"North Bend---Its Payroll Talks"

"If a man can write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, though he build his house in the woods, the world will make a beaten path to his door."—RALPH WALDO EMERSON

Just now empire builders are building iron-shod paths to the commercial door of North Bend because its factories have the frieght to ship, and their payroll talks.

Like seeks like. Is an eternal law of nature. Although but imperfectly recognized, is absolute. This same law holds good in building of factories. A factory is built always at that point where there are fewest obstacles to be overcome, where tributary raw materials are unlimited and markets unrestricted. If this holds good in one case it will hold good in several—a dozen or a hundred.

North Bend but a few years ago had one factory, soon it had several, now there are a dozen, and the raw materials are here for a hundred more. Factories make payrolls, these in turn create business houses which invite banks, jobbers, traders and transportation facilities, and all go to the making of a city because "Its Payroll Talks," which creates a demand for real estate. There is beaten path to our door because we have the best bargains in North Bend real estate.
