PROSPEROUS.—It is always a source of pleasure for us to know that those engaged in business around us, and more especially those who are liberal, are prospering. For Mechanics who have embarked the earnings and savings of years in their business, particularly do we feel a profound solicitude. We are but a mechanic ourselves—have devoted years of toil in Furniture establishments, and do not feel in the least degree humiliated when we reflect that this is the fact. But to our subject.

Mr. S. C. Stiles established himself in Dayton not 12 months since, in the Harness and Saddlery business; by economy, liberality and industry, he has built up a business that many in more pretentious localities might well envy. He keeps constantly on hand a large stock of manufactured work of every description and kind in his line. He sells at reasonable figures, and has a large and increasing trade. Success to him.

Mr. James Baker will be found at Dayton also, "pegging away," at the Boot and Shoe trade. Give him a call, leave your measures and induce time he will give you all "fits." Success to Mr Baker.

JOB WORK.—We have lately received direct from San Francisco, a large addition to the job material of our office, and are consequently prepared to execute in good style any job this section of country will likely require. We have a fine spread-Eagle-Cut, which we think will be brought into requisition during the present campaign. Have flaming posters struck and circulated to "earth's remotest bound" announcing your speakers and the day they will speak. There is no time to lose—the present campaign is an important one—get the people waked up! There is no better way of doing this than by getting them out to hear speaking.

A NAZARENE.—A Rev. Mr. McAlister has been during the past week, creating some little commotion in our County. He announced himself amongst us as a "Nazarene" Preacher, and this of itself provoked no little curiosity among the people to hear him. Another source of notoriety for the "Nazarene," was the fact that the authorities of the Church building at Lafayette refused him the use of it in which to hold service. The use of the Court House was procured, and he delivered two sermons therein. We heard him on Sabbath evening last, and can say that his discourse was eminently practical and quite unobjectionable. He taught in a very forcible way, practical Christianity, ie, benevolence and charity. He is by no means learned, but has a happy faculty nevertheless, of carrying his audience along with him. He explains and demonstrates his propositions in a manner to make them plain to the dullest comprehension.

Whatever was the motive for closing him out of the Church, we doubt the policy of such a course. It was the wish of 2 thirds of our people that he should have a hearing, as was evinced by the large audiences he got at the Court House. Some of them say he is under the ban of the church; admit it. So was John Wesley, Calvin and many others whose ideas have been in advance of the standard of the times. Christ himself, when here on earth was under the ban of the prevailing religion of the time, and simply for the reason that he was in advance of most men.

CONSOLIDATED.—We are informed that the Steamer Union, of the Yamhill trade has passed into the P. T. Company's line as joint stock in that concern. That Company has the monopoly of all the waters above the falls. The people and shippers of Yamhill would be truly sorry to have Capt. Miller removed from this trade. He will probably continue as heretofore.

WOOL CARDING.
We direct attention to the advertisement in another column of Mr. T. Standley's Grist Mill and Carding Machine on North Fork. This Carding Machine will prove a great convenience to wool growers throughout Yamhill and adjoining Counties. Mr. Standley is prompt and obliging in his business.

HE HAD HIM.—Talk of wit, a friend yesterday related an anecdote of an Irish peddler who stopped at a country tavern in Pennsylvania, and shared his bed with a magistrate. After some little conversation, the squire remarked that his companion might live a long time in Ireland before having the honor of sleeping in the same bed with a magistrate. To which the peddler replied, "And faith you'd be there a long time before the like of you could be magistrate." The squire concluded it was time to go to sleep.

IMPORTANT MEDICAL DISCOVERY
Electricity as a Curative Agent.

WHEN IT WAS PROMULGATED
By the Directors of the ELECTROPATHIC INSTITUTE, that disease could be entirely eradicated from the system without the use of poisonous drugs, the thoughtless and those who do not look deeply into cause and effect scouted the assertion as chimerical, and wrote long articles replete with sophistry, claiming that only through the digestive system could the blood be purged of the poisons which constitute disease; a great cry went up from those interested in the continued supremacy of the old system of one poison to cure another. All of the empirics joined in the chorus, and in their ignorance laughed at the new system, circulating base stories of its ill-success, and quoting imaginary cases as proofs. Time has demonstrated their dishonesty. After five years of uninterrupted success the Electropathic system is the leading idea in medical jurisprudence, while by the old system, physicians were content to cure one in every five cases, there were those who were diving deep into the science of the curative art; among these were the Electropathists; finally, it was discovered that the failure in most of the cases of organic disease, was entirely due to the machine. Taking this view of the case, Dr. J. H. Josselyn, after years of experiment, has perfected an Electropathic Instrument, which will cure any disease which flesh is heir, always to be understood that the case is not far advanced as to show a destruction of the vital tissues. We do not claim that the use of medicines may not be more advantageous in some cases, but, that in connection with medicines, it will perform a cure much sooner than without, and also that diseases hitherto deemed incurable, can be cured by this system but the directors would take this opportunity to inform invalids that the Resident Physician is a regular graduate, and has had a large experience in the treatment of diseases, both with and without the aid of electricity, he has also discovered several "electric" vegetable remedies that will cure almost any nameable disease, which he will send to any part of the Pacific Coast upon receipt of a complete description of the disease with which the applicant may be afflicted, and will warrant a perfect cure in all cases, where the medicines are used according to directions, and more especially in cases of FEMALE TROUBLES, where great care and caution are necessary to a favorable result. From early morn until late at night, this instrument is employed, imparting health and strength to all who are so fortunate as to obtain its services. Diseases (which the old system) took months, or even years to cure, are now cured in a few days or weeks. The cost, too, is not so great as by the old system, besides the saving of time. Connected with this system is the renowned

Eleiro-Magnetic Baths.
than which there is no more powerful auxiliary in the world for the radical cure of disease. There is no institute in the State where the electropathic system is practiced, except at the

Electropathic Institute,
645 Washington Street.
This Institute was established to, if possible, prevent the unwary from falling into the dens of robbery, (yclept quack doctor's traps), and hereafter the scientific originators of this Institute will not be to blame if the afflicted are robbed of their money, and injured in constitution. There is also another view of the affair. The rising generation should be reared with strong constitution, and the directors wish to arouse their guardians to a proper sense of their duties in their premises, if possible to prevent them from stuffing their young charges with deleterious drug, with a chance of entailing upon the tender constitution, just forming, a complication of evils, a thousand times worse than death.

It would be consuming space, to no purpose, to enumerate the disease, to which this system is applied, suffice it to say, that there is no disease within the catalogue of human ills but what can be cured at the Electropathic Institute. We have instructed the Resident Physician to warrant a perfect and permanent cure, or ask No Pay for services, when in his judgment it is within the bounds of cure

Persons seeking the Electropathic Institute should be careful to remember the name and number.
