MAIN STREET IMPROVEMENT

Gutter Drain Al-
most Finished

LUMBER FOR SIDEWALKS

Has Been Ordered—Gas Lamps
Will Soon Light Street
At Night.

The work of constructing the gutter drain to grade on Main Street was taken up the last of the week and will be completed in a short time. The Oregon Trunk engineering department put on a crew and set the stakes and the street committee of the city council lost no time in putting workmen on the job. This will insure that the streets will be in better condition the coming winter than ever before, and the improvement is viewed with satisfaction by every citizen.

But this is not the best part of it. The council has ordered 13,500 feet of lumber for the construction of cross walks and sidewalks, a portion of the lumber

now being on the road in from the sawmills. The sidewalk grade is to be established and the construction of sidewalks ordered at once. Where the property owners fail to provide the improvement the city will build the walks and assess the costs against the property. The plan at present is to order the construction of walks from the foot of the hill south of Hahn's store to about a half block north of the bank and Hotel Madras, on both sides of the street. The ordinance recently passed by the city council regulating the construction of walks on this street requires that they be built of lumber two inches thick, six inches wide, laid on five stringers, the walk to be 8 feet wide. The cross walks are to be 4 feet wide.

Progress has also been made in the matter of installing the six large gasoline lamps on Main street. Prices have been received from two supplying firms, and the order will be forwarded right away. The plans for swinging the lights now is to suspend them from arms on poles, instead of attempting to put them over the middle of the street. With the street drained, sidewalks and cross walks built and first-class lights in the business part of the town it is believed that the council and the people will begin to realize the value of these things and that civic pride and real town building will take front place at Madras.

MADRAS MAN AFTER THE CUP

Goes to Spokane
Exposition

WITH DRY FARM EXHIBIT

Will Compete for Silver Cup
Offered by The Portland
Commercial Club.

Tillman Reuter leaves Friday for Spokane with his dry farm exhibit which he will enter in the competition at the Dry Farming Exposition for the silver cup offered by the Portland Commercial Club for the best dry farm exhibit grown by an Oregon farmer. Mr. Reuter's exhibit comprises about 80 specimens of grains and vegetables produced by him on his dry farm near Madras. Besides his own individual exhibit he will also take along for show a few specimens grown by others. His exhibit will weigh in the neighborhood of 700 pounds, and the reason he is making such an

Spokane show. He has been appointed by the county court as a delegate from this county, as was also G. Springer of Culver.

Besides the exhibit he is taking to Spokane, Mr. Reuter has a duplicate exhibit which he will take to the county fair at Prineville next month.

EXCAVATING PUMP PIT AT METOLIUS WELL

Drilling at the Oregon Trunk well at Metolius has been suspended this week while a pump pit nine feet in diameter and sixteen feet deep is being excavated at the surface. At a depth of 875 feet a layer of boulders and other caving material was encountered and it will be necessary to put in ten-inch casing in order to proceed with the work. The casing is now arriving and will be put in as soon as the pump pit is completed. When the well which is being drilled for the railroad company is finished the drillers will begin on two wells for the Metolus town-site company for a city water supply. These will be drilled at points about three thousand feet from the location of the railroad well.

PRISONER RESISTS, BIG FIGHT FOLLOWS

Marshal Culp had a lively time with some railroad laborers on the street last Friday afternoon. He started for the lock up with one man who was behaving disorderly when the man turned on him for fight. Other members of the gang butted in to help the prisoner, while several volunteers rushed to the assistance of the marshal. There was a free for all fight for a few minutes, the dignity of the law finally prevailing. Next morning three of the troublesome ones were brought before the recorder and fined a total of \$150, on the charge of resisting an officer. The fines were paid.

DR. HAROLD CLARK STUNG BY SCORPION

Dr. Harold Clark was stung by a scorpion the other morning which had crawled into his trousers during the night. When the doctor put on the garment the reptile got his work in just above the man's knee. Carbolic acid was immediately applied to kill the poison, although a knot as large as a hen's egg raised where the bug made the injection. Since the swelling disappeared there is a sore spot the size of a dime to commemorate the event.

DEATH OF MRS. CURTIS

Mrs. Burrie Curtis, formerly Miss Burrie Eagles, died last Tuesday night at Centralia, Washington. Charles Eagles, her brother, left here last Sunday night, having been advised of her serious illness. William Eagles, an uncle of the deceased, and his daughter, Mrs. Silas White and Mr. White left here last evening to attend the funeral.

WAREHOUSES CROWD ROOM

Madras Will Have
Many

BIG SHIPPING FACILITIES

Oregon Trunk May Enlarge
Plans To Provide More
Industrial Trackage.

The local office of the Oregon Trunk is being flooded with applications for warehouse sites at the station grounds in this city, and Engineer Griswold is doing his best to get these affairs straightened out to the satisfaction of all.

The local Farmers Union were among the first warehouse companies to apply for a warehouse site, and they have been endeavoring this week to determine upon a location so as to commence work at once. It is understood that all that remains to be done is to get the approval of the manager of the Oregon Trunk for the lots selected. The Farmers building will be 66x250 feet and will be built somewhere in the Madras yards. Much of the material is already piled on the yards. Madras businessmen raised \$300 in about half an hour Monday evening to insure the erection of the building at this place, as the site available made the cost of the foundation more than the farmers had calculated upon.

Four applications each for sites with 250 foot trackage have been received from outside companies, whose identities are not given out. Mr. G. W. Harris is here today representing one of these companies. He states that his people will build a warehouse 250x90 feet.

The demand for warehouse room at Madras has so far exceeded what the Oregon Trunk people estimated would be required that it is likely that the railroad company will have to extend their industrial trackage and enlarge the plans for the Madras station grounds.

Madras is readily recognized by the big concerns to be the future shipping point for all the north part of Crook County, hence the scramble for warehouse sites as the date for the arrival of trains at this point draws near.

A conservative estimate of the amount of wheat harvested in the Madras section this year places the total in the neighborhood of 1,000,000 bushels. As soon as warehouse accommodations are provided, the growers can haul their grain in and put it where they can realize upon it. Present activities would indicate that there will be facilities for handling great quantities of freight at this place as soon as the trains arrive here to haul out the grain and other products.

New Umbrellas and Sunshades

We have just received a large shipment of umbrellas, suitable for all kinds of people and all kinds of weather. Positively the largest assortment ever shown in Madras, at prices that will tempt the most fastidious customer to buy. Do not miss this opportunity to save money. Call and see our line.
