MANAGEMENT OF FOWLS.—It is such places should be convenient and healthfully located. The best soil on which to keep poultry is a sandy one resting upon gravel, a it retains the least moisture; stag nant moisture being a fruitfu source of disease. Any soil upon which an enclosure for fowls erected should be well drained The hen house should afford prop per shelter and warmth; perche and nests should be kept clean The perches should be low, especially for the heavier breeds, so that they may not injure themselves in jumping down.

After a fair trial the most successful dealers have discarded the use of coops entirely; the greater freedom allowed the more healthful and profitable are your fowls.

In the summer, if your fowls have plenty of range, they need little or no feed; but in the winter or if they are kept up in the summer, if you expect eggs you must feed for them. Egg making is no easy work, and hens will not de much without they are well kept They need just what a man wh works hard requires--wheat and meat. Mr. Leland, the most suc cessful poultry raiser in the United States says: "The great secre of my success is in keeping near the conditions of nature. At th outset I became convinced that above all things, fowls must have D. Chaplin, Receiver..... space and cleanliness; that they cannot be expected to do well if

It is just as cheap to keep good fowls as poor ones. The best varieties for all purposes are Brahmas, Cochins, Leghorns and Dorkings. Some of our most successful poultry raisers keep two or

## Circular to the Liberal Public.

PROPOSE TO PURCHASE OR erect in the city of Boston a building to be known as the PAINE MEMORIAL, HALL, as a testimonial to the great services of THOMAS PAINE in the straggle for American Independence, and for Universal Mental Freedom. Said building to be suitable for stores, business offices, a Hall for Free Dicussion, Lectures Amusements, and finally, an office for the business purposes of the Bost in Investigator. To accomplish this, we need the assistance and contributions of all the friends of Payne and of the Investigator, and believing our readers and other Liberals to be of that number on whom we may rely, we lask their aid assistance by contributing liberally themselves and inducing others to do so. Subscriptions will be acknowledged in the columns of the Investigator. We have labored under many disadvantages during our connection with the Investigator, in providing suitable accommodations for our business and in securing a Hall for our Paine Celebration, and we appeal now to a Liberal public to come forward and help us to secure a permanent place for business and for holding our meetings.

Friends, Brothers, Sisters, the hour will

cure a permanent place for business and for holding our meetings.

Friends, Brothers, Sisters, the hour will come when we must cease from our labor.

The eause that the Proprietor and Editor of the Boston Investigator have expended their lives in, is an earnest voncher that not for self alone, but for humanity, they have worn away a life-time. And we invite all our friends to zealous and prompt action, as advancing age indicates that time waits for none. We all feel solicitous that our works shall live after we retine; and that our advocate of Freedom, our sturdy old Investigator, may still, for generations to come, sound our rallying cry—"For all Peoples, and all lands, forever Liberty."

Pin, Tape and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist: There is scarcely an individual on the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of medicine, no vermifuges, no anthehminitics, will free the system from worms like these Bitters.
