> VIOLETS IN WINTER .-- Perhaps some of our lady readers may be interested in knowing how to raise in winter those sweet-scented flow ers, violets. The following plan is recommended with confidence:

First take a few old boards, and and construct a Lottomless box about three or four feet in length and two feet square, sinking it in the earth nearly its full depth, on the sunny side of the garden. The top of the box should be slanting and covered with a glass dore or lid on hinges. After having the box well fixed, plant five or glass lid should be opened, but al- pray for another just like him." and violets in winter quite plenti-

BREATHING THROUGH THE MOUTH A fact which cannot be too frequently impressed upon the mind, says an exchange, is "that the perpicious habit of breathing through the mouth while sleeping or wak ing, is very hurtful. There are many persons who sleep with their mouths open, and do not know it. The may go to sleep with their mouths closed, and wake with in clesed; but if the mouth is dry and it has been open during sleep. Snoring is another sure sign. This habit should be overcome. At al times, except when eating or drink ing or speaking keep the mouth firmly closed, and breathe through the nostrils, and retire with a firm determination to conquer. The nostrile are the proper breathing apparatus-not the mouth. A man may inhale poisonous gases thro. the mouth without being aware of it, but not through the nose."

One of the reasons why a fight frequently occurs in Mortans churches is, that while the preacher is praying, the congregation sit on the backs of the chairs and frequently ejaculate-"That's right, old hoss!" "Bully for youl" "He's a book sharp!" etc. Sometimes the ministers get riled, and there's where the disturbance comes in.

The latest chromo story comes from down East, where a Sundayschool teacher raid to one of her pupils; "Johnny, why don't you A circuit preacher in Missouri invite your friend Billy to come to Sabbath school with you?"
