world where results count, a man is not examined at the end of each year as to his work during the past 12 months. The caliber of his work and endeavor at the end of each day is what counts, and so it should be in the prepration for this real
