SAMUEL HILL, Agent, 19 NEW MONTGOMERY ST., SAN FRANCISCO From report of Committee on Sewing Machines at Mechanics' Institute Exhibition, San Francisco, 1875:

We have taken particular pains to inquire into the merits of all the machines on exhibition, and have taken in consideration to arrive at a verdict: Not so much the first brilliancy of a single point as that combination of qualities, tending to make in the aggregate a perfect machine, one which will remain in the hands of the purchaser so long time and be all that was claimed for it when new. In consequence, durability, lightness of motion, perfectness of stitch, liability to wear, etc., have guided us in our conclusions. rear, etc., have guided us in our conclusions.

FLORENCE SEWING MACHINE.—We were very favorably impressed with the perfection of the stitching mechanism of this machine, its reversible feed, and the extreme lightness and stillness of its motion. Its general construction seems admirably adapted to stand the wear comsequent upon the work done upon that the second mechanism. We therefore give
