The Conveniences of Electricity

In the house are manifold. It is not only for illuminating and cooking purposes, but for the quick and clean performance of other household duties—such as ironing, for instance, that electricity is desirable. With an electric chaffing dish delicacies can be literally "made in a minute." With electrically heated irons your laundry work is done expeditiously and in a most cleanly manner. We install electrical apparatus everywhere.

Saving Work.

In the home of one woman where single beds are in general use the spreads are made of honeycomb material bought by the yard and hemmed. They are easy to wash and require no ironing. In the same home cream white madras is used for bedroom window draperies because of its good wearing qualities. It comes out of the wash with flying colors. She trims them with ball fringe and does not have them wrung very dry and wrung by hand, of course, as the wringer would flatten the little balls. She uses small rugs all through her house save the dining room, because they can be taken outdoors every week by the one maid of the establishment. Another woman saves work by having her luncheon brought to her sitting room on a tray, and another, belonging to a family that seems doomed to perpetual mourning attire, supplies her maid with very light cotton dresses in white and black because there is already too much gloom in the house.

A Photography Hint.

With a fixed focus camera the endeavor should be to get the principal objects in a good light and at such a distance from the camera that they will be nicely rendered without the necessity of stopping down the lens. The distance will take care of itself, and the foreground, too, unless there be any very prominent feature in it, when the picture is likely to suffer by unsightly diffusion or a want of sharpness.

With ordinary good fortune as regards weather and subjects, the amateur photographer who proceeds with intelligence can bring back a collection of excellent pictures, even though she has never used a camera before, and the pleasure to be derived by looking from time to time to these reminiscences of some weeks at a delightful country or seaside resort will be such that she will not readily go away in the future without an instrument which so readily records the chief incidents of a holiday.
