COOK WITH GAS

Our new plant is thoroughly modern and up-to-date. No better gas can be made than we are producing.

We are connecting up new customers every day. Is your application in? If not call us up and we will send a man to see you. If gas was not the thing for cooking with, it would not be used by upwards of 9,000,000 people in the United States. We are selling gas stoves at a very low price and making a nominal charge for the service pipes to our mains.

Small Fire Today.—Defective wires caused a small blaze in Robert Marsden's building on Front street this morning. The building was formerly occupied by the Melrose restaurant, the second floor being occupied as living rooms by W. P. Smith and family. Somehow the wires where the insulation was faulty came in contact with the bedding and started the blaze. Mr. Marsden happened to be near and discovered the fire in the nick of time. He threw the burning material out of the window and the fire department arrived in time to quench the blaze before serious damage was done.
