## CAR FERRY SINKS; 30 PERSONS PERISH

Ludington, Mich, Sept. 10 .- Thirty lives were lost today when Pere Marquette ferry No. 18, bound from Ludington to Milwaukee, went to the bottom of Lake Michigan. The dead include Captain Peter Kilty, of Ludington; S. F. Sezepanek, of Chicago, purser and wireless operator, whose signals of distress brought assistance to the sinking steamer, and two members of the crew of car ferry No. 17, who lost their lives in an effort to rescue the crew of No. 18.

Ely Colbean, of Saginaw, Mich., a member of the crew of No. 18, would against the growth of modernism in make the 31st victim, but it is believed he was not on board when No. 18

> At 4:30 o'clock word was sent to Captain Kilty that his boat was rapidly making water aft and that the pumps were unable to keep even with the inflow. Kilty headed his ship with all speed toward Sheboygan on the Wisconsin shore, and as the water gained nine cars were dropped off the stern of the ferry to lighten her, but this gave the vessel only slight and temporary relief. At 7:30 a. m. the boat's buoyancy could no longer sustain it, and she plunged beneath the

#### DREDGE NEARLY READY.

#### Dipper Dredge No. 1 to Begin Operations on Clatskanie Next Week.

Portland-By the end of this eek it is expected that repairs to Dipper Dredge No. 1, belonging to the United States engineering de-partment, will be completed, and she will be ready to begin operations either on the Clatskanie river King, Ontario; Sid Knight, Sheville; or on the Lewis river. Derrepairs preparatory to taking up the work of improvements on several of the tributaries of the Colum-She has had a new boom buckets and new spuds installed, and her engines have been over-hauled. She will be sent out as soon as the repairs are completed.

It has not been decided whether she will proceed first to the Lewis river or to the Clatskanie, but it is thought probable that she will work in the channel of the latter river first. This year's appropriation for the work on that river amounts to \$5200, and the dredge has about six weeks' work ahead of her there, as she will work on the channel from the town of Clatskanie to the drawbridge of the A. & railway, a distance of about a mile. She will remove about 20,-000 cubic yards of material from the channel. The appropriation for the Lewis river was \$2500 for maintenance.

No work will be done this year on the Cowlitz river, as both the engineers and the people of Kelso are of the opinion that it will be better to await the next appropriation, which, added to the present one, will allow better work to be done in the way of improving the channel.

## INDIANS TO IMPROVE CATTLE.

#### Government Makes Second Shipment of Thoroughbred Stock.

Klamath Falls-Indian Agent Ed son Weston is here to receive 100 head of fine pure-blood Hereford and Shorthorn bulls, which are to be issued to the Klamaths by the government.

The cattle were purchased in Nebraska and shipped from South Omaha, and are to be distributed over the Klamath Indian reserve by Agent Watson, where they are most needed by the Indians in raising the standard of their stock. These bulls will be issued free to the Indians, but they cannot dispose of

At the Bonneville hatchery, work on the retaining ponds, funds for which were subscribed by the cannerymen and packers along the Columbia river, s progressing rapidly. The hatchery building, troughs and baskets have also been thoroughly overhauled.

At the McKenzie river hatchery, the egg-taking season is at its height, and 339,000 Chinook eggs have been seed cars, at \$100,000 to \$150,000. The Wallowa river hatchery, like the McKenzie, is feeling the effects of the long dry spell.

The hatchery work of the Salmon river station has been interfered with somewhat by forest fires, but no damage has been done to the state's property. Superintendent Holcomb reports that 250,190 early Chinook eggs have been taken there. Improvements have been made to the hatchery on the Trask and repairs have been made to the permanent trap and rack at the Yaquina hatchery, which was washed away in freshets last year. The Alsea river hatchery station is merely an experimental station and is located about two miles above the head of tide on Bear creek. Everett E. Cook has been placed in charge as superintendent.
