

# Tum-A-Lum Lumber COMPANY

Having completed our lumber sheds we are now in shape to carry all the different grades of kiln dried flooring, ceiling, rustic and shiplap. We aim to carry a complete stock in every detail found in a retail lumber yard. Dimensions in all size timbers, sash, doors, mouldings, shingles, lime, cement, posts, wood and coal.

When it comes to roofing we have one that has stood the test for years, Malthoid, which needs no introduction. We are here to accommodate the people and would be pleased with a share of your patronage. Phone at your service.

## PLOWING WITH DYNAMITE.

Bang, Bang! Will Resound Over the Farm as Gee-haw Once Did.

In places where irrigating is carried on extensively, says the booklet "Increase the Crop," got out by the Pennsylvania railroad, the ground sometimes becomes so saturated that the water level rises close to the surface. This makes the land practically worthless for vegetation of any kind other than pasturage. If alkali exists in the soil or is deposited by irrigation no crops can be raised when the ground water reaches the level of the plant's roots.

In some parts of the country ridges or dikes are run at regular intervals over all of the higher ground to keep the thin surface soil from being washed away. Considerable time and labor are required to make these dikes as well as to keep them in shape, and they take up ground that should be bearing crops. On land of this kind drainage, irrigation, dikes, late plowing and rotting seed could all be done away with if the subsoil or hardpan were properly broken up.

There is only one practical way to upturn and aerate these lower soils or to shatter hardpan, and that is by blasting.

Subsoil and hardpan can be plowed just as effectively with explosives as

GIANT CORN PRODUCED ON ELASTED GROUND.

[From "Increase the Crop."] surface soil can be with a plow, and just as cheaply, too, for it is only necessary to do this subsoil plowing once in a number of years.

Blasting subsoil has been practiced for some years by a few progressive farmers in different parts of the country. These men have had wonderful results in the way of increased crops on land already under cultivation and in transforming into excellent growing land that which would have been worthless without dynamite.

It is only lately, however, that the benefits from plowing with dynamite have become generally recognized. The department of agriculture, the various agricultural colleges and men prominently identified with farming in different parts of the country are all now making a careful study of this question in order to determine the strength, quantity and kind of explosives, the most effective way of using them and the depth and spacing of the holes for best results. Farmers everywhere are experimenting on their own account. Many are already claiming that subsoil plowing with explosives will be a common custom in a few years and will represent millions of dollars in increased crops from lands already under cultivation and more millions from land now producing nothing but weeds and considered entirely worthless.

The man who provides himself with everything new and useful for carrying on the farm work and leaves the household with implements that date back to pioneer days is not deserving of larger success.

### About Live Stock.

Stuffing the colt with hay or straw or any coarse feed will spoil its looks. Keep this ration down by the use of some grain and less coarse feed.

Steers fed on clover hay will not only consume more roughage, but also more grain, than those fed on timothy hay if both grain and roughage are fed according to appetite.

It is the farmer who keeps sheep for a number of years that finds them most profitable. Some years they will return a much better profit than others, and it is hard to sell and buy at just the right time.

The ration of the driving horse should be different from that of the average work horse. This is due in a large measure to the peculiar demands of such an animal. It should be fed much less roughage in proportion to its size than a horse at ordinary work. The roughage should also be of different nature.

The ram should not run with the ewes during the winter. He will worry them, and one bunt might kill a lamb. He should have a box stall, not large, with a good, strong yard attached, where he can be out of doors on all fine days. Never leave him out in a storm so that his fleece will become wet, as it might mean death. Feed him regularly and enough to keep him in good, thrifty condition.

## Dissolution of Partnership

Notice is hereby given that I, N. C. Jansen, one of the partners of the Central Oregon Well Co. of Culver, Oregon, have sold my interest in said company to E. Wagoner, on this, the 7th day of August, 1911.

All bills against the firm will be paid by E. Wagoner, and all outstanding accounts collected by him.

## GO ADVERTISE LIKEWISE.

How did the little busy bee Get such a reputation? Why, his name's great throughout the earth. In every tribe and nation.

He has a buzzer for his big And buzzes while he's busy. His store is surely a beehive. He's busy till he's dizzy.

How did that little yaller hen Get to that rung so high? Was she borne there by an airship. Or did she just up fly?

She cackled, then she laid an egg And cackled awful after. To let folks know about that egg She almost raised a rafter.

Thus if you have a thing that's good And wish the folks to buy it You'll surely never do the stunt If you sit and keep quiet.

If that old hen didn't advertise Her eggs would just get rotten. She'd get the ax right in the neck And quick would be forgotten.

C. M. BARNITZ.

## KURIOS FROM KORRESPONDENTS

Q.—I have a Plymouth Rock hen here that is laying eggs with a pinkish white. She has already laid three in twenty-four days, and I should like to have your opinion as to the cause. A.—The fat around your hen's egg machine impedes the work of the muscles as they push the egg along, and they consequently bleed. Sometimes only a tiny clot appears in the egg; again, the blood mixes with the albumen, and you have that pinkish white.

Q.—Please state where there is a market for duck eggs, how they compare in price with hen's eggs and what color of shell is popular. A.—Duck eggs find their best market in the city, where the white popular shelled eggs sell at a higher price than chicken eggs to the Hebrew element.

Q.—What do you think of fish scrap as meat for breeders and chicks? What is it made of? A.—It is very good if fresh. It is made of ground codfish heads.

Q.—I exhibited Pekin ducks last winter at two shows, entering the same two birds at both. One duck was creamy white and the other white, but otherwise they were alike in weight, shape and style. At the first show the creamy bird won first, the other second. At the second show it was the reverse. Which judge was right? A.—If both ducks were alike in other respects the first judge was right, as the Standard calls for "creamy white."

Q.—I notice quite a number of poultrymen recommend tobacco dust for body lice on poultry. Is it ever fed to fowls for intestinal worms? A.—We never heard of its use for such purpose except in case of sheep, where it is fed to kill the stomach worm. A sure remedy for worms in poultry is a handful of oak wood ashes to every two quarts of mash twice a week.

## FEATHERS AND EGGSHELLS.

In a gang of six chicken thieves captured at Marietta, Pa., was a woman who dressed the fowls and sold them at market. Rather fowl work for a fair female.

When eggs are allowed to accumulate in the nest they not only are broken and start egg eating, but they encourage the hens to be broody. If eggs are removed as they are laid a turkey will lay as high as seventy in a season.

Refrigerator eggs from Australia are frozen so hard that a London dealer threw one at his office wall and made a hole in the plaster, but did not crack the shell. A lawyer, astonished, took three home to surprise his wife. He banged them down on the table where she and her fashionably dressed friends were playing cards, when—oh, horrors!—every egg busted. They had thawed.

With a corn crop of 3,125,713,000 bushels the green duck crop will exceed all records. There is now one medical quack to every 800 of the population, and our college incubators are still turning the fresh green product out at a fearful rate.

In March a California incubator manufacturer was running his factory day and night and was yet back 2,500 in orders, and the day was once when there was not an incubator in this country. Today over 300,000 are sold annually. Take that, pessimist!

To our friends who got rattled over that reciprocity treaty for fear it would flood this country with fresh eggs we just rise long enough to remark that Canada's surplus eggs for a whole year would supply New York city for just one day. Eggs for nog aren't included.

When an egg is broken in a setting the smear not only imperils the hatchability of the daubed eggs, but also makes the shells rough, so that there is friction when the hen turns her eggs and thus more breakage. Such eggs should be washed in warm water and at once be returned to the hen.

If old eggs hatch at all they hatch late and give poor chicks. As incubator chicks should not be fed the first day, these late chicks get their first meal too soon or the early chicks from the fresh eggs get theirs too late. Never be fresh yourself, but always set all fresh eggs for success.

When you give a chick feed as soon as it comes from the shell you overtax its digestive system, and that is generally its finish. Give the chick a day to assimilate the yolk and then feed little, but often.

To win a market for fine eggs and poultry these days is easy, but to win back confidence after imposing on a customer is seldom accomplished. The fellow that sticks to business and the Golden Rule is never branded as a knave or fool.

C. M. Barnitz.

## ITEMS OF INTEREST

**GIRL WANTED**—For general house work. Apply at Central Oregon Mercantile company's store. a17tf

**TO TRADE**—I have a standard track farm wagon and hack, both in first-class repair, that I desire to trade for another farm wagon and hack, narrow track. Inquire of A. V. Warren, Haycreek Oregon. a17-24pd

**DO YOU KNOW** the Madras Lumber company delivers wood in the city at \$6.50 and \$7.50 per cord. Phone your order now. jy27tf

**FOR RENT**—My quarter section of land five miles east of Haycreek post office; 100 acres under cultivation; will rent for cash for a term of from one to three years; will sell hay and farm machinery now on place to renter. A. V. Warren, Haycreek, Oregon. a17-24pd

**TAKEN UP**—At Hammer ranch near Culver, sorrel mare, weight about 950, four white feet, bald face; branded on left stifle with four o's joined with cross. Starving for water. Owner is requested to call and take same away and pay for expense of ad and care. R. S. Hammer. jy 20-tf

**ARE YOU** going to build? If so, see the Madras Lumber Co. Their stock is complete and prices right. jy27tf

**FOR SALE**—A house and four lots for less than cost on north side of Madras. The house is well built but not quite finished, the lots are 50x100. Must be sold at once. For information write Ora Van Tassel, Vanora, Ore. jy 20-tf

## FARM LOANS!! Madras State Bank.

**FOR SALE**—At the Pioneer Office Legal Blanks of all kinds; Carbon and Typewriter paper, installment Sale contracts, Notes and Receipts.

**MONEY TO LOAN ON FARMS.** See Madras State Bank.

**WHILE** fence posts are not our specialty, we have a special price on fence posts that we are sure will interest you. Madras Lumber Co. jy27

**FOR SALE**—Eight-foot windmill, nearly new; will sell on easy terms. Inquire at the Madras Hotel. jy21-tf

**HAY FOR SALE**—At my ranch 10 miles south of Madras on Grizzly road, ten tons of wheat and oat hay, \$10 per ton. Earnest C. Nicholson. a3-10c
