WHEAT PROSPECTS.,

A dispatch from Washington dated the 10th says, in reference to the prospects of wheat the ensuing season: During the past week the condition of winter wheat in 330 counties has been leys of Ohio and Missouri are repre- fought under Wellington at Waterloo. sented, which last year produced 70,-75 per cent., Ohio. 57, Michigan, 63, Indiana, 66, Illinois, 63, Missouri, 59, Kansas, 87, though only 32 counties in the latter State are represented. The condition is better in Pennsylvania, Maryland and Virginia, tho.'h below an average, A few wheat counties in New York make extremely unfavorable returns. The portion to be replanted in other crops average 14 per cent. in the West, or 1,260,-000 acres in a breadth of 9,000,000 acres seeded.

The Philadelphia Press of the 11th says, in view of all the reports from Pennsylvania: Owing to the severe frost and late spring, much of the existing crop has been killed, and the season delayed eight or ten weeks, Careful inquiries lead to the belief that not over half a crop will be gathered' and even this amount depends on a continuance of dry weather.

MIXED HUSBANDRY.

The Bulletin hits the nail about square on the head in speaking of mixed husbandry. It is well worth reading. It says:

The farmer upon one hundred acres who has a few acres in wheat, a few in oats, a few in barley and a few in potatoes and roots, and then has a liberal pasture and meadow, with four or five acres in apples, and as many more in pears, peaches, plums, quinces and cherries, keeping half a dozen cows, and perhaps twenty-five or forty long wool grade sheep, will be likely to come out better, taking one year with another, than one who devotes the larger number of his acres to wheat or some other leading crop. If any one crop is a failure, or marches, epidemic diseases, well sells too low to afford any profit. the planned ambuscades, and bodily other may yield profit enough to prevent any serious loss.
