(Washington, D.C., Jan. 19, 1910, 8:30 p.m.)

A severe fire broke out in the Bennett textile plant today, and three persons were burned to death.

The fire started in the Bennett textile plant at 9:00 a.m. and was discovered by a workman who was passing by. The plant is located at the corner of 10th and H Streets, N.W.

The fire was promptly reported to the Fire Department, and a large force of firemen was sent to the scene of the fire. The plant is located in a building that was built many years ago and has not been inspected for some time.

The loss will be heavy, as the plant is well equipped with machinery and has a large stock of goods on hand.

A committee of three men from the plant is busy making arrangements to save the goods on hand.

The cause of the fire is not known, but it is believed to have been started by carelessness in the use of electricity.

Two new textile plants are being built in the district, and the Bennett textile plant is one of the oldest.
