

A few facts about the Monarch Range: All steel with qualities no other range possesses. Absolutely guaranteed against breaking, will heat quicker with less fuel than any other. Why? Because it is made from heavy cold rolled plates, riveted to malleable iron "hot cast" and is as near air tight as a range can be made. We will pay \$30.00 for a Monarch range no matter how long in use. Your money back if you are not satisfied. We invite your inspection.

Facts About the Grip.

The grip is highly infectious. It stimulates other diseases. The grip picks out the weak points of a person's constitution. The grip in itself is by no means a mortal disease. The victims of the grip are adults who perish from pneumonia or bronchitis, and the aged who sink from heart exhaustion. Children, while prone to the disease, enjoy a comparative immunity from its complications and dangers. In adults the attack, as a rule, comes on with lightning like speed. Health is suddenly overcome by a feeling of discomfort and depression. He "runs" at the nose; he feels chilly; his head aches; his eyes pain him. What to do—go to bed at once; take Chamberlain's Cough Remedy and quinine as directed for influenza. Do this and the grip is soon shorn of its terrors. For sale by John Freuss.
