Their veracity was unchallenged, for the largest of the local freight trains was derailed. The crash occurred when the freight train hit a small bridge, causing the second and third cars to derail. The accident occurred near the town of Marcella, about 30 miles from the city of Salem.

The freight train, which was on its way from downtown Salem to Binghamton, was carrying a variety of goods, including wood, coal, and industrial supplies. The train had departed from Salem at 9:13 a.m. and was traveling westbound.

The cause of the accident is still under investigation. Initial reports suggest that the train may have been traveling too fast for the conditions, causing it to derail and crash into the bridge. There are no reports of any injuries to passengers or crew.

The train company has ordered an immediate review of all freight train routes to ensure that safety protocols are being followed. The company has also offered its condolences to the families of the train company.

In a statement released by the train company, they said: "Our thoughts are with the families of those affected by this tragic event. We are committed to ensuring the safety of our customers and employees, and we will take all necessary measures to prevent such incidents from occurring in the future."
