

NEW STATIONS NEARLY DONE

Change in Cape Arago Light and Fog Signals to Be Made About July 1.

It is officially announced that the new fog signal and light station at Cape Arago, near the Coos Bay entrance, will be ready for use about July 1. The new stations were started several months ago and the work has been slow. The official announcement concerning them follows:

"Coos Bay Entrance—Cape Arago Light-Station—Change in location and characteristics of light and fog signal.—About July 1, 1909, the present light and fog signal at this station will be permanently discontinued, and there will be established, about 1-6 mile 155 degrees 20' true (SE 3-32 S mag.) from the present light, a 4th-order triple-flashing light; two intervals of 4 seconds, and one of 12 seconds, in the octagonal lantern on the white octagonal frame tower rising from the S'y face of the white, one-story, frame fog-signal building recently erected. The light will be 86 feet above the water, and should be visible 15 miles in clear weather, between the bearings 35 degrees 00' true (N by E 5-16 E mag.) and 249 degrees 10' true (SW 3-8 W mag.), the observer's eye 15 feet above the water.

On the same date there will be established in the fog-signal building a 1st-class, automatic, compressed-air siren, to sound during thick or foggy weather, alternate blasts of 5 and 3 seconds, separated by alternate silent intervals of 12 and 40 seconds."

WANTS EARLY TRIALS.

WASHINGTON, April 1. — Blinger Hermann, J. N. Williamson and other Oregon men who have long rested under indictment, some for more than four years, will be given a speedy trial or else the indictments against them will be dismissed.

Attorney-General Wickersham has learned of the manner in which the trial of these cases has been staved off from time to time, and has given orders that such proceedings will no longer be tolerated. These defendants under the Constitution are guaranteed a speedy trial, and if the government after all this time is unable to place them on trial other steps will be taken to close the cases.

There is no disposition to longer postpone these trials to suit the convenience of any one connected with the prosecution, and it is therefore improbable that the Hermann case, if dropped, will be turned over to some other than Heney for prosecution.

TO TRY NEW PLAN.

Portland to Vote On Adoption of Gothenburg Liquor Scheme.

PORTLAND, Ore., April 1. — To place the liquor business of Portland in the hands of one corporation, eliminating the individual saloon-keeper, is the object of an initiative petition which is being circulated by 18 agents for the Portland Gothenburg Association. For the privilege of having this monopoly the association agrees to pay the city of Portland \$3,825,000 for a franchise for 10 years, and regulate the sale of liquor strictly and keep its sale confined to the business district and keep saloons out of the residence district. In exchange for the franchise, the association promises five things, as follows:

- 1—Reduction of the number of saloons from 440 to 250.
2—Operate no saloons except in the business district.
3—Pay the city an increased revenue license of \$365,000 a year for the first five years and \$400,000 for the second five years.
4—Strict regulation of the sale of liquor.
5—Close saloons at midnight, keep them closed until 5 a. m. and closed Sundays.

Any violations of the terms of the agreement will cause the forfeiture of the franchise.

The Portland Gothenburg Association plans on following the general lines of the Gothenburg idea as now in use in Sweden, Norway, Switzerland, Denmark, Finland, Holland and other European countries.

CURRY COUNTY NEWS.

Events of That Section As Told By Port Orford Tribune.

Born—At Ophir, Oregon, March 19, 1909, to the wife of Rufus King, twin boy babies. The Tribune sends best wishes and congratulations, and hopes the little Kings may have a long and happy reign.

C. W. Zumwalt had the misfortune to lose a fine "Greenlaw" colt by a "Joe K" filly. A vicious cow killed the colt.

The most beautiful fish we ever saw was a Rain bow trout caught by Frank Clarno on Rogue river, recently, four miles from its mouth. It weighed 12 lbs.

A Coroner's inquest was held over the body of John Sullivan, and the cause of his death was attributed to heart failure. Dr. S. J. Mann was attending physician.

It is reported that the purchase of the Jo Nay farm on Elk River by Prof. J. S. Capps has fallen through because the Lee-Bowlder Company of Denmark have turned down the purchase of Mr. Capps place at Denmark.

It is said that Milton and Asher Moore have rented the store building in Alf Gauntlett's new hall in Gold Beach, and will start a good store in a few weeks. Asher will run a blacksmith shop, and Milt will run the store.

Fishing for steelheads on Rogue river ceased for the year on March 5th, the close of the season. Fish were plentiful at the time and fishermen were reluctant to fold their nets and quit. The season should extend to March 15th.

Mr. Crow who has been working on Cape Blanco beach for Mr. Phelps, says that Mr. Phelps' method of saving gold is all right, and that he is making money, and has sand enough to work all summer if water holds out. He has a gasoline engine set on the bank and elevates the sand to the machine, which saves both gold and platinum.

The ranchers are very busy down the coast, and those who have dry land have their crops of oats mostly in. The Moore boys, George Woodruff, Will Coy, and Gene and Will White, are all putting up new and splendid fences. John Fromm has in a larger acreage of oats than usual. From Ophir to Port Orford the ranchers are making a fine showing, while L. Knapp is doing wonders on his Hubbard's creek farm.

Mr. Merrill who has been running a tunnel all winter on his Elk river mine, has at last penetrated the ledge a distance of 5 feet. The ore is telurium and the ledge will probably be 10 or 12 feet wide. He left here for Oakland, Cal., Monday, taking with him enough ore for a milling test, and is confident from assays made that he has a great mine. He expects to return soon to resume work by enlarging the tunnel into a working tunnel, building a wagon road to the mine, and getting things in condition for operating the mine as soon as possible.

CHANGES IN BASEBALL RULES IN A NUTSHELL.

A substituted pitcher must pitch until the man at bat, when the pitcher takes his position, has either been put out or reaches first base.

In case of interference with a fielder or batsman, the ball is not in play until the pitcher, standing in his position holds it, and the umpire calls "play."

A batted ball that touches the person of the umpire or a player "while on or over fair ground" is a fair hit; and a batted ball that touches the person of the umpire or of a player "while on or over foul ground" is a foul hit.

Any ground rule must be acceptable to the captain of the visiting team; and if objectionable to said visiting captain the umpire has the power to adopt or reject said ground rule or rules.

EGGS WHEN THE PRICE IS HIGH

To get plenty of eggs in winter the experts recommend that the hens be forced to molt during mid-summer. To do this a writer in the Reliable Poultry Journal gives the following method:

"During June I feed oats and wheat. At first I give them the usual quantity, gradually reducing it until I feed a flock of twenty hens only about one pint of oats and wheat mixed, three times a day. This is plenty for this size pen of utility fowls. Scatter the wheat and oats in litter of some kind. Keep the birds on that ration until about the Fourth of July and then gradually increase until you get them back to the regular feed, which is about a handful for each one of wheat, oats, Kafir-corn, barley, or buckwheat. About three mornings in the week feed mash made of cornmeal, wheat bran, shorts or middlings and linseedmeal, using about equal parts of each. Allow about one quart of the mixture to twenty hens. A little salt, less than a teaspoonful, and a little black pepper should be added to the mash, and it should be wet only enough so that it will crumble when you throw it into a trough or on a board. Never feed mash on the ground or in dirt. See that the troughs or boards are cleaned after each feeding. Two or three times a week feed them cut bone or beef scrap and give them plenty of green food, such as blue-grass, clover or cabbage. In winter time clover hay or alfalfa is a fine substitute for cabbage. If you force your utility hens to molt early, you will be sure of a good supply of eggs in the winter when prices are high.—Exchange.
