SIX RECORDS BROKEN AT BERKELEY MEET.

That End of the San Francisco Municipality Will Be Investigated By Grand Jury.

The improvement of the road between the coast and the eastern market is a certainty, and will probably be a hundred times more than the cost of the work. A plan is now first to make it possible to travel on the road in five minutes from the mouth of the river to the city, and the country will be ready to yield up its wealth to the cause. The county of Berkeley is located in the heart of the state, and the people of the county are already aware of the importance of the road that will be laid out. The road is a vital link in the transportation network of the country, and the people of the county are determined to see that it is completed.

ALCOHOL AS A BY-PRODUCT.

Syrup From Coffee Crop Might Be Developed.

Ask the western or eastern farmer for a glass of syrup from his coffee crop, and he will probably produce a gallon of fine syrup with a few drops of alcohol. While this may seem an unusual claim, it is a fact that the production of syrup from coffee, with the addition of a small amount of alcohol, is a common practice in many parts of the country.

Figures from the Department of Agriculture show that in the United States, the production of syrup from coffee is estimated at 100 million gallons per year. The syrup is produced by processing the coffee beans, with the addition of a small amount of alcohol, to enhance the flavor and color. The alcohol is then removed by distillation, leaving a syrup that is rich in natural sugars and minerals.

It is estimated that the production of syrup from coffee could provide an additional 100,000 jobs in the United States, with an annual income of $5 billion. This would be a significant boost to the economy, especially in rural areas where the production of syrup is more common.

The potential for developing syrup from coffee as a by-product is significant, and further research in this area could lead to new opportunities for the coffee industry and the creation of new jobs.

SIX RECORDS BROKEN AT BERKELEY MEET.

The six records broken at Berkeley on April 25, 1927, were established for the following events: 100-yard dash, 200-yard dash, 400-yard dash, 800-yard run, and 1-mile run. The records were set by the following individuals: 100-yard dash (Owen Johnson, 9.9 seconds), 200-yard dash (Owen Johnson, 21.6 seconds), 400-yard dash (Owen Johnson, 44.3 seconds), 800-yard run (Owen Johnson, 1:52.8 minutes), and 1-mile run (Owen Johnson, 4:23.2 minutes).

The records were set at the annual meet of the University of California, which is one of the largest and most prestigious track meets in the country. The meet is held each year in Berkeley, California, and attracts the best collegiate runners from across the United States.

The records were set on a track that was certified by the Amateur Athletic Union (AAU), and were recognized as official records by the AAU and the International Association of Athletics Federations (IAAF). The records were set in the following events: 100-yard dash, 200-yard dash, 400-yard dash, 800-yard run, and 1-mile run.

The records were set by the following individuals: 100-yard dash (Owen Johnson, 9.9 seconds), 200-yard dash (Owen Johnson, 21.6 seconds), 400-yard dash (Owen Johnson, 44.3 seconds), 800-yard run (Owen Johnson, 1:52.8 minutes), and 1-mile run (Owen Johnson, 4:23.2 minutes).
