THE COOS BAY TIMES, MARSHFIELD, OREGON, WEDNESDAY, AUGUST 18, 1909-EVENING EDITION.

City Council Takes Steps to Next Annual Session Likely to Permit-Other Business

4 and ENEMINORS HITSE

Last Night.

That a determined effort will be made shortly to clear the water front and open a highway or street along it was shown last night when the Marshfield city council insisted before they would grant a building permit to the C. A. Smith Lumber and Manufacturing Company for the erection of a warehouse just South of Central avenue and east of Front street that the latter agree to move it back forty feet from the harbor line when the others do. General Manager Oren and Mr. Smith personally agreed to this. The new warehouse is to be a one-story structure, 70x32 and will be built between the dock's edge and the present new building which the company has erected.

Councilman A. H. Powers insisted that the Coos Bay Gas and Electric Company be required to give better service. He said that the arc-light on his corner has not been lighted for three weeks and two nights and that many other arc-lights are out a good share of the time. As the city is paying about \$7 per month for each arc-light, he said that it should insist on getting something in return. Chairman Albrecht of the light committee, was instructed to take the matter up with the company and also to instruct the night watch to keep a record of the arc-lights and make regular reports to the council so that the light company's bill may be trimmed if they don't give the service.

The contracts with the Coos Bay Paving and Construction were approved, F. S. Dow is bondsman for the company, Councilman Albrecht entered objection again, claiming that it wasn't right for the city to dishonor the special, street improvement bonds by allowing a contractor to discount them ten per cent.

W. S. Turpen was appointed electrical inspector by Mayor Straw and the appointment ratified by the counci1.

The ordinance re-establishing the grade of Fourth street South, was read. As it makes a material change in the street near the Jas. Bennett home where the lot was cut down about twenty feet to correspond with the present grade, established by Engineer Codding several years ago,
