Facts About the Grip.

The grip is highly infectious. It stimulates other diseases. The grip picks out the weak points of a person's constitution.

The grip in itself is by no means a mortal disease.

The victims of the grip are adults who perish from pneumonia or bronchitis, and the aged who sink from heart exhaustion.

Children, while prone to the disease, enjoy a comparative immunity from its complications and dangers.

In adults the attack, as a rule, comes on with lightning like speed. health is suddenly overcome by a feeling of discomfort and depression.

He "runs" at the nose; he feels chilly; his head aches; his eyes pain him.

What to do—go to bed at once; take Chamberlain's Cough Remedy and quinine as directed for influenza.

Do this and the grip is soon shorn of its terrors. For sale by John Preuss.
