grouse rises gradually with a straight course; the woodcock rises to a height of several feet or even yards, then flies straight away; the cuckoo's flight is also in a straight line, but peculiarly arrow-like, being graceful and silent, the long slender tail and body of the bird still further suggesting an arrow. A number of the birds, notably the brown thrasher and the song sparrow, progress in short flights, as from bush to bush, with a queer eccentric or bobbing motion, as if their flapping tails were a great hindrance. A Wilson snipe flies in a zigzag line, a goldfinch in long undulations or bounds. All of these and many other ways of flying can be indicated by dotted lines in the notebook embellished by such words as

"sailing," "rapid," "slow," "heavy" or "graceful" flight and "rapid," "slow," "silent" or "clattering" wing beats; the wings of the grouse hum, those of the woodcock and the mourning dove whistle.—St. Nicholas.

FRONT ELEVATION.

FIRST FLOOR PLAN.

SECOND FLOOR PLAN.

This attractive frame dwelling was designed for suburban New Jersey, but it would be effective in almost any location. The sloping roof, the bowed front of the first floor and the big bay window of the main upstairs bedroom give it a distinctive appearance. The arrangement of the rooms is also somewhat unusual. The cost is estimated at \$5,500. P. T. MACLAGAN.

"La Bon Vivant" Cafe and Grill

Will have a grand opening June 2. The management has been requested by several of its patrons not to put in girl waitresses, as they may be detrimental to box service. I will say that girls are alright but cannot say what to do, but believe the request will be granted. Boys and girls together give very poor service as they are subject to many complaints.

I as manager believe I have seen enough of the hotel world.

Yours Very Truly
