## BRIEFS OF BANDON.

News of Lower Coquille as Told by the Recorder.

Improvements still go on in Riverton. The old Foster house is to be raised and the new cement underpinning placed under it.

James E. Lee met with a severe accident on Sunday near Riverton. He was going over to Craine's Logging camp to work. While going over the trestle he slipped through and bruised himself very badly besides dislocating his hip joint.

A. J. Counts, supervisor of this road district brought his machine in and hitched John Jenkins' team to it and graded down the race course around the high school grounds last

Sunday so that it is now perfectly level. The boys appreciate their fine track very much and are improving the time on it. The high school had a half holiday Tuesday, as a result of twenty days school with no tardy marks, and the boys held a track meet and a number of the athletes made some fine records. The boys are hopeful of good results at the county high school field meet.

George Hite will run an automobile line between Bandon and Port Orford this summer. He will start his machine as soon as the roads are passable for it. An automobile line ought to be a paying proposition.

## NEWS OF COQUILLE.

Coos County Seat Events as Told by the Sentinel.

W. H. Peck of Los Angeles, California, spent a couple of days in this city this week. Mr. Peck is on his way home from a trip into Curry County where he owned a four-hundred-acre stock ranch which he sold last week to Marshfield parties.

It has been stated at Myrtle Point that Editor Robert's wife has fallen heir to a fortune. His many friends will be pleased if this rumor is true.

Several minor accidents have occurred in Myrtle Point lately. Lewis Roberts during a frisky spell stood Joe Williams on his collar bone, breaking the same in many places and Alfred Sturtevant while playing blackman at school lost some teeth and part of his tongue. All the pieces are doing well.

Just to show what the Coquille Valley can and does do for the progressive farmer, Charles Collier, living just above town, is this week cutting the first crop of hay on his meadow. The hay is not very heavy and Charley may have a rather hard time curing it, but nevertheless the fine weather of this section has already done its part and the rest is up to him.

The records of the county clerk's office show that there has been two hundred and thirty-five dollars paid out of the treasury as bounties on varmint scalps during the month of March. Of this amount one hundred and ninety-four dollars came from the county funds and the balance one hundred and forty-four dollars, from the state. This amount represents the bounties on the scalps of five panther and forty-seven wild cats. At this rate these varmints will soon be practically exterminated within the bounds of Coos County, but this depopulation will not be lasting unless the warfare is continuous as the varmints will naturally migrate to this territory from other sections as their predecessors are killed. However, the work is a good one and this will be especially noticeable in the marked increase in wild game for the coming year.

### MUST ANSWER QUESTIONS.

Penalty for Refusing Census Enumerators.

President Taft has issued an edict to the effect that we must answer all the questions of the census enumerators. If you don't you will be subject to penalty. Under a law passed by congress July 2, 1909, it is the duty of every person to answer all questions on the census schedules applying to him and the family to which he belongs, and to the farm occupied by him and his family. Any adult refusing to do so is subject to penalty. There need be no fear that any disclosure will be made regarding any individual person or his affairs. For the protection of the persons furnishing information, every employe of the census bureau is prohibited, under heavy penalty, from disclosing any information which may thus come to his knowledge.

### NOVEL DANGER OF SHIP.

Turtles Nearly Wreck Vessel off Florida Coast.

GALVESTON, Tex., April 4.—According to Captain Evans of the steamship Brazos of the Mallory line, the Brazos had a narrow escape from serious damage while enroute from New York, when a school of monster turtles were encountered off the Florida coast.

According to Captain Evans, many of the turtles weighed 1000 pounds and none less than 500 pounds. The vessel started to plow her way through the school, but after striking many of the armored reptiles, was forced to slow down and finally steer around the living mass.

A number of the turtles were caught on the iron prow of the Brazos, where they remained fast until sailors were let down to cut them away.
