Buy Your Wife a GAS STOVE

It converts the drudgery of the kitchen into a pleasure. It reduces a woman's housework one-half. You can sleep later in the morning as the fire does not have to be made a half-hour before time to cook.

Call at the office and see those instantaneous water heaters. Turning on the cold water lights the gas and heats the water in one minute, turning the water off shuts off the gas.

You would not think of going back to the old kerosene lamp after using electric light, would you? Well, when you have once used a gas stove nothing could induce you to use anything else.
