Marsden San will Deliver in the Country.

The business the present is the season for the construction of Alex- ander's bridge was awarded to D. Parmefett the contractor who recently completed the Deschutes bridge. The bridge will be of the stone type, material will be the same as on the covering the centers being held in the river and the stone on the land. The main structure will be 125 feet above of the river and the stone pier 150 feet above the river.

The bridge is to be 60 feet wide and 175 feet long.

In the matter of the right of way in the river it will be necessary that the stone be used on the main structure.

A large number of men have been engaged in cutting stone and the work is progressing rapidly. The bridge is expected to be completed by early in the spring.
