#### OREGON BOOKLET IS TO BE DISTRIBUTED

Advertising Proposition to be Given Immediate Attention

Portland, Ore., Mar. 16.—Oregon is to have a state booklet for information and guidance of interested persons who want to know exact facts regarding opportunities and resources. Governor West has made this possible by releasing \$25,000 appropriation enacted by the last legislature. The booklet will be compiled by C. Chapman, State Immigration Agent, with the co-operation of the State Board of Immigration, the Oregon Agricultural College, Oregon Development League and the commercial clubs of all the sections of the State of Oregon.

Besides general information regarding the state as a whole, Commissioner Chapman proposes to have detailed information concerning each locality. This will be gathered through the Oregon Development League and the local commercial clubs. The state will issue 200,000 of these booklets and the railroads will support them by publishing one hundred thousand more. It is of vital importance to each locality that the commercial organizations engage actively in preparing information to be used in this booklet and that they will have such an enormous circulation. Other states have for years, and every year there has been a demand

for information signed by the Governor and stamped with the seal of the state, telling the exact facts and conditions. The publication of this booklet is the greatest single event in Oregon's development program since the Lewig Clark Fair and the organization of the Oregon Development League.

#### Purpose of Housing Chickens

Oregon Agricultural College, Corvallis, Mar. 16.—Why many poultry houses fail to meet the requirements for the protection of the egg producers, and the main points which should be observed in building hen houses, are told by Professor James Dryden in one of his circular bulletins.

"The purpose of housing fowls is to increase productiveness," says Prof. Dryden. "A little shelter from the cold winds and storms will add to the comfort of the fowls, and therefore to the egg yield. A cold wave means a check to the egg yield, and the reason is probably because the change means a sudden demand for increased fuel or food to keep the heat of the body, and the food that has been going into the making of eggs will be drawn upon for that purpose. It is the food that furnishes the heat."

Too great difference in the temperature of the house by day and night is given as the principal reason why many houses fail. A house with double walls and windows will never be warm or dry without artificial heat, which has not yet been proven practicable.

"The main requirements of a good poultry house are; good

ventilation, for fowls require much more fresh air than other farm animals and protection from cold winds and storms," says Prof. Dryden. "Fowls object to cold winds. Unless the hen is provided with shelter where she can scratch and exercise, she will not be productive. Activity is the life of the hen."

The most common cause of insomnia is disorders of the stomach. Chamberlain's Stomach and Liver Tablets correct these disorders and enable you to sleep. For sale by M. E. Snook.

#### TWO SIDES OF ONE PROBLEM.

It is not enough to raise crops and live stock. They must be marketed. When you come to doing this how much easier it is to sell if these crops or stock are of high quality and how much better prices are realized. It really costs but little more to raise good stuff than it does to raise poor, and good stuff sells itself.

#### Uncle Sam Imports Potatoes.

It would seem that a great country like the United States might be able to raise enough potatoes for its own use, but in 1910 our crop amounted to 338,811,000 bushels, and we imported 1,632,081 bushels. Our crop of 1911 was only 73.8 per cent of the crop of 1910, while the British Isles have had a very short crop, though Germany has had an abundance.

#### Condemned Cattle.

More than 50,000,000 animals were inspected in the last fiscal year by the United States bureau of animal industry, and more than 1,000,000 carcasses or parts thereof were condemned as unfit for food, according to the annual report of Dr. A. D. Melvin, head of the bureau. Tuberculosis was the cause of most of the condemnations.

#### Where Cranberries Come From.

The cranberry is a special crop that has been grown on a commercial scale largely in three sections of the country—the Cape Cod district in Massachusetts, the New Jersey district and central Wisconsin. Small marshes in other sections have been reclaimed, but these three districts produce the major part of the commercial crop.

#### THE WISE FARMER.

There was a man in our town, And he was wondrous wise, He knew that if he wanted crops He'd have to fertilize.
