SCHOOL ATHLETES BEING WARNED

Instructions Are Sent Out Indicating
Regulations Governing Ama-
teur Sports.

The P. N. A., located in Spokane,
is sending out a letter to every high
school and private school in the
northwest, and to the superintend-
ents of city schools in the various
cities, calling attention to the ne-
cessity of enforcing amateur rules
among the students who are to enter
the colleges later, both in this sec-
tion and in the east.

The schools and teachers are asked
to impress upon the pupils that they
should not take part in any Fourth
of July sports, picnic meets or ball
games where cash prizes are offered.
Should they do so they will profes-

sionalize themselves and will be
barred from participation in athletics
when they reach college. The in-
structors are asked to use their in-
fluence to promote amateur athletics,
and to see that in games mentioned
above merchandise prizes only are
offered.

Practically all of the colleges in
the northwest are getting into line
and have signified their intentions of
living up to the A. A. U. rules in the
future. A special effort is to be
made to induce the athletes in the
secondary schools to register in the
P. N. A. and take an active interest
in the association.

Up to the present athletic clubs,
schools and colleges generally in the
northwest have been lax concerning
the enforcement of the amateur
rules. Nothing short of playing on a
recognized professional team was
thought to render a man ineligible to
a college team, but hereafter the
rules are to be strictly enforced, and
it is deemed sufficient notice has been
given to all athletes concerned, and
that any steps they may take in the
future which will render them pro-
fessional will be taken wittingly.

IS FIRST ON COOS BAY

Handsome Soda Water Fountain of
Modern Type is Installed at
"The Palm."

TO BE REMODELED

Place Will Be Handsomest of Kind
in the City When It Is
Finished.

Stafford & Montgomery, proprie-
tors of The Palm, yesterday received
a new soda water fountain, the first
real fountain ever installed on the
bay. The fountain has a fine marble
and oak body, having sixteen syrup
cans which are finely finished; it also
has two soda draughts and water con-
nections. The back is fitted with
three large mirrors, which together
with the electric fittings set it off to
advantage. In addition to the soda
fountain Messrs. Stafford & Mont-
gomery have also received thirty-two
chairs, eight tables and six stools, all
of which are of the latest style in ox-
idized copper and oak finish.

In order that the firm will have
plenty of room and the nicest ice
cream parlor on the bay, the present
quarters are to be thoroughly over-
hauled. The front partition is to be
taken out, giving them a room
twenty by thirty feet in size. It will
be repainted and repapered through-
out. The fountain will be set at the
extreme north end of the room, the
candy and cigar cases being moved
along one side, giving plenty of room
for the tables.

Architect Himebaugh has charge
of the inside arrangements of the
room. The Combination Fountain
Factory of Decatur, Ill., supplied the
fountain, through the wholesale firm
of Woodard, Clarke Co. of Portland.
The chairs, stools and tables were
also furnished by a Decatur factory
through the same Portland firm.

bank would not lose more than the
\$140,000 required to reimburse the
brokers who innocently accepted the
stolen bonds as security. No bonds
are now missing, he said.
